

# Nonhazardous Solid Waste Management and Landfill Capacity in Illinois: 2004

# Nonhazardous Solid Waste Management And Landfill Capacity In Illinois: 2004

Reporting period for waste disposal: Jan. 1 to Dec. 31, 2004  
Reporting date for landfill capacity: Jan. 1, 2005

This report has been prepared for the Governor of the State of Illinois and the General Assembly  
in accordance with Section 4 of the Illinois Solid Waste Management Act.

# Additional Information and Acknowledgements

## How to Obtain Additional Information

To learn more about municipal solid waste landfills, transfer stations or compost facilities in Illinois, please call 217-785-8604, or write to:

Illinois Environmental Protection Agency  
Bureau of Land  
Division of Land Pollution Control  
Waste Reduction and Compliance Section  
P.O. Box 19276  
Springfield, IL 62794-9276

Our Internet address is <http://www.epa.state.il.us>

When using courier services (UPS, Airborne, etc.), please use the following street address and zip code:

1021 North Grand Avenue East  
Springfield, IL 62702

## Acknowledgements

This document is produced and published by the Illinois Environmental Protection Agency, Douglas P. Scott, Director. Primary Editor was Ellen Robinson of the Waste Reduction and Compliance Section, Bureau of Land.

The report is printed in the Agency's print shop. Many thanks to Tom Davis who provided publishing advice to the Primary Editor. Dennis McMurray and Nina Dugger provided editing. Excellent typing and design was provided by Judy Brubaker, the Section's administrative support. Photos were chosen by Ellen Robinson and Tom Hubbard. Poems and the poster were from fifth and sixth graders from Illinois schools who won our 2003-2004 contest. Full length, fold-out State of Illinois and Chicago Metropolitan area maps were designed by Ted Prescott using GIS software.

Illinois EPA Bureau of Land personnel contributed their time and expertise to the development of this publication. Computer data calculation was provided by Darrel Watkins. Assistance with technical matters regarding permitting and inspecting was provided by Gary Cima and Gary Steele. Neelu Lowder of the Remedial Project Management Section provided information about our abandoned landfill program. Todd Marvel is our used tire expert.

The Agency also wishes to thank the staff of the 18 delegated counties, plus Ambrav Valley Solid Waste Agency and the City of Chicago who inspect and have first-hand knowledge of approximately 50 percent of the landfills, transfer stations and compost sites covered in this report. Staff from our seven regional offices and delegated partners are responsible for inspecting all Agency-permitted waste management facilities.

The capacity remaining in Illinois landfills increased 46.2 percent. The available space is more than adequate and should serve our residents for at least another 18 years. In this, the Agency's 18th annual report on landfill disposal and available landfill capacity in Illinois, we report to you not only the remaining capacity, but many other useful facts about landfills and pollution control facilities throughout the state.

Since its inception in 1970, the Illinois EPA has overseen the development and operation of a productive system of modern sanitary landfills. The Agency continues to ensure that these facilities meet the strictest disposal standards in history, and that they are engineered to be fully protective of human health and the environment, especially where it concerns any possibility of groundwater contamination.

In 2004, the number of active landfills in Illinois accepting waste was 52. Years of waste disposal remaining for these landfills, however, varied tremendously from region to region; ranging from 11 years in the Chicago Metropolitan area to 58 years in Southern Illinois.

During 2004, Indian Creek Landfill #2, Hopedale, received a significant modification permit and re-opened. Two new landfills opened in early 2004: these were Prairie View Recycling and Disposal Facility, Wilmington and Perry Ridge Landfill, DuQuoin. Two other landfills are under development in Atkinson and Marion.

Six landfills that expanded during 2004 include Envirofil of Illinois Inc, Macomb; Livingston Landfill, Pontiac; Onyx Orchard Hills Landfill Inc., Davis Junction; Saline County Landfill, Harrisburg; Southern Illinois Regional Landfill, DeSoto; and Winnebago Reclamation Services, Rockford. Additionally, on June 6, 2005 Roxana Landfill Authority, Roxana, was permitted to expand.

In 2004, 98 active transfer stations and 40 active compost facilities are available to help manage waste generated in Illinois.

Inspections of waste management facilities are conducted by personnel from Illinois EPA's seven regional field offices and our delegated partners. Our delegated partners include 18 counties, Ambraw Valley Solid Waste Agency and the City of Chicago have been delegated the authority to inspect landfills, transfer stations and compost sites in their jurisdictions, and investigate citizen complaints about illegal dumping of waste.

The Illinois EPA hopes you will find this information useful and instructive and welcomes your comments and suggestions as to how it may be improved.

*Douglas P. Scott*  
Director  
Illinois EPA

# How to Use the Illinois EPA Landfill Capacity Report

Nonhazardous Solid Waste Management and Landfill Capacity in Illinois is Illinois EPA's annual report describing the management of nonhazardous municipal solid waste by the State's solid waste landfills, transfer stations and compost facilities. The report is divided into sections representing Illinois EPA's administrative regions. Region 1 includes Northwestern Illinois counties; Region 2 includes Chicago Metropolitan counties; Region 3 includes Peoria/Quad Cities area counties; Region 4 includes East Central Illinois counties; Region 5 includes West Central Illinois counties; Region 6 includes Metropolitan East St. Louis area counties; and Region 7 includes Southern Illinois counties.

Each regional section includes newly designed specification pages describing the chief physical characteristics of each landfill. Provided are: its location and hours of operation, tipping fee, quantities of wastes received for the last three years, the landfill's certified remaining capacity (in gate cubic yards) for the last two reporting dates, solid waste management fees paid in 2004, the Agency regional field office or delegated local authority that inspects the facility, and the name, address and phone number of the landfill's owner and operator. Similar, but scaled down specification pages, are included for each transfer station. In all, this report includes details of 57 landfills, 103 transfer stations and 47 compost facilities. Those sites included were permitted to and accepted some waste in 2002, 2003 and/or 2004.

Landfill details are found in Appendices A through D; transfer station details are found in Appendices E through G; landscape waste compost facility information is found in Appendices H through J; the contact list for local (county) solid waste planning and recycling coordinators is found in Appendix K; in Appendix L, information is found about updated local (county) solid waste plans; and information about local municipal waste generation and recycling is found in Appendix M.

Additionally, this 18th edition of the report contains a state map designed with GIS software showing locations of Illinois landfills. A Chicago Metropolitan area map also shows the locations of transfer stations in addition to the location of landfills.

## Executive Summary

**T**HIS IS THE ILLINOIS EPA'S 18TH ANNUAL REPORT describing the management of nonhazardous municipal solid waste by the state's solid waste landfills, transfer stations and compost facilities.

The report is divided into sections representing Illinois EPA administrative regions. Each regional section includes specification pages describing the chief physical characteristics of each landfill.

Provided in this report are each facility's location and hours of operation, tipping fee, quantities of wastes received for the last three years (2002, 2003 and 2004), in both gate cubic yards and gate tons; the landfill's certified remaining capacity for the last two reporting dates Jan. 1, 2004, and Jan. 1, 2005, in gate cubic yards; solid waste management fees paid to the State in 2004; the Agency Regional office or delegated local authority that inspects the facility; and the name, address and phone number of the landfill's owner and operator.

Similar, but scaled down, specification pages are included for each transfer station and compost facility. In all, this report includes details of 57 landfills, 103 transfer stations and 47 compost facilities. Any landfill, transfer station or compost site that was permitted to accept waste in 2002, 2003 and/or 2004 is included in the report. The list of active waste management facilities during 2004 includes 52 landfills, 98 transfer stations and 40 compost sites.

Illinois municipal solid waste landfills are required to report to the Illinois EPA the quantities of solid waste they receive each year, and to calculate and report the amount of remaining capacity on the first day of the following year.

During 2004, 52 landfills reported receiving a total of almost 53.8 million gate cubic yards (16.3 million gate tons) of waste. This volume was almost 3.3 million gate cubic yards less than the total received during 2003, a 5.8 percent decrease.

As of January 1, 2005, 51 landfills reported having a combined remaining capacity of almost 986.5 million gate cubic yards (more than 298.9 million gate tons), or 311.8 million gate cubic yards more than on January 1, 2004, an increase of 46.2 percent.

Dividing wastes disposed during 2004 by capacity remaining on January 1, 2005, indicates an overall landfill life expectancy in Illinois of 18 years at 2004 disposal rates and barring capacity adjustments.

New or upgraded landfills in: Region 2: Will County (Wilmington), Region 3: Tazewell County (Hopedale), and Region 7: Perry County (DuQuoin) are open. Two landfills are under development in Atkinson and Marion.

**Nonhazardous  
Solid Waste Management  
And Landfill Capacity**

**2004**

**M**UNICIPAL SOLID WASTE IS THE TERM USED TO DESCRIBE the garbage discarded by America's households, stores, offices, factories, restaurants, schools and other institutions. "Discarded" most often, in Illinois, means disposed in Agency-permitted landfills. Waste is also handled through other alternative means of solid waste management, such as recycling and composting, after it is collected.

The US EPA's *Municipal Solid Waste in the United States: 2003 Facts & Figures* says that nationwide 55.4 percent of solid waste was landfilled, 23.5 percent was recycled, 7.1 percent was composted and 14 percent was incinerated.

In 2004, Illinois landfills accepted almost 53.8 million gate cubic yards of solid waste. Most Illinois waste was discarded in landfills within our borders. Wastes entering or leaving Illinois are not believed to noticeably affect this equation. Of all solid waste landfilled in Illinois in 2004, 13 percent, or 7.2 million cubic yards or 2.2 million tons, came from 11 other states. We know this because Illinois landfills have reported these quantities on a quarterly basis to the Illinois EPA since 1992. Waste haulers are not required to report how much Illinois waste they transport to landfills in other states or from which counties in Illinois waste is transported.

## More than 8.6 million tons of municipal waste is recycled

Much of Illinois is rural and far from recycling markets. Most local governments provide recycling education and collect recycling data from haulers as a public service.

Local recycling coordinators in Illinois voluntarily reported that almost 8.6 million tons of municipal waste were recycled in 2004. Total municipal waste generated was reported at almost 23.7 million tons.

Most of the heavily populated counties in the Chicago Metropolitan and Metropolitan East St. Louis areas voluntarily report recycling and waste generation figures annually. Recycling markets and public interest in recycling are high there.

There is at present no mechanism in the State of Illinois law that requires reporting from or permitting of recycling centers that are not already considered to be transfer stations.

## What's happening in the solid waste industry in Illinois?

- ❖ 52 active landfills in 2004, and 51 reported capacity as of Jan. 1, 2005
- ❖ Two new landfills are open in Northern and Southern Illinois.
- ❖ The agricultural community is managing some landscape waste at "agronomic rates" on their farmland.
- ❖ Continued private ownership and operation of landfills in Illinois
- ❖ Waste transfer out of metropolitan Chicago area into adjacent states, and to north and central Illinois counties continues into 2004.
- ❖ More landscape and municipal waste transfer stations in Chicagoland suburbs obtain local siting and Illinois EPA permits to operate.

## 2004 Annual Report

### Topics Covered

■ Waste disposed in landfills, 2002-2004 (in gate cubic yards and in gate tons)

■ Remaining disposal capacity as of Jan. 1, 2004, and Jan. 1, 2005 (in gate cubic yards)

■ Specification pages for 57 landfills, 103 transfer stations and 47 compost sites

■ Waste generated and recycled, 2004 (in tons)

■ Waste handled by transfer stations, 2002-2004 (in tons)

■ Waste composted, 2002-2004 (in tons)

## Burn Barrels Outreach Campaign

Illinois EPA began a Burn Barrel Public Education Campaign in September 2004 with funding from US EPA. The goal of this 10-week initiative was to educate the public about the environmental hazards of burning household waste and help them find alternative disposal options. The campaign consisted of newspaper advertisements and radio spots targeted in various parts of Illinois.

Local governments, including Solid Waste & Recycling Coordinators and delegated agencies, became a great asset for us in promoting this public education campaign. Federal resources combined with State and local partnerships could influence some citizens to make better choices for waste disposal.

Two newspaper ads may include local contact information, and may be placed in local newspapers. Our web site, <http://www.Illinoisburnbarrels.org> could link to yours. Illinois EPA or US EPA brochures and fliers are also available to distribute. ♦

## State Environmental Program Fees altered as of July 1, 2003

In 2003, the Illinois General Assembly approved Governor Rod R. Blagojevich's proposal for new and increased fees for several types of environmental programs operated by Illinois EPA to implement federal and state regulations. The fees impacted a wide range of facilities, including landfills.

Those fees are authorized under Senate Bill 1903 (Public Act 93-32, signed into law on June 20, 2003), and the fees became effective on July 1, 2003, at the beginning of the state fiscal year.

Municipal waste landfill operators currently pay two fees based upon the volume of waste received each year. Both of these fees (Solid Waste Surcharge and Subtitle D Fee) were increased beginning with the waste received on July 1, 2003 and there after.

The amount of the fee depends upon the total waste volume received in a calendar year. Operators receiving more than 150,000 cubic yards of waste annually have the option of measuring waste by volume (cubic yards) or weight (tons) to decide which unit to use in calculating the fee payment. Operators that receive less than 150,000 cubic yards in a year would fall into one of four other fee payment categories (see table below).

Permit-holders are aware that failure to pay fees when they are due could result in a referral to the Attorney General's Office and potential penalties, pursuant to statute.

Additional information or assistance is available by contacting the Bureau of Land, Planning and Reporting Section at 217-785-8604.

Solid waste surcharges paid to units of local governments at this time remain the same as those described in the (Illinois) Environmental Protection Act, Section 22.15(j).

### State Solid Waste Surcharge Fees

Landfills Receiving:	now pay a solid waste fee of:	and also Subtitle D Fees
Greater than 150,000 cu. yds./yr.	\$2.00/ton or \$0.95/cy	\$0.22/ton or \$0.101/cy
Between 100,000 and 150,000 cu. yds./yr.	\$52,630	\$7,020
Between 50,000 and 100,000 cu. yds./yr.	\$23,790	\$3,120
Between 10,000 and 50,000 cu. yds./yr.	\$7,260	\$975
Less than 10,000 cu. yds./yr.	\$1,050	\$210

## Cost to build landfills require investments

Developing a landfill requires enormous investments in land and equipment totaling millions of dollars, plus engineering expenses, fees to state and local governments, taxes, typical operating costs and additional millions set aside for post-closure care. Consideration will need to be made of costs to design, build, permit, operate, and conduct post-closure care at a landfill.

Consideration of costs include those in the pre-development stage, for site development and site operation, closure and post-closure care and financial assurance.

## Landfills are developed cell by cell

Landfills are divided into sections called phases or cells, which are developed as needed, filled systematically so that specific loads of waste can be located weeks or months later, and covered with soil or other materials to prevent the spread of odors and problems with vermin.

Trucks arriving at a landfill are inspected for prohibited nonhazardous wastes and for hazardous wastes that Illinois bans from landfilling including: bulk liquids, landscape wastes, lead acid batteries, potentially infectious medical waste, used motor oil, white good components and whole used tires. Loads are weighed and details about them are recorded. They are then taken to the exposed portion of the active cell, which is known as the working face.

Trucks empty their loads at the working face, where specially designed bulldozers spread and compact the waste, crushing it to eliminate air pockets and squeezing it into the smallest space possible.

A ranking of these active facilities (Appendix C) finds the top five landfills received 43 percent of waste landfilled in Illinois. This unequal distribution of waste creates a difference between an *average* landfill, which would have accepted almost 1.0 million gate cubic yards (about 313 thousand gate tons) of waste, and a *median* landfill, which would have received about 460 thousand gate cubic yards (about 139 thousand gate tons).

## Two landfill closings affect capacity

Two landfills reached their capacity limit and closed their gates during 2003 and 2004. In Region 1: Freeport Municipal Landfill #4 ceased accepting waste in April, 2003. In Region 6: South Chain of Rocks RDF ceased accepting waste on July 23, 2004, and certified closure on June 22, 2005.

Kankakee RDF, Chebanse closed in November, 2005. Streator Area Landfill #3, Streator had an expansion under review, but chose to temporarily close in April, 2005. This report provides more details about these sites in Sections entitled Region 2 and Region 4.

## Delegated Partners Inspection Program

The Illinois EPA has delegated our inspection authority to 18 counties, the Ambraw Valley Solid Waste Agency, and Chicago. This program takes advantage of additional staff resources at the local level.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise be performed by an Illinois EPA regional field office: investigating suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. Inspections can also include nonhazardous industrial waste landfills and monofills (private facilities that do not accept municipal solid waste).

Thousands of inspections of pollution control facilities and other sites were completed by delegated partners during 2004. These efforts at the local level stimulate the regulated community to take all necessary steps to comply with environmental regulations. Also, prompt response by local authorities does much to curtail open dumping, unfortunately still a common practice throughout Illinois.

An appropriation of \$1.75 million was allocated to fund these local solid waste enforcement grant programs as of July 1, 2005. ♦

## Average Illinois Landfill, 2004

### Waste Disposed

1.0 million gate cu. yds. (about 313 thousand gate tons)

### Capacity Available

19.3 million gate cu. yds. (5.9 million gate tons)

## Gate Cubic Yards and Tons

Illinois landfills are required to report to the Illinois EPA the quantities of waste received during each calendar year. They must also calculate how much capacity remains available for future waste disposal as of Jan. 1st of the following year.

These figures are submitted to the Agency in "gate cubic yards," or the volume of waste entering the landfill's gate. Remaining capacities are expressed as *certified* gate cubic yards, meaning that calculations have been certified as true and accurate by a licensed professional engineer. These numbers are found on landfill specification pages in each of seven regional sections in this report.

The term "in-place cubic yards" is used to indicate wastes that have been compressed to a half or a third or a quarter of their original volume, depending on the degree of compaction achieved by the landfill.

Gate cubic yards can be difficult to visualize. To aid the reader, we have divided gate cubic yards by an industry standard of 3.3 to achieve approximate tons. In other words **3.3 gate cubic yards = one gate ton.**

## Acronyms Used in this Report

AKA	Also known as
CS or CF	Compost site or compost facility
CY or Cu.Yd.	Cubic Yard
LF	Landfill
LSW	Landscape waste
MRRF	Material Recycling and Recovery Facility
PPD/PCD	Pounds per person per day/Pounds per capita per day
RDF	Recycling and Disposal Facility
TPD	Tons per day
TPY	Tons per year
TS	Transfer station

### Six landfills expand, one re-opened and two are new

The table located on page 8 shows details concerning six landfills in the state that were permitted by Illinois EPA to expand in 2004. Additionally, in June 2004, Indian Creek Landfill No. 2, Hopedale, was allowed to modify its permit and re-open, although it had been inactive since the early 1990's.

Prairie View RDF opened in January 2004 in Wilmington. In March 2004, Perry Ridge Landfill opened in DuQuoin.

### US EPA's MSW Report, 2003

National solid waste data is available in the report *Municipal Solid Waste in the United States: 2003 Facts & Figures* that was published in April 2005. The report is found on-line at <http://www.epa.gov/msw/msw99.htm> by searching for report number EPA530-F-05-003. This report contains information about waste generation. It categorizes the municipal solid waste stream by waste type. The report's executive summary is abstracted below.

## National Figures for 2003 Reported by US EPA<sup>1</sup>

Number of municipal solid waste landfills in the US (2002)		1,767	
Average number of landfills per state		35	
	<b>Million Tons</b>	<b>Percent</b>	<b>PPD<sup>2</sup></b>
Waste generated	236.2	100%	4.45
Waste recycled and composted	72.3	30.6%	1.36
Waste recycled	55.4	23.5%	1.04
Waste composted	16.9	7.1%	0.32
Waste landfilled and combusted	163.9	69.4%	3.09
Waste landfilled	130.8	55.4%	N/A
Waste combusted	33.1	14.0%	N/A

<sup>1</sup> Source: *Municipal Solid Waste in the United States: 2003 Facts & Figures*, US EPA Office of Solid Waste and Emergency Response, April 2005

<sup>2</sup> PPD = Pounds Per Person Per Day

## Waste imported into Illinois in 2004 from 11 other states

Illinois regional waste disposal and landfill capacities are shown on a per capita basis in the table on the bottom of page six. Chicago Metropolitan Region has the lowest remaining capacity per capita. There is a moratorium against landfills within Chicago's city limits and land prices have high values. Waste generated by Chicago Metropolitan region's population then becomes a state-wide problem, and also affects available capacity at the landfills in adjacent states of Indiana and Wisconsin.

Siting of new landfills or expansion of existing landfills in Northwest and Central Illinois might help alleviate this situation.

Indiana Department of Environmental Management (IDEM), Indianapolis reported in its *2003 Summary of Indiana Solid Waste Facility Data* that 73 percent of waste imports came from 24 Illinois counties. Almost 831,010 tons of Illinois waste were imported into Indiana in 2003. The amount of Illinois waste disposed of in Indiana in 2003, declined by 545,231 tons or was 29.6 percent less than the amount reported in 2002.

Illinois waste in 2003 was sent to 11 landfills or six transfer stations or one incinerator in these 14 Indiana counties for disposal: Fulton, Greene, Hendricks, Knox, Lake, Marion, Newton, Pike, Porter, Putnam, Vanderburgh, Vermilion, Vigo and White.

Cook County, Illinois in 2003 sent to Indiana's landfills and transfer stations 528,391 tons of waste, that is 63.6 percent of the waste imports to Indiana.

Indiana's 2003 report is available on-line at [www.in.gov/idem/land](http://www.in.gov/idem/land) or contact Ms. Michelle Weddle, Project Coordinator, IDEM at 317-233-4624 if there are questions.

Any limits to out-of-state waste disposal in other states, or capacity shortages, would put pressure on Chicago Metropolitan area waste management systems and could cause a local shortage in landfill disposal capacity.

## State of Origin of Wastes Received at Illinois Landfills in 2004<sup>1</sup>

Thirteen percent of all solid waste landfilled in Illinois in 2004 is 7.2 million gate cubic yards (2.2 million tons). This is the amount which was imported from out-of-state. Waste haulers are not required to report how much Illinois waste they transport to landfills in other states or from which counties (in Illinois) waste is transported.

Most states exporting waste to Illinois are neighbors of Illinois and share its borders.

State of Origin	Cu. Yds.	Percent
Missouri	5,577,200	77%
Iowa	1,231,812	17%
Indiana	203,180	2%
Wisconsin	191,494	2%
Kentucky	13,127	1%
Other States <sup>2</sup>	<u>23,517</u>	<u>1%</u>
Total	7,240,330	100%

<sup>1</sup> Twenty-seven Illinois landfills accepted waste from 11 other states in 2004.

<sup>2</sup> Arkansas, Kansas, Michigan, Minnesota, Nebraska and Tennessee

## Illinois Landfills: Waste Accepted in 2004 Versus 2003

Region	Landfills Accepting Waste 2004 <sup>1</sup>	Waste Accepted, Gate Cu. Yds.		Yearly Change		2004 Waste Share of State Total
		2004 <sup>2</sup>	2003 <sup>3</sup>	Cu. Yds.	Percent	
One: Northwestern Illinois	7	12,317,877	12,631,640	- 313,763	- 2.5	22.9
Two: Chicago Metropolitan	10	11,918,357	12,402,321	- 483,964	- 3.9	22.2
Three: Peoria/Quad Cities	9	4,521,285	4,357,705	+ 163,580	+ 3.8	8.4
Four: East Central Illinois	9	11,810,022	14,653,759	- 2,843,737	-19.4	22.0
Five: West Central Illinois	5	1,925,322	1,849,110	+ 76,212	+ 4.1	3.6
Six: Metropolitan East St. Louis	6	9,201,085	9,165,066	+ 36,019	+ 0.4	17.1
Seven: Southern Illinois	6	2,060,922	1,990,192	+ 70,730	+ 3.6	3.8
<b>Totals</b>	<b>52</b>	<b>53,754,870</b>	<b>57,049,793</b>	<b>- 3,294,923</b>	<b>- 5.8</b>	<b>100</b>

<sup>1</sup> Includes facilities that accepted municipal waste for less than one complete calendar year.

<sup>2</sup> Includes 7,240,330 cubic yards of out-of-state waste (13% of state total) accepted by 27 Illinois landfills during 2004.

<sup>3</sup> Includes 6,206,855 cubic yards of out-of-state waste (11% of state total) accepted by 25 Illinois landfills during 2003.

## Illinois Landfills: Remaining Capacities Jan. 1, 2005 Versus Jan. 1, 2004

Region	Landfills Reporting Capacity 1-1-05	Reported Capacity, Gate Cu. Yds.		Yearly Change		Capacity Share of State Total
		1-1-05	1-1-04	Gate Cu. Yds.	Percent	
One: Northwestern Illinois	7	193,613,000	150,019,000	+ 43,594,000	+ 29.1	19.6
Two: Chicago Metropolitan	10	130,133,000	59,755,000	+ 70,378,000	+ 117.8	13.2
Three: Peoria/Quad Cities	9	203,304,000	179,875,000	+ 23,429,000	+ 13.0	20.6
Four: East Central Illinois	9	172,131,000	63,128,000	+ 109,003,000	+ 172.7	17.4
Five: West Central Illinois	5	50,645,000	53,924,000	-3,279,000	- 6.1	5.1
Six: Metropolitan East St. Louis	5	117,050,000	124,149,000	-7,099,000	- 5.7	11.9
Seven: Southern Illinois	6	119,597,000	43,791,000	+ 75,806,000	+ 173.1	12.1
<b>Totals</b>	<b>51</b>	<b>986,473,000</b>	<b>674,641,000</b>	<b>+ 311,832,000</b>	<b>+ 46.2</b>	<b>100</b>

### Landfills Opening in 2004

Prairie View Recycling and Disposal Facility, Wilmington and Perry Ridge Landfill, DuQuoin opened in January and March 2004.

Six additional landfills expanded in 2004, and one landfill was upgraded and re-opened.

### Capacity gain of 46.2 percent documented on Jan. 1, 2005

In a year that brought a 46.2 percent increase in landfill capacity, five of seven regions reported increases ranging from 13 percent to 173.1 percent.

The table below compares landfill remaining capacities in “snapshots” taken Jan. 1, 2004, and Jan. 1, 2005. Capacity increases of 173.1 percent and 172.7 percent in Southern Illinois and East Central Illinois respectively, were the highest increases.

Capacity was boosted by two new landfills (Prairie View Landfill, Wilmington and Perry Ridge Landfill, DuQuoin), six expansions and one upgraded landfill (Indian Creek Landfill #2, Hopedale).

## Waste Disposed and Landfill Capacity Per Capita; Landfill Life Expectancy

Region	Estimated Population	Waste Disposed, Cu. Yds. <sup>1</sup>		Remaining Capacity, Cu. Yds.		Landfill Life Years <sup>2</sup>
		2004	Per Capita	Jan. 1, 2005	Per Capita	
One: Northwestern Illinois	818,578	12,317,877	15.0	193,613,000	236.5	16
Two: Chicago Metropolitan	13,398,453	11,918,357	0.9	130,133,000	9.7	11
Three: Peoria/Quad Cities	760,824	4,521,285	5.9	203,304,000	267.2	45
Four: East Central Illinois	863,227	11,810,022	13.7	172,131,000	199.4	15
Five: West Central Illinois	562,749	1,925,322	3.4	50,645,000	90.0	26
Six: Metropolitan East St. Louis	710,514	9,201,085	12.9	117,050,000	164.7	13
Seven: Southern Illinois	435,482	2,060,922	4.7	119,597,000	274.6	58
<b>Totals</b>	<b>17,549,827</b>	<b>53,754,870</b>	<b>3.1</b>	<b>986,473,000</b>	<b>56.2</b>	<b>18</b>

<sup>1</sup> Amounts reported in gate cu. yds.

<sup>2</sup> Remaining capacity divided by waste disposed. Tells how long a region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

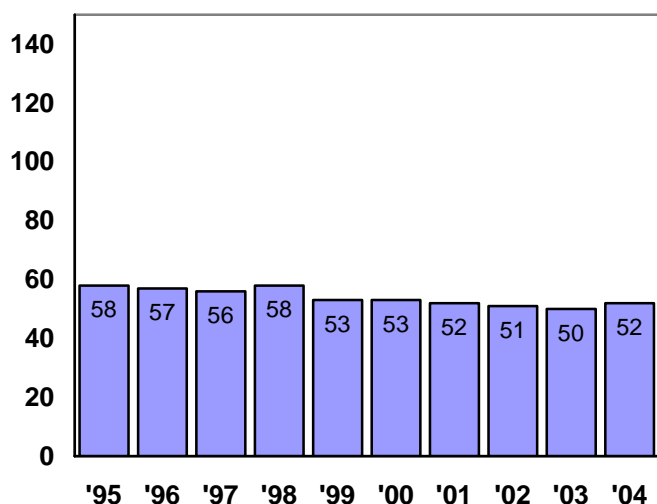

## Statewide Landfill Capacity is Abundant Despite Same Number of Facilities

At the end of each year, Illinois landfill operators calculate how much waste they will be able to accept in the future. This volume is known as remaining or available capacity, and is expressed in gate cubic yards, meaning waste received at the landfill's gate before it is compacted. One industry rule of thumb says 10 gate cubic yards of waste can be compressed into five compacted cubic yards. Obviously, the greater the compaction, the more waste can be buried.

In 2004, 52 landfills reported accepting 53.8 million gate cu. yds. of waste from Illinois counties and 11 other states besides Illinois. The 986.5 million cubic yards of available capacity allows for 18 years of landfill life.

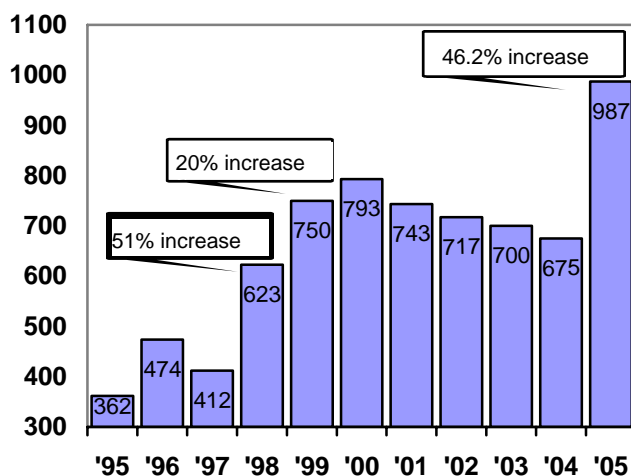

### Tight Regulations Force Cutbacks

Active landfills accepting waste each year

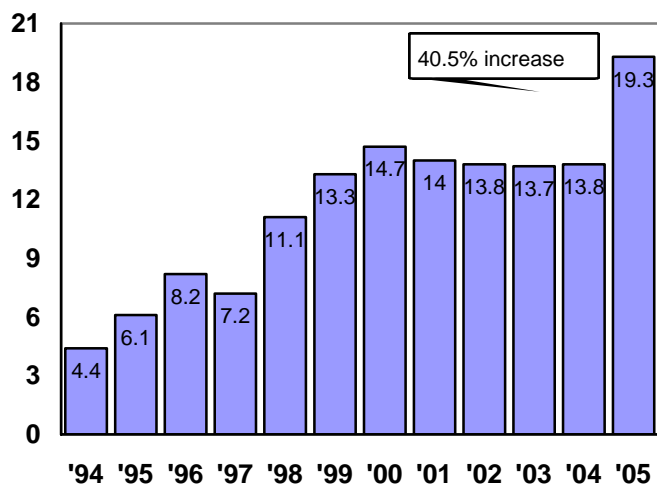

### Pushing Survivors to Build Capacity

Available landfill space, millions of gate cubic yards

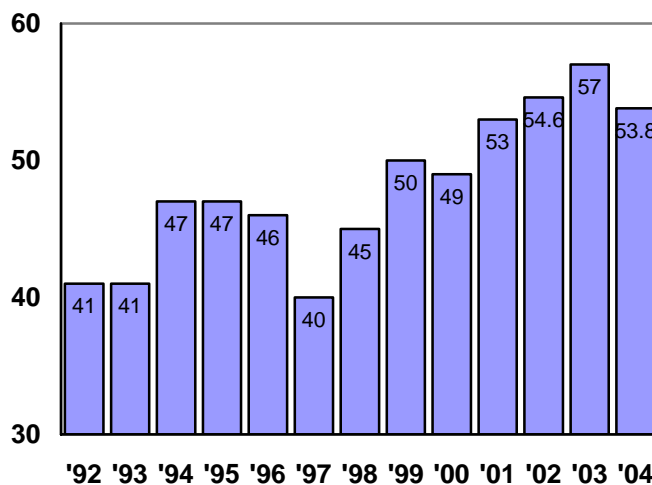

### Average Landfill Capacity Increases

Millions of gate cubic yards

### While Disposal Rates Remained Constant

Wastes landfilled, millions of gate cubic yards

## New Facilities Permitted to Expand or be Upgraded in 2004

Region	Landfill	Municipality	Opening Date	Details	Design Airspace (cu. yds.) <sup>1</sup>
One: Northwestern Illinois	Onyx Orchard Hills Landfill Inc.	Davis Junction	7-26-04	40.5 ft. Vertical & 76 ac. Horizontal Expansion	19,628,655
One: Northwestern Illinois	Winnebago Rec. Svs.	Rockford	4-27-04	N & S Unit Vertical & Horizontal Expansion	1,798,840
Three: Peoria/Quad Cities	Envirofil of Illinois Inc.	Macomb	4-20-04	57 ac. Horizontal/ 19 ac. Vertical	9,250,000
Three: Peoria/Quad Cities	Indian Creek LF No. 2	Hopedale	6-30-04	Significant Modification 36.27 ac.	2,661,136
Four: East Central Illinois	Livingston Landfill	Pontiac	10-8-04	207 ac. Horizontal & 75 ft. Vertical Expansion	50,500,000
Seven: Southern Illinois	Saline County Landfill	Harrisburg	8-19-04	Unit 2, Lateral Expansion 28.9 ac.	3,113,575
Seven: Southern Illinois	Southern IL Regional Landfill	DeSoto	7-2-04	South Unit, Lateral Expansion 143.3 ac.	20,600,000
<b>Total</b>					<b>107,552,206</b>

<sup>1</sup> Includes space for waste, intermediate or daily cover and capacity (in-place cubic yards)

### Municipal Waste Management Plans and Plan Updates

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Every five, 10 and 15 years, each plan must identify changes in planning areas, evaluate progress in the plan implementation and, if necessary, revise plan recommendations and goals. A county also has the option of updating its solid waste generation data. The plan is then submitted to Illinois EPA for review and comment.

Questions concerning these plans should be directed to the appropriate local administrators listed in Appendix K of this report. Due dates for submitting plan updates to Illinois EPA are found in Appendix L.

Contact Ellen Robinson for more information about this requirement of state law at 217-785-8604. ♦

### Municipal waste management in Illinois: 2004

Landfilling continues to play the largest role in the handling of municipal waste in Illinois. It is estimated that 64.3 percent was landfilled in 2004. Waste data collected from landfills (almost 16.3 million tons), compost sites (387,645 tons), and the amount reported as recycled by local recycling coordinators (about 8.6 million tons) were added together and percentages for each were calculated.

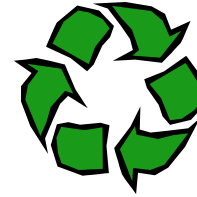

Waste generation, as calculated by recycling coordinators, does not include the composted amounts managed by homeowners, or incineration for volume reduction using burn barrels. The amount reported does not include landscape waste applied on to farm ground at agronomic rates. No waste was burned in commercial municipal waste incinerators in Illinois during 2004.

Municipal waste management then, computes to the following rates: landfilling: 64.3 percent; recycling: 34.1 percent and composting: 1.5 percent. These figures are outlined below in a pie chart.

## Recycling information is county-based

Illinois EPA does not have a list of recycling coordinators for each community in Illinois, and we are not informed about the type of recycling programs they have. County solid waste coordinators are asked to voluntarily give Illinois EPA a list of items that are included in their recycling program, however.

Contact information for recycling coordinators from the counties is available on-line at <http://www.illinoisrecycles.com>. In Illinois, 102 counties and the City of Chicago are required under the Solid Waste Planning and Recycling Act to be responsible for solid waste management issues within their jurisdiction.

### Municipal Waste Generated & Recycled

Region	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD <sup>1</sup>	Tons	Percent
One: Northwestern Illinois	818,578	877,642	5.9	217,593	24.8
Two: Chicago Metropolitan	13,398,453	19,315,779	7.9	7,620,661	39.5
Three: Peoria/Quad Cities	760,824	940,722	6.8	259,092	27.5
Four: East Central Illinois	863,227	1,068,748	6.8	213,244	20.0
Five: West Central Illinois	562,749	470,497	4.6	108,575	23.1
Six: Metropolitan East St. Louis	710,514	622,953	4.8	166,788	26.8
Seven: Southern Illinois	435,482	390,403	4.9	56,976	14.6
<b>Total</b>	<b>17,549,827</b>	<b>23,686,744</b>	<b>7.4</b>	<b>8,642,929</b>	<b>36.5</b>

<sup>1</sup> PCD = Pounds per capita per day.

### State Solid Waste and Recycling Grants

The Illinois Department of Commerce and Economic Opportunity (DCEO), Bureau of Energy and Recycling issues a number of state grants to governments, not-for-profit organizations and businesses.

For information about state grant programs promoting recycling, view their program information at [www.illinoisrecycles.com](http://www.illinoisrecycles.com).

## On-Farm Composting Facilities

In rural areas, farming provides an outlet to manage landscape waste through the (Illinois) Environmental Protection Act's provisions for on-farm composting and its exemption from permitting, provided the site meets all Section 830.106 a) and b) requirements including:

- The site where composting is done must be located on property farmed by the person operating the composting facility. The farm acreage used for the composting process cannot be more than two percent of the property's acreage.
- The compost site, and the land where the compost is to be used, shall be "principally and diligently devoted to the production of agricultural crops".
- The land used and the farmer shall not be associated with a waste hauling company, or a generator of non-agricultural compost materials (a tree trimming business, nursery, cemetery or utility company). If the farmer is paid to haul the landscape waste to the site, he would not be qualified for the exemption.
- The compost needs to be used on the farm within 18 months after completion of composting.
- The compost site and use area must meet required setbacks from wells (200 feet), nearest residence (one-fourth mile) and groundwater (five feet). They cannot be within the 10-year flood plain, or have more than 10 occupied non-farm homes within one-half mile.
- The farmer needs to register the site with the Illinois EPA, and submit an annual report.
- The standards of 35 Ill. Adm. Code, Section 830.106 and minimum performance standards of 830.202 apply, that includes controlling odors, processing waste within five days, run-off and run-on control and windrow construction.

## Composting increased by 5.7 percent

Landscape wastes were banned from Illinois landfills beginning July 1, 1990. Increased amounts of landscape wastes are being handled by permit-exempt farms.

In 2004, the State's 40 compost facilities processed 387,645 tons of landscape waste, a 5.7 percent increase from 2003's total of 366,571 tons handled at 38 sites.

Seventeen compost sites are located in the Chicago Metropolitan area. Six compost sites are located in the Metropolitan East St. Louis area.

More than one-fourth of the landscape waste collected in 2004 was managed at the top two compost sites: BFI Modern Landfill Compost Facility Site #2, Belleville, operated by St. Louis Composting and Thelan Sand & Gravel Site #1, Antioch.

### Compost Facilities: Waste Handled in 2004

Region	Active Facilities	Tons
One: Northwestern Illinois	5	41,545
Two: Chicago Metropolitan	17	191,185
Three: Peoria/Quad Cities	5	25,720
Four: East Central Illinois	4	26,816
Five: West Central Illinois	1	13
Six: Metropolitan East St. Louis	6	100,990
Seven: Southern Illinois	2	1,376
<b>Total</b>	<b>40</b>	<b>387,645</b>

Six facilities in Illinois accept organic materials for composting.

### Compost Facilities Accepting Organics: 2004

Site Name	County	Municipality
Eldon Steidinger Farm	Livingston	Strawn
Excel Corporation	Cass	Beardstown
ISU Farm Compost	McLean	Lexington
LHF Compost Inc.	Peoria	Peoria
Rare Earth Diversified Services	Bureau	Walnut
Thelan Sand & Gravel #3	McHenry	Antioch

## Land application of landscape waste

Landscape waste may also be managed by land application in Illinois in accordance with Section 21(q)(2) of the (Illinois) Environmental Protection Act. Application must not exceed 20 tons per acre per year. No figures are available for this disposal practice.

## Transfer station and recycling center regulations proposed

The Agency has proposed developing regulations for recycling centers and specific regulations for transfer stations. The Illinois Pollution Control Board web site <http://www.ipcb.state.il.us> has more details about the status of the rule-making process.

### Transfer Stations: Waste Handled in 2004

Region <sup>1</sup>	Facilities	Tons
One: Northwestern Illinois	6	156,519
Two: Chicago Metropolitan	68	7,204,061
Three: Peoria/Quad Cities	4	14,367
Four: East Central Illinois	8	99,550
Five: West Central Illinois	3	165,000
Six: Metropolitan East St. Louis	5	126
Seven: Southern Illinois	4	120
<b>Total</b>	<b>98</b>	<b>7,639,743</b>

<sup>1</sup> Each region contains active sites that did not voluntarily report amounts of waste accepted.

In 2004, 52 of the 98 active transfer stations (53 percent) voluntarily reported handling 7.6 million tons of trash, or 14.2 percent of waste landfilled statewide.

The Agency requested data from transfer stations, but 46 of the facilities chose not to voluntarily return the survey; so it is assumed that transferred amounts of waste are under-represented in this report.

We do know which transfer stations were actively accepting waste, because they are inspected on a regular basis by our Field Operations staff and the delegated partners. Over the next decade, the number of transfer stations can be expected to increase, as will the amount of waste they will handle.

### Uses for scrap tires explored in Resource Conservation Challenge action plans in several States

- Tire derived aggregate is useful in many civil engineering applications, such as road construction and landfill remediation.
- Ground rubber applications include recycling the rubber into new products, playground, and sports surfacing.
- Rubberized asphalt is a more safe, durable, and quiet alternative for roads, than is conventional asphalt.
- Tire derived fuel can be used as a supplement or replacement to fossil fuels in approved devices with proper controls.

## Resource Conservation Challenge (RCC) has Multi-faceted Goals

This initiative has three primary objectives:

- 1) to prevent pollution and promote recycling and reuse of materials;
- 2) to reduce the use of toxic chemicals; and
- 3) to conserve energy and materials.

The Scrap Tire Workgroup of the RCC works on issues related to scrap tire management, clean-up and market development. There are several committees that consist of representatives from various State environmental Agencies, industry, US EPA and those academics having expertise in scrap tire management, market development and application technologies. These committees include goals, tire-derived fuel, civil engineering, rubberized asphalt and ground rubber.

Action plans were developed to:

- divert 85 percent of newly generated scrap tires to reuse, recycling or energy recovery by 2008 (vs. 70% in 2003) and
- reduce by 55 percent the number of tires (270 million in 2003) in existing stockpiles by 2008.

### Diversion of scrap tires to reuse, recycling or energy recovery

The best solution to divert scrap tires from tire piles and landfills consists of finding strong and diverse markets. About 290 million scrap tires are generated in the United States each year, so any major market disruption will cause a significant increase in tire piles and an increase in the number of tires that are disposed in landfills. More diverse recycling and re-use markets are needed to accommodate for market fluctuations.

### Reduction of tire piles/stockpiles

Tire pile cleanup is principally achieved by supporting State tire pile clean-up programs already in place. In addition, the topics of ground rubber, civil engineering applications, rubberized asphalt and Tire Derived Fuel will be thoroughly explored.

### Future Projects

Sixteen distinct projects are planned that will collectively achieve the overall goals for diversion of scrap tires to reuse, recycling or energy recovery and stockpile reduction. Some steps will need to be modified in order to react to developing situations before and after 2008.

For more information about used tire management, contact Todd Marvel, Bureau of Land, at 217-785-8604. ♦

## **Changes in the (Illinois) Environmental Protection Act affect clean construction and demolition debris handling**

Amendments to the Act have changed the way clean construction and demolition debris (CCDD) will be handled at some sites. The definition of general construction or demolition debris (Section 3.160) was modified and two new sections, 22.51 & 22.52, were added to the Act.

Part of the definition of general construction and demolition debris regarding concrete without protruding rebar was modified. Concrete with protruding rebar is now considered to be CCDD if it is processed for return into the economic mainstream (recycled), within four years of its generation or used as a fill material outside of a setback zone within 30 days of its generation.

Section 22.51 requires that operations using CCDD in a current or former mine, quarry, or excavation obtain a permit by July 1, 2008. Until then, these operations must apply for interim authorization from the Agency prior to utilizing the material. Until further regulations are adopted, incoming loads must be screened for volatile organic compounds (VOC's) using a photo-ionization detector or similar device. The operators are also required to keep records of the site of origin of the CCDD.

Section 22.52 prohibits certain individuals from being involved in waste disposal operations or CCDD projects. The Governor, Attorney General, Director of the Illinois EPA, the Chairman and members of the Pollution Control Board are prohibited from having a financial interest in a waste disposal operation or CCDD site, or corporate entities involved in these operations. This prohibition extends to members of their staffs involved in regulatory or permitting decisions and their family members. Certification of compliance with this Section is required in the application for interim authorization.

The form used to request interim authorization may be found at <http://www.state.il.us/land>. ♦

## **Permitting requirements of Illinois EPA**

New landfills or landfill expansions cannot be built unless the Bureau of Land issues a permit. Issuance of a Bureau of Air permit to a landfill identifying it as a potential new source of air pollution must also be obtained.

An initial completeness review of a permit application normally takes 30 days. If omissions are found, the application is rejected as incomplete. The applicant then has 35 days to provide additional information to make an application complete. Once an application is found to be complete, technical reviews are conducted.

### **Approval or denial of permit applications**

During the review period, comments are solicited from Bureau of Land's Regional Office, Groundwater Assistance Unit and the Solid Waste Unit. After review of the application, the addenda, and comments from public officials, the general public and the regional office, final action is ready to be taken.

If the reviewers have found the application to completely adhere to applicable environmental regulations, the permit is approved outright or with special conditions. If the application is deficient, the Permit Section denies the permit.

Rather than sending out a formal denial letter, the reviewer prepares a draft denial letter which explains the areas in the application that are deficient. The applicant has a choice of either providing some additional information in the form of an addenda to the original application or asking the reviewer for a formal denial that could be appealed to the Illinois Pollution Control Board. Additional information is usually provided. Approval or denial of a permit application takes 180 days, unless an extension is granted.

If the application is denied, an owner/operator could submit a new application, appeal the Agency's denial of the permit through the Illinois Pollution Control Board or they could abandon the project. Most applicants choose to submit a new application, starting the 180-day process over again.

Permits for landfills contain detailed requirements for the design, construction, capacity and operation of the landfills. They also contain stringent requirements for monitoring the groundwater beneath and around the landfill to detect releases from the landfill that would adversely impact the quality of the groundwater. Finally, the permit contains detailed requirements to properly "close" the landfill once it has been filled to permitted capacity and to provide for proper care of the landfill after it has been closed.

Periodically, the owner/operator of a landfill must modify the facility's permit. These modifications may address many things, including changes in construction and/or operational practices; construction of cells within the permitted landfill boundaries; and groundwater monitoring issues.

This report documents significant permit actions. However, only those permit actions which change the items mentioned in the “Facility Facts” section of the landfill specification pages are acknowledged. Footnotes on each facility specification page show permit actions made during 2002, 2003 and 2004. On page eight of the Introduction there is a chart entitled “New Facilities Permitted to Expand or be Upgraded in 2004,” that presents more details on vertical or horizontal (lateral) expansions.

For more information about items discussed in this report, submit a Freedom of Information Act (FOIA) request on-line. Please be very specific in your request for information and include the site’s identification number, if possible. Go to <http://www.epa.state.il.us> to make a FOIA request.

### **Closure and post-closure care period**

Once a landfill has received its permitted volume of waste, it must be “closed” in accordance with an approved plan and with Illinois landfill regulations. Proper closure of a landfill includes establishing a proper grading plan to allow for precipitation to run off the landfill; constructing a final cover over the waste to minimize the amount of precipitation that can infiltrate the landfill; establishing a vegetative cover system over the final cover system to minimize erosion; and finalizing the gas and leachate management systems to ensure that gas and leachate generated in the landfill after the landfill is closed are properly managed.

After a landfill has been properly closed, it must then receive at least 30 years of post-closure care. Proper post-closure care includes maintaining the vegetative cover to ensure it does not erode; monitoring the groundwater to ensure there have been no releases due to the landfill; and removing the gas and leachate generated in the landfill to ensure that they do not have adverse impacts on the area surrounding the landfill.

Closure activities, depending on the site, may include: capping the landfill; installing monitoring devices if they are not already in place; providing topsoil, seeding, and mulching as necessary; and possibly converting the land for follow-up use. Routine post-closure care continues for 30 years after the landfill closure certification is approved and includes maintaining the surface cover; monitoring gas produced; flaring or collecting any gas; monitoring, pumping and transporting any leachate; and monitoring groundwater. Cost estimates for both closure and post-closure care must be based on an engineering estimate of the cost for a third party to perform the necessary work and maintenance. Financial assurance is also required for corrective action measures, such as remediation of groundwater contamination.

## **Financial Assurance Requirements**

Funding for landfill closure, post-closure maintenance and corrective action must be provided by the landfill owners and operators, ensuring costs are not borne by taxpayers. Many different mechanisms are available to help landfill owners prove now that they will be able to pay later.

Financial assurance mechanisms for landfill closure and long-term care fall into three broad categories: cash-in-hand, trust funds or escrow accounts; third-party insurance, including letters of credit and surety bonds; and various types of self-insurance. Self-insurance can include a financial test, a guarantee by a parent corporation or government entity, or deferred funding in the form of pledge of revenues. The state can further determine which mechanisms are allowable for publicly and privately owned landfills and how landfill owners and operators must provide accounting.

Closure and long-term cost estimates are revisited annually for active landfills. For those which closed under Part 807 regulations, review takes place every two years. Costs are updated based upon the remaining post-closure care period and adjusted for inflation. The funds available must be adequate to cover the projected costs.

For more information about Illinois regulations regarding financial assurance for landfills, contact Greg Bouillon, Bureau of Land, at 217-785-8604. ♦

## Solid Waste Landfill Terms Defined

**Closure:** procedure that a solid or hazardous waste management facility undergoes to cease operations and ensure protection of human health and the environment for the future.

**Final Cover System:** the materials or layers (i.e., erosion/vegetative layer, infiltration/barrier layer or drainage layer) installed over the top of a closed landfill to minimize infiltration and erosion.

**Leachate:** any liquid, including any suspended components in the liquid, which percolates through or is drained from waste.

**Operation & Maintenance:** activities conducted at a site to ensure that the treatment and containment system is functioning properly. This may include: grading; seeding and mowing the vegetative layer; monitoring and repairing gas and leachate collection systems; treating collected leachate; groundwater monitoring and maintaining; and repairing the physical integrity of drainage control structures.

**Response Action:** an action taken to reduce or control risks to human health and the environment.

**Site Investigation:** a study designed to gather data needed to determine the nature and extent of contamination. ◆

## Thirty-three abandoned landfills targeted for clean-up

In March 1999, the Illinois General Assembly appropriated \$50 million to clean up 33 abandoned landfills located in 21 counties throughout the state. Although these landfills stopped accepting waste, they were not properly closed. Resulting risks may include contaminated drinking water; surface water pollution from run-off; odors and dead vegetation from methane accumulation; presence of vectors and other rodents; exposure to pathogens; exposure to hazardous materials present in exposed refuse; infectious wastes or hazardous substances present in the exposed refuse; and/or landslides due to differential settling or unstable slopes.

The corrective action at these landfills includes pumping of accumulated leachate; constructing an impermeable cover; grading and slope stabilization; and seeding of vegetation for erosion control. Several years of post-corrective care will also be necessary for maintenance and monitoring.

After corrective action is complete, as many as 12 of these abandoned landfills may be available for use as green space using native vegetation, or serve municipal functions as city garages or parking lots.

Five years later, in 2004, 81 percent of the \$50 million available allotted to clean up the 33 abandoned landfills has been spent. In 2004, construction began at Delta Regional Landfill, Mounds. Site investigations were conducted at Dowty Landfill, Lawrenceville; Ocoya Sanitary Landfill, Ocoya; Bishop Landfill, Litchfield; and Morrison City Dump, Morrison. Operation and maintenance activities continued at Carlinville Landfill, Carlinville; Western Lion and Service Disposal Landfills, Mattoon; Steagall Landfill, Galesburg; Multi-County Landfill, Villa Grove; Waste Hauling Landfill, Decatur; Bath Landfill, Decatur; Paxton II Landfill, Chicago; Lewis Landfill, Beardstown; Chicago Heights Refuse Depot, Chicago Heights; Prior 1,2,3,4, Centralia; Prior-Blackwell, Centralia; Centralia Environmental Services Landfill, Centralia; Bi-State Disposal, Belleville; Anna Municipal, Anna; and H & L Disposal, Danville.

The Illinois EPA will make every effort to recover the State's corrective action costs from responsible parties.

For more information: a report entitled [Abandoned Landfill Book \(42 pages\)](#) is available at <http://www.epa.state.il.us/land/>; (click on clean-up programs, state response action program, publications) or contact State Response Action Program Acting Manager, Neelu Lowder at 217-782-6761.

## Landfill liner study and engineering education for Illinois EPA staff

Illinois EPA's Bureau of Land, Permit Section, wrote some recommendations in January 2003 for the 92nd General Assembly in fulfillment of House Resolution 715.

"A Study of the Merits and Effectiveness of Alternate Liner Systems at Illinois Landfills" is outlined on our web site. Methodology and conclusions reached, as well as the entire report, can be accessed at [www.epa.state.il.us/land/publications/#solid-waste-permits](http://www.epa.state.il.us/land/publications/#solid-waste-permits).

In addition, Illinois EPA has provided civil engineering training for its staff. Topics included landfill liquid management, landfill gas emissions, slope stability and slope failures, and geotechnical engineering analysis. These classes were taught by civil engineering professors from Clemson University, Clemson, South Carolina, and University of Illinois, Urbana.

## Nonhazardous Solid Waste Management and Landfill Capacity in Illinois: 18th Annual Report (2004)

Section 4 of the Illinois Solid Waste Management Act requires the Agency to "publish a report regarding the projected disposal capacity available for solid waste in sanitary landfills. . . . Such reports shall present the data on an appropriate regional basis. . . [and] shall include an assessment of the life expectancy of each site."

This legislative mandate explains why the main body of this report is organized by seven Illinois EPA administrative regions, and why landfill capacity and life expectancy are emphasized in nearby tables and charts, and in text, tables, map symbology and landfill specification pages in the regional sections.

Other states which write a report similar to this are Florida, Indiana, Washington and Virginia. For more information contact Peter Gorer, Florida Dept. of Environmental Protection at 850-487-9532; Michelle Weddle, Indiana Dept. of Environmental Management at 317-233-4624; Ellen Caywood, Washington Dept. of Ecology at 206-459-6259; and John Ely, Virginia Dept. of Environmental Quality at 804-698-4249.

## Conclusion

Our state-wide analysis of solid waste management is now concluded.

For more details about solid waste management throughout the seven Illinois EPA administrative regions of Illinois, see the body of the document on pages R1.1 through R7.16.

The Appendices also contain supporting documentation that will prove to be very useful to those interested in these facilities. ♦♦

## How to Check Status of Bureau of Land Permit Applications on the Internet

Once the Agency receives a permit application, the Bureau of Land, Permit Section (Section) proceeds with a technical review. One of the databases available to everyone on the Internet is the Solid Waste Unit's web database search. With this database, one can determine the status of permit applications that have been submitted, and who the permit reviewer is.

A Solid Waste Unit web database search located at <http://epadata.epa.state.il.us/land/solidwaste> is designed to inform the public about applications submitted, or permits obtained from the Bureau of Land (BOL). The Section issues permits for the management of non-hazardous waste at landfills, transfer stations, compost, and waste storage, treatment, processing, and recovery facilities. On the search results page, the log number is linked to a brief description of the application. The main identifiers for applications are:

1. the official BOL name of the site
2. the closest city to the site
3. the county where the facility is located
4. the application's log number and
5. the site number: a 10-digit number that is unique to each specific facility.

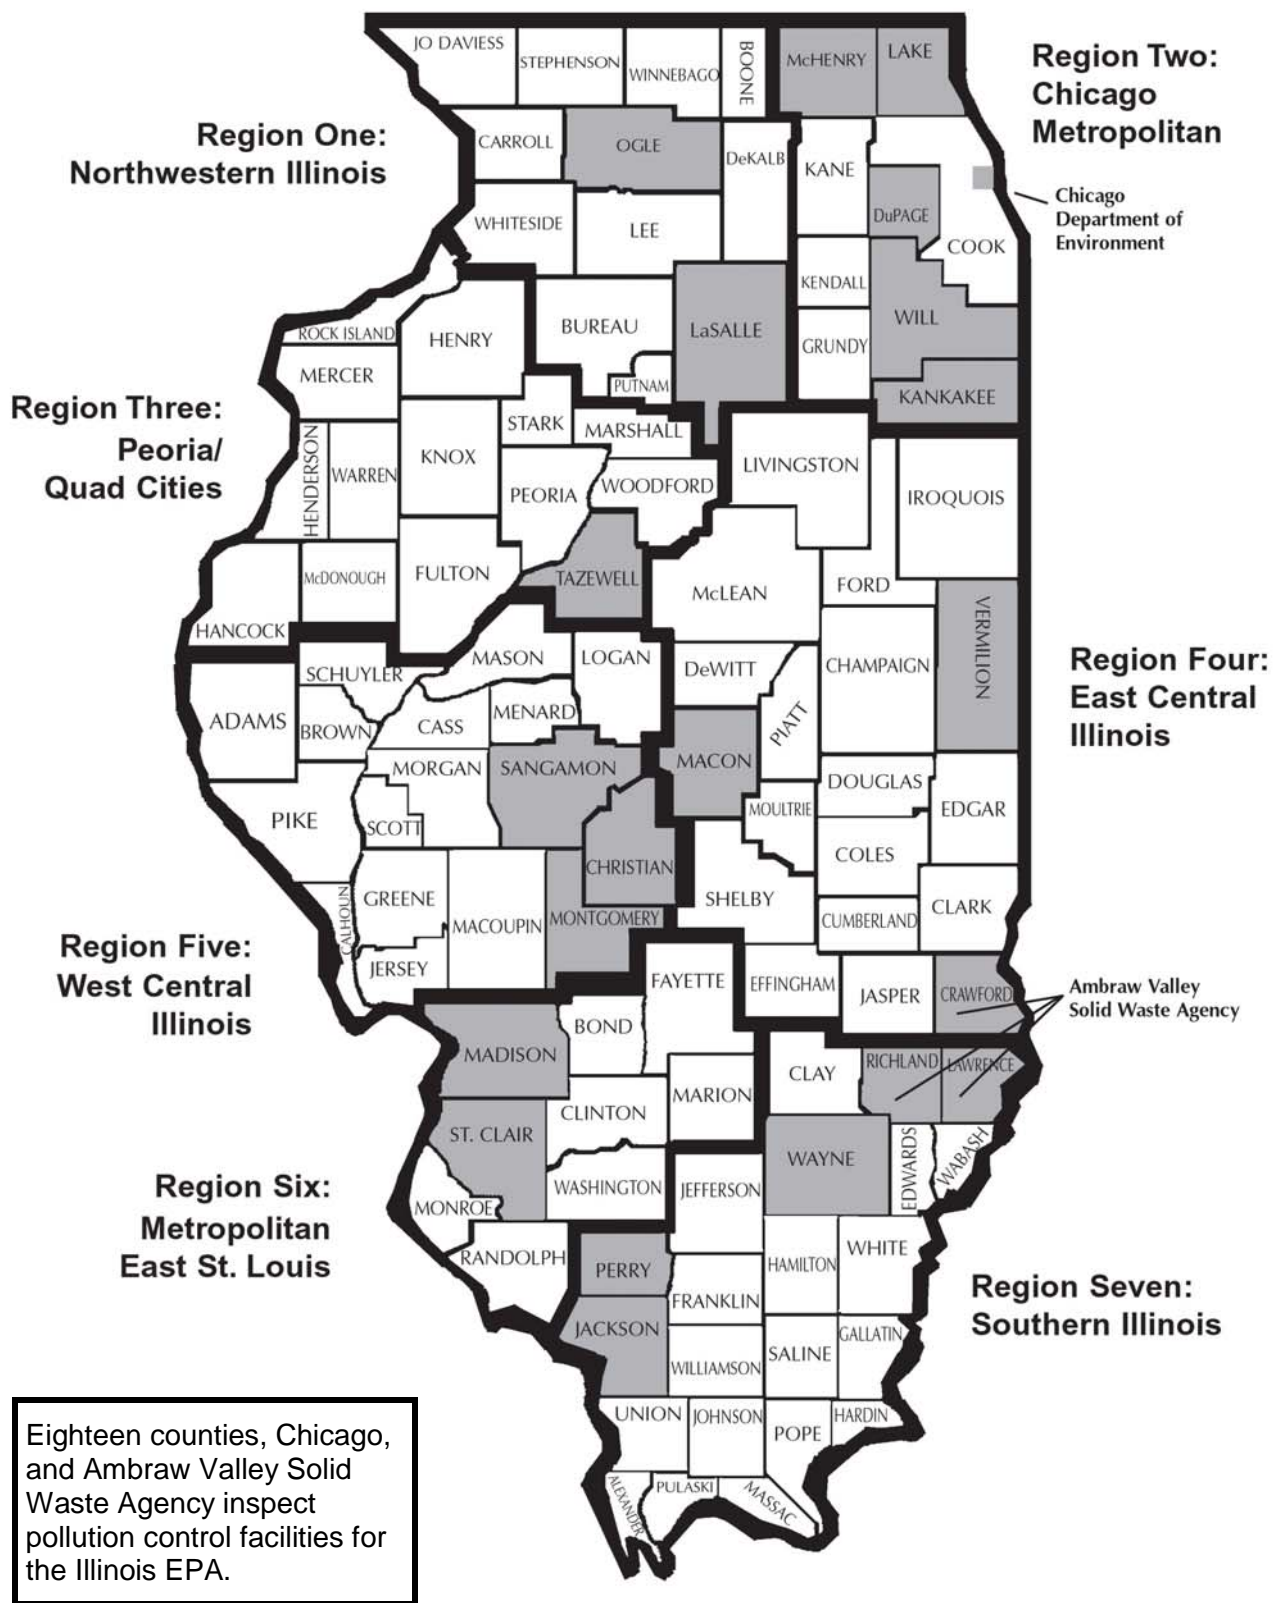

Choose search method from "Active" or "Inactive" applications:

"Active" means an application is pending for the site. "Inactive" means that there are no applications currently pending, but there may be applications for which the Section has taken final action (issued, denied or withdrawn).

Further searches may be made by City, County, Log number or Site number.

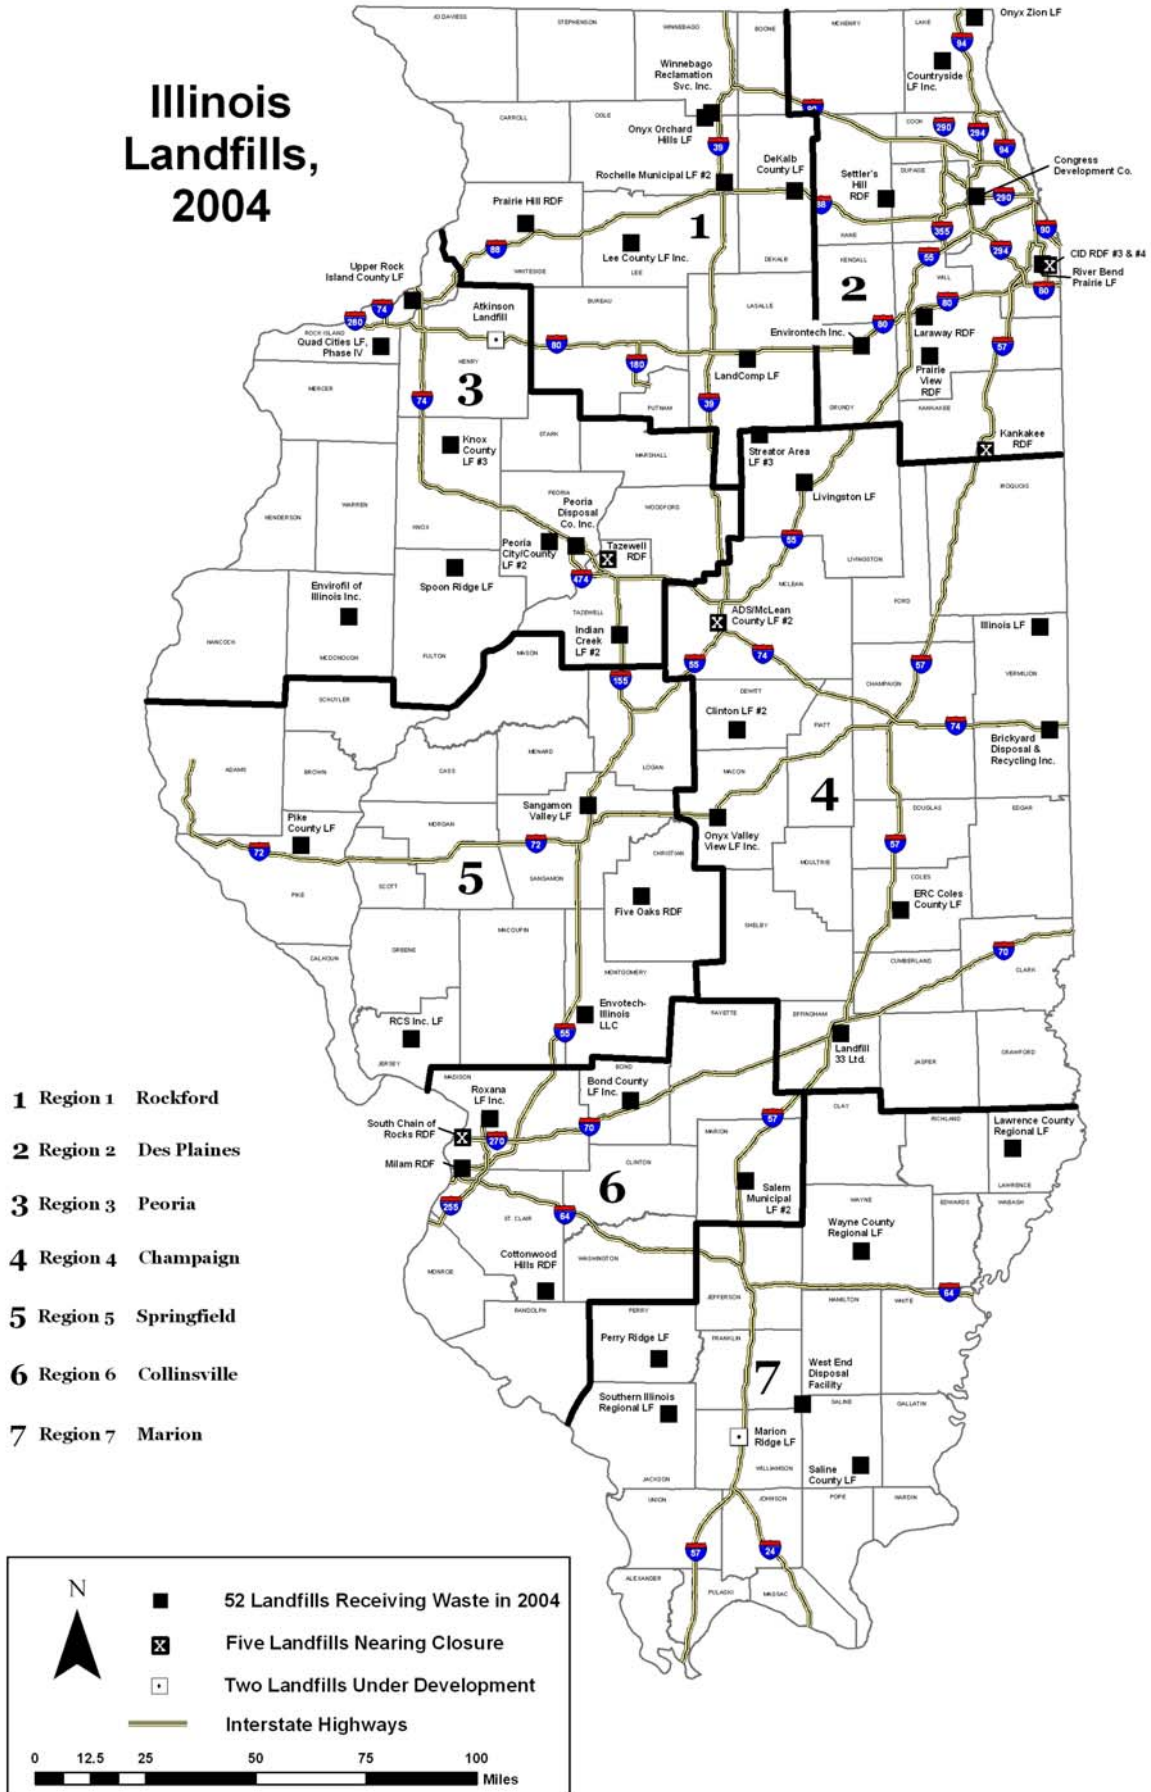

For more help in using this database search, contact the BOL Permit Reviewer on call at 217-524-3300. ♦

Local Agencies Delegated to Inspect Pollution Control Facilities for the Illinois EPA

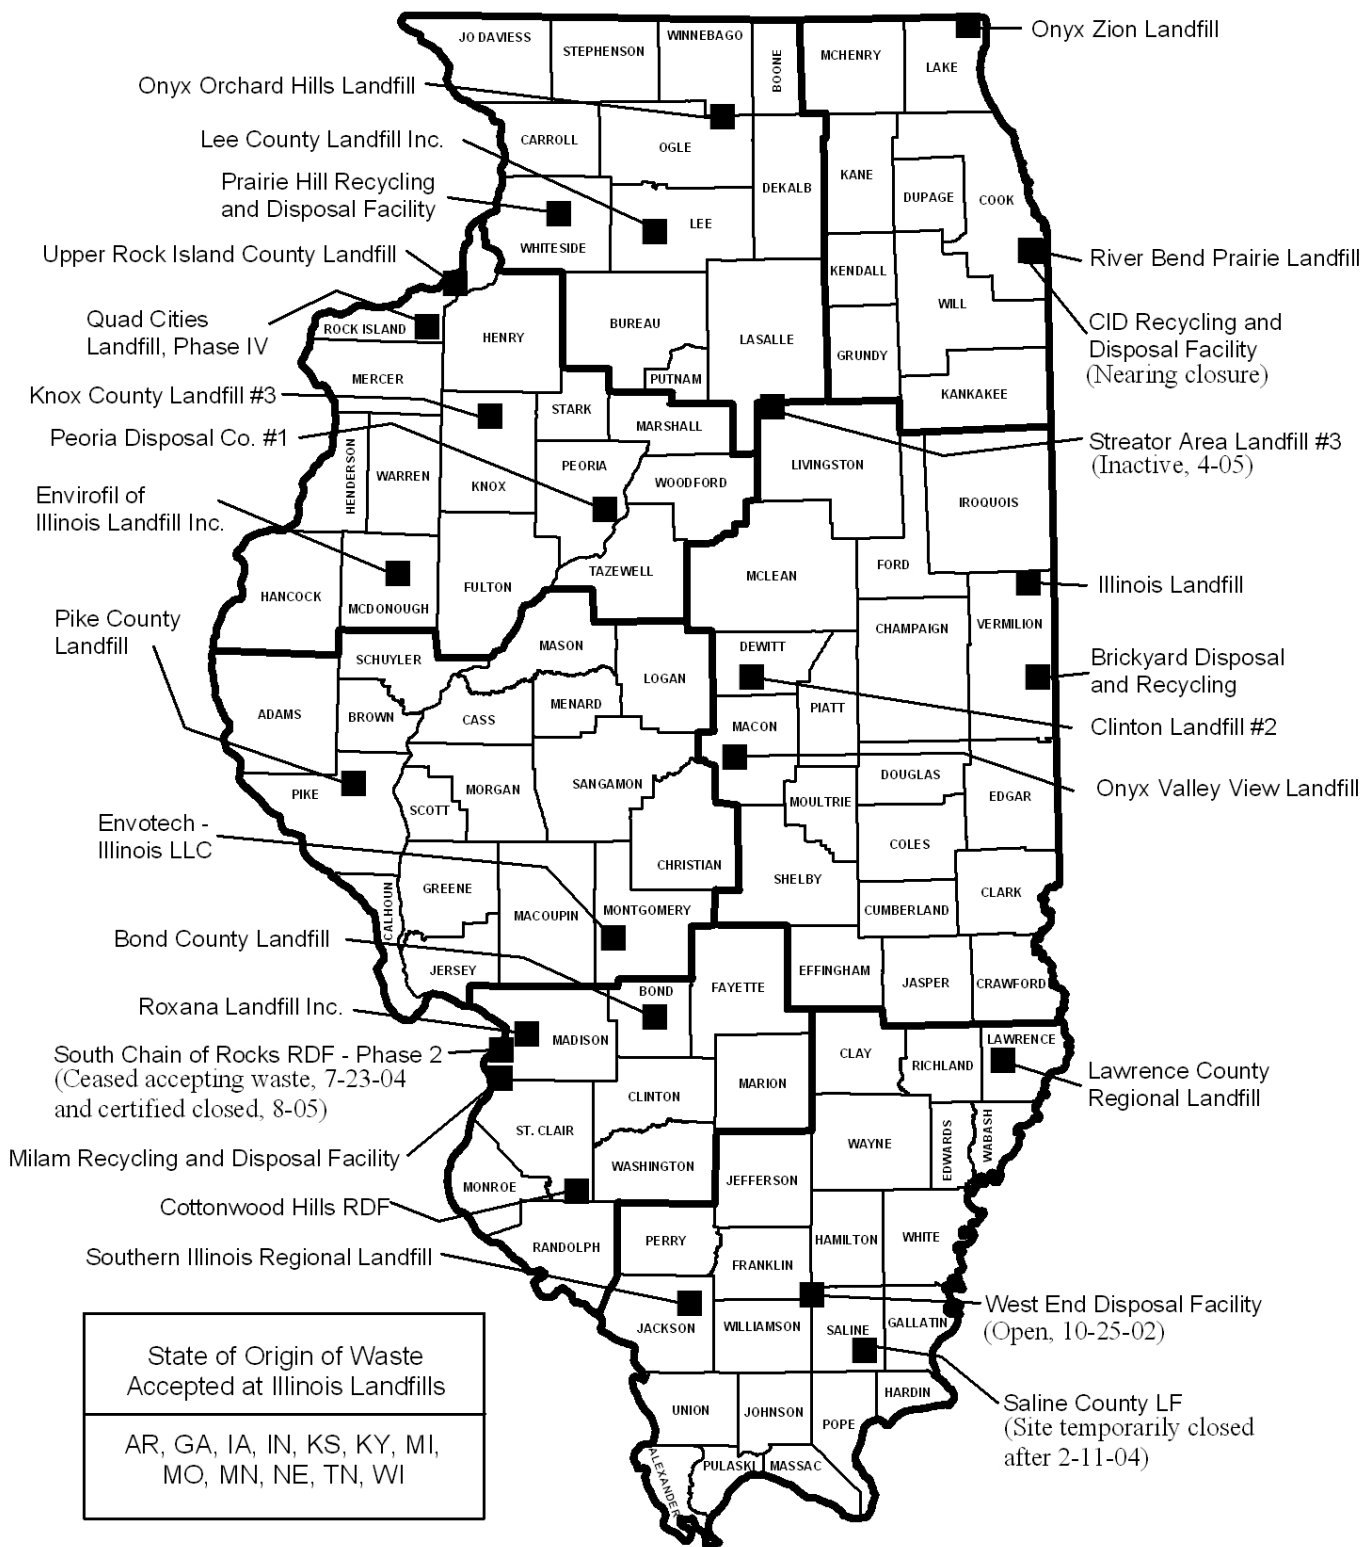

Eighteen counties, Chicago, and Ambrav Valley Solid Waste Agency inspect pollution control facilities for the Illinois EPA.

# Illinois Landfills, 2004

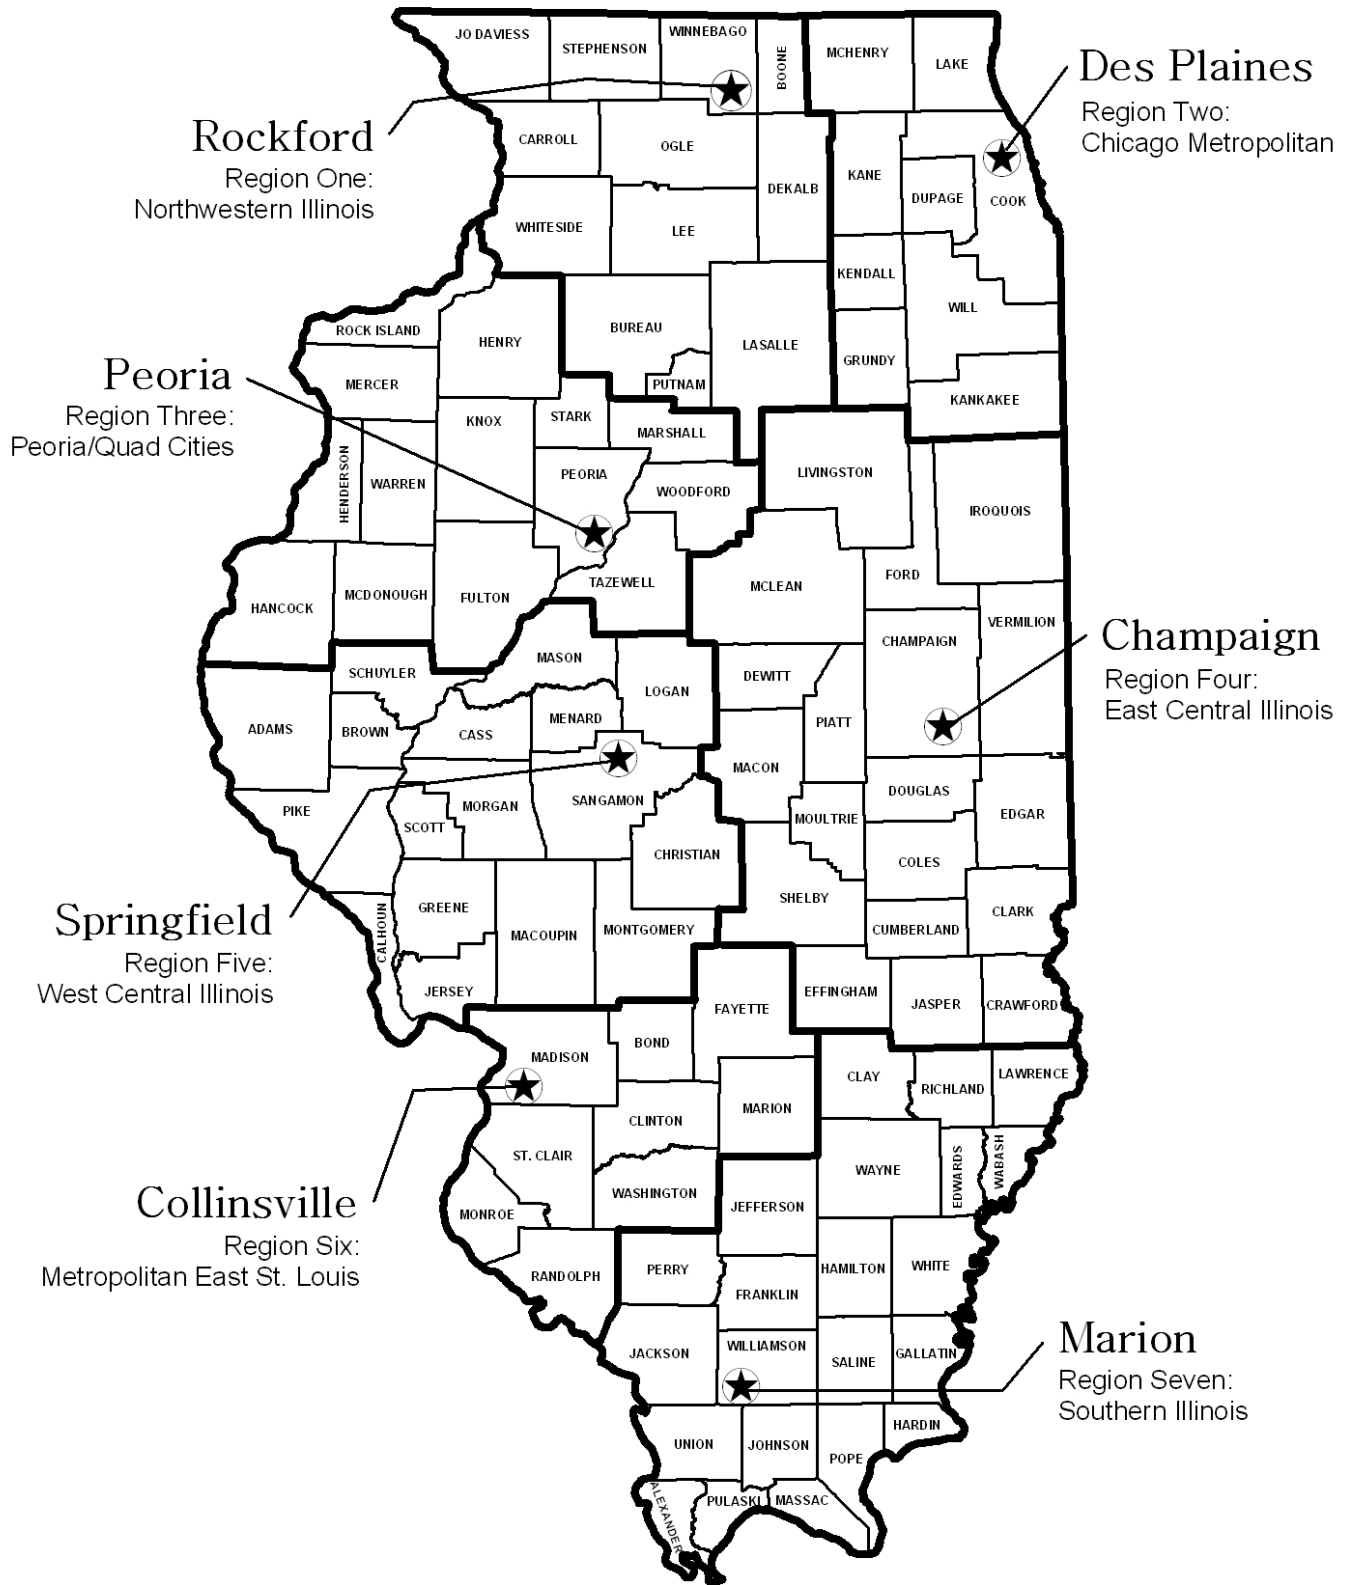

## Landfills Receiving Waste from Other States in 2004

■ Twenty-seven (27) landfills receiving waste from eleven (11) other states, besides Illinois in 2004

# Illinois Environmental Protection Agency Administrative Regions

**Regional offices are located in Rockford, Des Plaines, Peoria, Champaign, Springfield, Collinsville and Marion**

## Region One: Northwestern Illinois

# Landfills Transfer Stations Compost Facilities

### Put Waste in its Place

Put waste in its place,  
So our world won't be a disgrace  
If we don't put it where it should be,  
No one could disagree,  
That our earth would be the worst place to be,  
There would be so many landfills,  
You would have to go to Dr. Phil's  
When there would be billions of dumps,  
You would break out in goose bumps,  
The smell would be so bad,  
You would absolutely turn mad,  
We would be living like a rat,  
But if you want to change all that,  
Start by reusing, recycling, and do reduce,  
There is no excuse,  
Not to try to use the three R's,  
And be one of the earth's saviors!!!

**Kora Bestold** - Oak Grove East School, Bartonville

*2003-2004 Winner of Illinois EPA's School Poetry, Prose and Poster Contest for 5th and 6th graders*

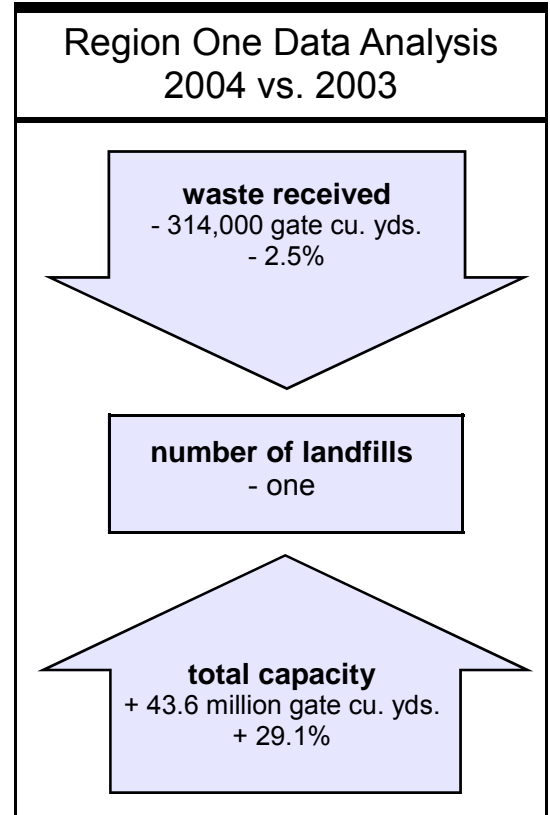

**T**WO LANDFILLS IN REGION ONE SHOW UP IN THE TOP THREE rankings of all the State's landfills in terms of waste receipts for 2004. Onyx Orchard Hills Landfill, Davis Junction, ranks second in the state by accepting 4.7 million gate cubic yards; Lee County Landfill, Dixon, is third with 4.0 million gate cubic yards received.

Cook County (County Seat: Chicago) has only two landfills left: CID RDF #3 and #4 and Congress Development Company. Transfer stations in Chicago consolidate wastes and transport them to distant landfills in Northwestern and Central Illinois.

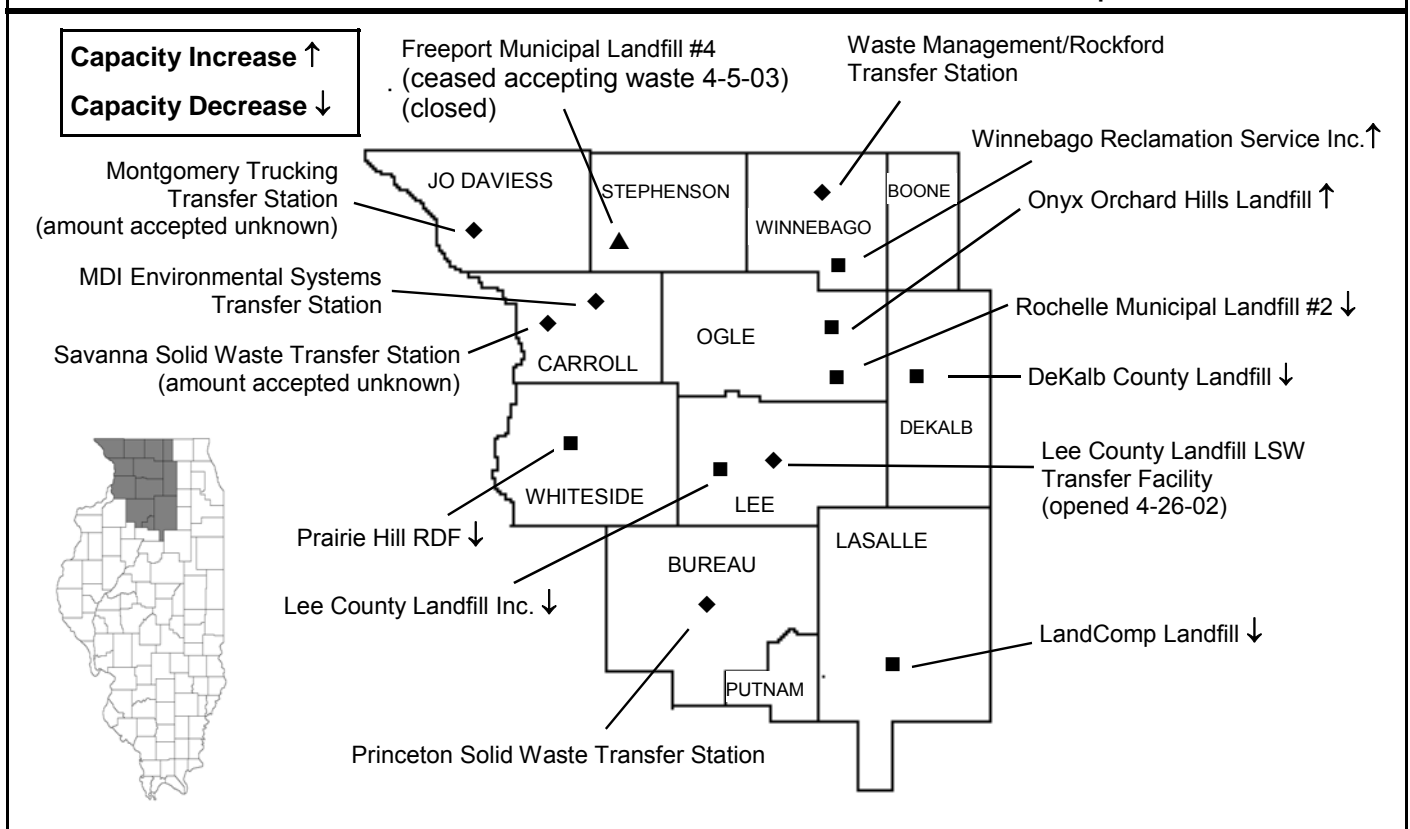

Region One's seven active facilities received more than 12.3 million gate cubic yards of waste in 2004 — or 314,000 gate cubic yards less than in 2003, a 2.5 percent decline. One landfill closed in 2003 in the City of Freeport.

### Two landfills expand

Capacity available for waste disposal increased 29.1 percent from 2003 to 2004, by a total of 43.6 million gate cubic yards based upon expansions at two landfills in the region. Onyx Orchard Hills, Davis Junction, received approval for a vertical and horizontal expansion on July 26, 2004. Winnebago Reclamation Service, Rockford added capacity on April 27, 2004 when its permit application for a vertical and horizontal expansion was approved.

### Landfills and Transfer Stations: Active, Closed, Under Development in 2004

## Region One Solid Waste Statistics

<b>Counties</b>	<b>12</b>
<b>Area (square miles)</b>	<b>7,371</b>
<b>Population (est.)</b>	<b>818,578</b>
<b>Landfill life expectancy</b>	
<b>Years remaining</b>	<b>16 *</b>
<b>Landfills</b>	
<b>Active in 2004</b>	<b>7</b>
<b>Transfer Stations</b>	
<b>Active in 2004</b>	<b>6</b>
<b>Inactive in 2004</b>	<b>2</b>
<b>Compost facilities</b>	
<b>Active in 2004</b>	<b>5</b>
<b>Closed in 2004</b>	<b>1</b>

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

<b>Future Expansions</b> <sup>1</sup>	<b>Airspace</b>
Lee County Landfill Inc.	29.4 million

<sup>1</sup> Proposed in 2005

## Capacity increased 29.1 percent as of Jan. 1, 2005

This region is second in the state, behind Peoria/Quad Cities, in remaining capacity, with a 19.6 capacity share. Onyx Orchard Hills Landfill reported almost 102.4 million gate cubic yards of space available as of Jan. 1, 2005, making it third in the state in capacity ranking on that date. Prairie Hill RDF, Morrison, with 44.9 million gate cubic yards ranks seventh in capacity remaining.

Total capacity for the Region's seven landfills, reporting on Jan. 1, 2005, was over 193.6 million gate cubic yards which means 16 years of remaining capacity for the region.

## Two landfills help boost the State's capacity

On July 26, 2004, Onyx Orchard Hills obtained approval for an additional 19.6 million cubic yards airspace with its 40.5 foot vertical expansion and its 76 acre horizontal expansion.

Winnebago Reclamation Services, Rockford, received a permit to expand vertically and horizontally in April, 2004. This expansion will add 1.8 million cubic yards of airspace for waste disposal at this landfill.

Lee County Landfill, Dixon, also opened Cells 13 and 14 in September and October 2004. A future expansion at this landfill of 29.4 million airspace cubic yards has received local siting approval, and is under Agency review.

## Landfills: Waste Accepted 2004; Remaining Capacities Jan. 1, 2005

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>		
DeKalb County Landfill	DeKalb	DeKalb	320,041	35	3,322,000	37	88	2015

Winnebago Reclamation Service <sup>5</sup>	Rockford	Winnebago	1,022,198	17	8,279,000	24	70.2	2012
<b>Totals</b>			<b>12,317,877</b>		<b>193,613,000</b>			

\* Three landfills accepted out-of-state waste from Iowa and Wisconsin during 2004 totaling 88,944 gate cu. yds. or < 1% of the region's total.

<sup>1</sup> Standing among 52 landfills that accepted waste during 2004.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2005.

<sup>3</sup> Cells #13 and #14 opened on 9-21-04 and 10-28-04.

<sup>4</sup> 40.5 foot vertical and 76 ac. horizontal expansion approved on 7-26-04.

<sup>5</sup> Additional 1.8 million in-place cu. yds. capacity permitted 4-27-04.

## Another expansion proposed in Lee County

Seven landfills in the Northwestern Illinois region remained open into 2005. Another landfill, Lee County Landfill, Dixon, proposes to expand by 29.4 million cubic yards in the near future.

## Delegated inspections in LaSalle and Ogle counties

The Illinois EPA delegated inspection authority to the LaSalle County Department of Environmental Services and Development and to the Ogle County Solid Waste Management Department. Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA field office in Rockford: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, also inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. (Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2002; these facilities are not included in this report.)

## Rockford dominated regional transfer station activity

An Agency survey determined Region One's transfer stations handled more than 156,519 gate tons of municipal waste in 2004, an amount equivalent to 1.2 percent of the waste landfilled in the region. Of those voluntarily reporting, Waste Management/Rockford processed 50 percent of the regional total. Two of the transfer stations did not voluntarily report to the Agency.

There were two inactive transfer stations in 2004. In the City of Mendota, Illinois, Waste Management temporarily closed its transfer station during 2004. Rockford Landscape Waste Transfer Station was not active during 2004.

The City of Freeport proposes to open a transfer station to replace its landfill that closed. More information about it will appear in the 2005 (19th) annual report. They received a permit to develop the site on December 8, 2004.

## Questions and Complaints

Illinois EPA Region One field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **LaSalle and Ogle** counties, where some responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

	<b>Total</b>			<b>156,519</b>

<sup>1</sup> Accepted an unknown amount of waste in 2004

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the city of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year (1996), depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all counties in Region One.

Ten year plan updates have also been adopted by DeKalb, LaSalle, Lee, Ogle, Putnam, Stephenson, Whiteside and Winnebago counties.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

**Details concerning Region One landfills, transfer stations and compost facilities follow on pages R1.5 through R1.25.**

## Rockford Composting/Cherry Valley leads in composting

Region One's five active compost facilities reported processing more than 41,500 gate tons of landscape waste in 2004. The two sites: Rockford Composting, Cherry Valley, (ranked sixth in the state) and DeKalb County Landfill's Compost Site processed 86.5 percent of the region's total. Freeport Municipal Landfill #4 Compost Facility certified closed on Jan. 9, 2004.

### Compost Facilities: Waste Accepted 2004

	Municipality	County	Tons
DeKalb County Landfill	DeKalb	DeKalb	10,598
Peru Municipal Landfill #2	Peru	LaSalle	1,114
Rockford Composting <sup>1</sup>	Cherry Valley	Winnebago	25,375
Rockford Composting	Rockford	Winnebago	2,928
States Land Improve. <sup>1</sup>	Ottawa	LaSalle	1,530
<b>Total</b>			<b>41,545</b>

<sup>1</sup> Permit renewed in 2004

## Average regional recycling rate remains healthy

The Agency does not regulate recycling, nor is the Agency required to obtain statistics. Nevertheless, as a public service, the Agency sought this information from county recycling coordinators, who reported recycling rates ranging from 3.0 to 51.1 percent.

Region One's overall recycling rate of 24.8 percent is a multi-year average because six counties did not report new data in 2004 (see Appendix M for more details). ♦

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled

# Landfills Transfer Stations Compost Facilities

*Cell 5B (foreground) at Countryside Landfill, Grayslake, underwent excavation which allowed the landfill operator to stock pile soil to be used as daily cover in the active fill operation (Cell 5A) (background).*

**T**HE VOLUME OF SOLID WASTE BURIED IN REGION TWO IN 2004 decreased by 3.9 percent from the previous year. The region's landfills received over 11.9 million gate cubic yards of waste (about 3.6 million gate tons) — which amounted to 22.2 percent of all waste landfilled in Illinois that year.

Significantly, 74 percent (almost 8.8 million cubic yards) of waste accepted locally was deposited in four landfills: Onyx Zion Landfill, Zion, ranked sixth of all landfills in the State; Settler's Hill Recycling and Disposal Facility (RDF), Batavia, ranked seventh; Prairie View RDF, Wilmington, ranked eighth and Countryside Landfill, Grayslake, ranked ninth. These landfills each accepted between 1.8 and 2.6 million gate cubic yards of waste for disposal in 2004.

Local siting for a new landfill, Prairie View RDF, Wilmington, was approved on Mar. 4, 1999, and the site was under development in 2003. It has been approved to operate on Jan. 16, 2004, and Phase 1A South (8.06 ac.) opened three days later. On Mar. 3, 2004, Phase 1 B South (5.76 ac.) opened.

Accurate reflections of available capacity occur only once a year, when landfills take their Illinois EPA required "capacity snapshot" each New Year's Day. In the region, eleven years of capacity remain.

On Jan. 1, 2004, the Chicago Metropolitan Region had 60 million gate cubic yards of available landfill space. By Jan. 1, 2005, that capacity had increased 117.8 percent to 130.1 million gate cubic yards. Sixty (60) percent of the capacity available is located at the new landfill Prairie View RDF, Wilmington, ranked fifth in the State.

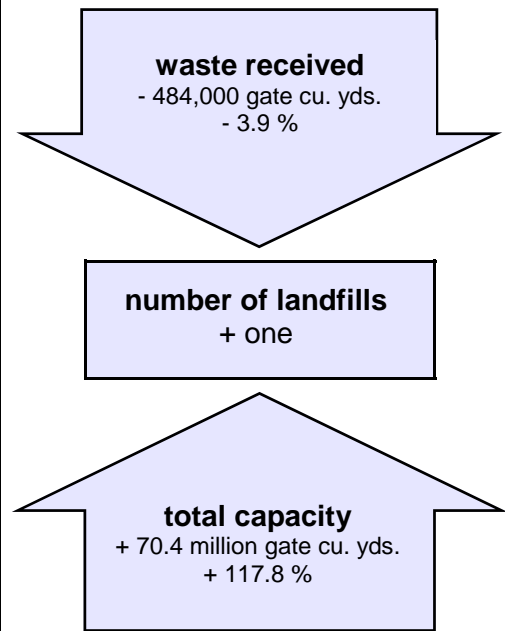

The region will operate with fewer landfills in the years ahead. It appears that ten landfills will remain open into 2005. Two more landfills prepare to close before 2006 ends.

CID RDF (Calumet City/Chicago) remains open into 2005 and is one of two landfills in the region which is near to closing. Kankakee County RDF, Chebanse, actually closed in November, 2005.

Local solid waste coordinators have been instrumental in providing quality recycling programs for their citizens. They also continually kept their citizens informed during a garbage hauling strike that lasted nine days in October, 2003 affecting Chicago's commercial and residential sectors.

More transfer stations opened in 2003 and 2004 as noted in the table on p. R2.5 that continues onto p. R2.6. The City of Chicago, Cook and DuPage Counties additionally have construction and demolition debris recycling centers/transfer stations that do not require state permits under State law.

## Region Two Data Analysis 2004 vs. 2003

## Garbage Hauler's Strike: 2003

In October, 2003, national newspapers and on-line internet news services reported daily on a nine day strike by personnel employed by private waste companies regarding wages and benefits. The strike affected approximately eight million people in the Chicago metropolitan area.

Commercial businesses reported overflowing trash bins. Transfer station operators reported overflowing staging areas; and some of the landfills as far away as Pontiac, Illinois, reportedly closed for a short period of time.

Local solid waste coordinators answered many calls from citizens about garbage pick-up schedules. Inspectors at Chicago Department of Environment and Illinois EPA's Des Plaines Regional Office were available to provide guidance to ensure that problems were minimized.

Most transfer stations within Chicago's city limits are open 24 hours per day, and resumed multi-shift operations at 6 p.m. on the ninth day after an agreement was reached.

## **Illinois EPA issues operating permit for Will County Landfill**

*Facility is located within the former Joliet Army Ammunition Plant property*

Former Illinois EPA Director Renee Cipriano announced that the Agency had issued a landfill operating permit on Jan. 16, 2004 to Prairie View Recycling and Disposal Facility, which is owned by Will County and will be operated by Waste Management of Illinois Inc.

The landfill is situated on an approximately 455-acre parcel within the former Joliet Army Ammunition Plant property, near Wilmington. The approved plans will allow the landfill to accept municipal waste and nonhazardous special waste for disposal and will have a waste "footprint" of approximately 223 acres, with a total waste volume of over 30 million cubic yards.

"The economic benefit of constructing and operating this facility will be important to the community," said Cipriano. "In addition to the over 100 construction jobs it will provide, and ultimately up to a dozen employees, the county and communities will reap the benefits from their share of the tipping fees paid to the facility for disposal."

Specifically, this permit will allow waste disposal in an eight-acre cell. Additional cells are expected to be added, as disposal needs mandate. The design of this facility should allow it to operate for 23 years. Proper closure and long-term monitoring requirements are also incorporated into the permit conditions. The Illinois EPA DesPlaines Regional Office inspected construction activities to ensure compliance with the development permit issued by the Illinois EPA in Nov. 24, 2003.

The Joliet Arsenal produced explosives and munitions for the Army, and was a major employer in the area during World War II and the Korean and Vietnam conflicts.

The landfill is mandated by the federal government to accept nonhazardous waste from the former Arsenal at no charge from the properties owned by the Army, Veteran's Cemetery and the Midewin National Tallgrass Prairie.

## **Chicago's Solid Waste Management Plan and Updates**

The City of Chicago adopted a solid waste management plan in 1992 that established a four point waste management strategy including: source reduction; recycling, reuse and composting; combustion with energy recovery; and disposal in landfill facilities. They recognize that not all waste can be eliminated; recycling and composting have environmental impacts; combustion has attractive features but its resultant ash may require special disposal. In its five year plan update, the City had eliminated combustion as a preferred method of waste disposal.

In 1995, the city implemented a bold program for recycling by co-collection of recyclables with waste and processing at three Material Recovery and Recycling Facilities (MRRF's) (pp. R2.21, R2.58, R2.64).

The city conducts two household hazardous waste and tire collection days along with an electronic collection day. The Mayor's Office for Green Technologies investigates additional energy saving and recycling initiatives. Other departments involved in waste management are the Department of Environment; Department of Purchases and Contracts that oversees vendor use of recycled products; Department of Transportation uses re-ground asphalt in road beds; and General Services installs energy-saving light fixtures in city buildings.

The City Council committee on Energy, Environmental Protection and Public Utilities monitors programs and produces legislative initiatives to accomplish the goals of the City's plan.

The city is examining new initiatives including brightly colored stickers on garbage bags containing recyclables, blue shopping bags provided by Dominicks and Walgreens, neighborhood recycling grants, and equipment and procedures that could improve both the blue bag recycling program and assist the city in the event of another strike by commercial waste haulers, such as the one that occurred in October, 2003 (see side bar on p. R2.1).

Citizens are encouraged to phone the city of Chicago's recycling hot line with questions or comments about all areas of waste disposal and recycling. In 2003, the city received and responded to over 2,300 public inquiries.

The City's ten year plan update is in process and will have more initiatives that reduce, reuse and recycle waste. These initiatives will be aimed at improving and expanding current programs, such as, establishing a permanent household hazardous waste collection site, electronics recycling drop-off program, that help create skilled jobs promoting the City's local economy.

For more information contact Christopher Sauve, Recycling Coordinator, at 312-744-4616. ♦

\*\* Total remaining capacity (from table on this page) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Questions and Complaints

Illinois EPA DesPlaines field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **DuPage, Kankakee, Lake, McHenry and Will counties and the City of Chicago**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

## Solid waste transfer stations vital to Region Two

Region Two is home to 68 of the state's 98 active transfer stations (see Table on p. R2.6). Of this total, Cook County has 48 (that includes 15 in the City of Chicago); Will and Lake Counties each have six; Kane County has three, Kankakee and DuPage counties have two each and McHenry County has one.

Transfer stations consolidate locally collected waste for efficient shipment to distant landfills. Some transfer stations separate and remove recyclables from the municipal waste stream. Transfer stations handling only landscape waste, with transfer in less than 24 hours, are included.

The region's transfer stations are noted in the map on page R2.0, and in the table on pages R2.5 and R2.6. Some of Region Two's transfer stations handled more waste than the state's busiest landfills. Therefore 7.2 million tons transferred is an estimate, because not all of them voluntarily reported. We know they are active because inspectors inspect their operations regularly.

## New transfer stations open in Chicago Metropolitan area

Mostly landscape waste only transfer stations opened during 2002-2004 (see table on p. R2-6). Harvey Transfer Station and Disposal Management Systems Inc. are allowed to handle other parts of the municipal waste stream, besides landscape waste.

Harvey Transfer Station, Harvey, opened in March, 2002. DK (LSW) Transfer Station, Lake Bluff, opened on Oct. 1, 2002. A LSW transfer station was also opened by the Village of Glencoe in September, 2002.

Disposal Management Systems Inc., DesPlaines; Greenwood Development, Maywood; and Oak Forest Public Works Department (LSW only) all opened transfer stations in May, 2003. Will County also had two new landscape waste transfer stations in Romeoville (Land & Lakes/Willow Ranch and Willow Ranch Composting Inc.) which both opened in May, 2003. Rocks Ann Trucking, Waukegan, opened a transfer station in Lake County in June, 2003.

Land & Lakes/Wheeling LSW Transfer Station opened in Deerfield in May, 2004. Marengo Disposal Company (MDC) opened a landscape waste (LSW) transfer facility at the Meyer Material Company property in McHenry in July, 2004. Star Disposal LSW Transfer Station, Park Ridge, opened in December, 2004.

## Transfer stations permits are issued for site life

Permits to develop and operate transfer stations are issued for the life of the facility and, until a transfer station notifies Illinois EPA that it has ceased accepting waste, it is difficult to tell whether sites are still active or not. The ones placed on the map are believed to be active and accurately located.

Illinois EPA depends upon its regional inspectors and the delegated partners who inspect the sites periodically, to be our best source of information related to the activity at these sites. (See pgs. R2.4, R2.5 and R2.6)

## Six agencies hold delegation agreements

The Illinois EPA has delegated inspection authority to the following agencies in Region Two:

- Chicago Department of Environment
- DuPage County Dept. of Economic Development and Planning
- Kankakee County Planning Dept.
- Lake County Health Department and Community Health Center
- McHenry County Health Department
- Will County Land Use Dept., Waste Services Division

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA DesPlaines field office: investigating and enforcing suspected violations of land pollution laws and regulations and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. (Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2002; these facilities are not included in this report.)

DuPage County inspects two transfer stations. Kankakee County inspects one active landfill, two transfer stations and three compost facilities.

Lake County inspects two active landfills, six transfer stations, and five compost facilities. McHenry County inspects one transfer station and two active compost facilities. Will County inspects two active landfills, six active transfer stations, and three compost facilities. Chicago Department of Environment is responsible for inspecting 13 transfer stations. The Agency's DesPlaines office inspects the hazardous waste landfill CID RDF, Calumet City, and landfills, transfer stations and compost sites in Cook, Grundy, Kane and Kendall counties and sites owned/operated by the city of Chicago and Will County.

## More than 191,000 tons of landscape waste composted

Seventeen composting facilities handled more than 191,000 gate tons of landscape waste in 2004 (see Table below). This tonnage is equivalent to 49.2 percent of total landscape waste composted in the State at all permitted facilities.

Three of the Region's compost sites show up in the top five of all of the State's compost facilities. Thelen Sand and Gravel #1, Antioch, was number two with 53,521 tons accepted; Joyce Farms Recycling Inc., Essex, was fourth with 30,950 tons accepted. Land and Lakes/Wheeling, Deerfield, was fifth, having accepted 27,499 tons.

## Recycling rates ranged from 11.2 to 50.9 percent

The Agency does not regulate recycling; however, it does survey recycling coordinators statewide. Coordinators in Region Two reported recycling rates ranging from 11.2 to 50.9 percent, giving the region an average recycling rate of 39.5 percent. All except for Kane County and West Cook County Solid Waste Agency voluntarily reported 2004 data.

Four counties (Grundy, Kane, Kendall, and McHenry) have passed ordinances in support of recycling in residential and/or commercial sectors. In Cook County, Chicago and West Cook County Solid Waste Agency have passed similar ordinances in support of recycling.

Recycling rates are high here, in part, because of accessibility of markets for recyclables in Chicago, an international business center. ♦

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all. DuPage, Grundy, Kane, Lake, McHenry and Will Counties have completed ten year plan updates. Lake County has also completed its 15 year plan update.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

**Details concerning Region Two landfills, transfer stations, and compost facilities follow on pages R2.9 through R2.112.**

# Landfills Transfer Stations Compost Facilities

*Illinois EPA's permit for Indian Creek Landfill #2, Hopedale, requires the site's side slopes to be lined with geotextile fabric. An 18-inch protective soil layer is placed approximately 10 feet up the landfill's side wall to hold the geonet in place until trash is placed in the cell.*

**L**ANDFILLS IN REGION THREE ACCOUNTED FOR 20.6 PERCENT OF the more than 986.5 million gate cubic yards of disposal capacity remaining statewide on Jan. 1, 2005, leading the State in capacity share.

The State's largest landfill, Spoon Ridge Landfill, Fairview, housed 64.1 percent of the capacity in the region, translating to 13.2 percent of the capacity in the State. It ranked next to last in terms of wastes received in 2004, yet first in the State in terms of remaining landfill capacity since Jan. 1, 1997.

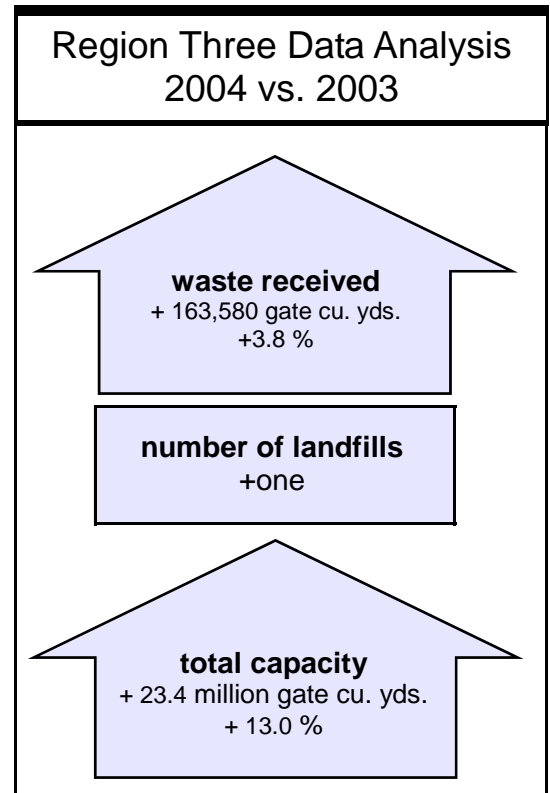

Total capacity in the region increased 13 percent from the previous year. This increase is based upon the re-opening of Indian Creek Landfill No. 2, horizontal and vertical expansions at Envirofil of Illinois and several new areas or cells that were permitted to open during 2004.

### Waste disposal increased 3.8 percent

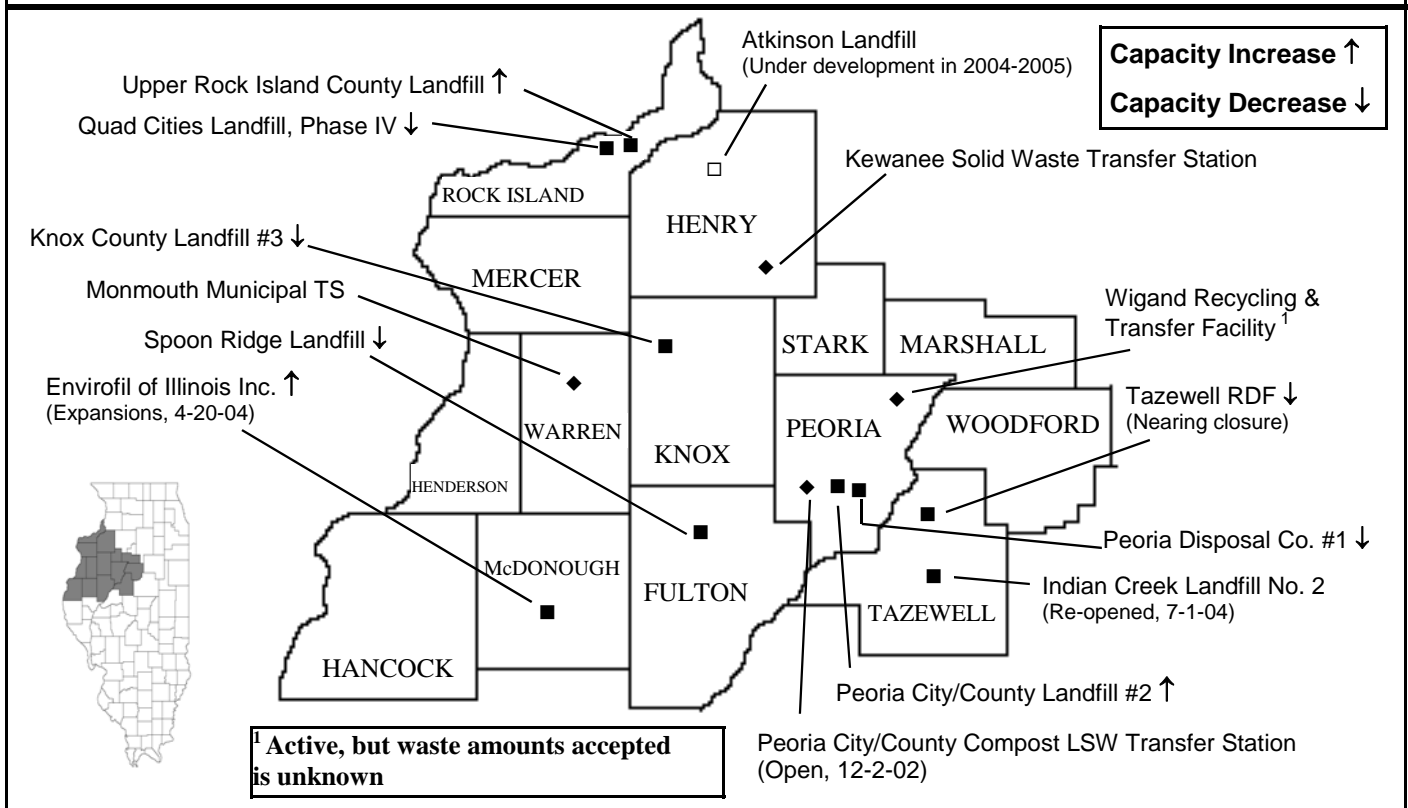

The Region's landfills reported accepting more than 4.5 million gate cubic yards of waste for disposal during 2004.

In Region Three, the amount of waste received in 2004 by nine active landfills was up 163,580 gate cubic yards from that received a year earlier, a 3.8 percent increase.

No landfills in this region were on the top ten list in terms of waste received in the State.

### Landfills and Transfer Stations: Active, Closed, Under Development in 2004

## Region Three Solid Waste Statistics

**Counties** 14  
**Area (square miles)** 8,170  
**Population (est.)** 760,824

**Landfill life expectancy**  
**Years remaining** 45 \*

**Landfills**  
**Active in 2004** 9  
**Re-opened in 2004** 1  
**Under Development in 2004** 1

**Transfer Stations**  
**Active in 2004** 4  
**New in 2002** 1

**Compost facilities**  
**Active in 2004** 5

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Indian Creek Landfill No. 2 re-opens, as another landfill in Tazewell County nears closure

In Hopedale, Indian Creek Landfill No. 2 received a significant modification to its permit in order to develop Areas 2 and 3. This permit was approved on Nov. 26, 2003. An Illinois EPA permit to open was granted on June 30, 2004. Its capacity, as reported on Jan. 1, 2005, was 4.7 million gate cubic yards. This site had previously been inactive since the early 1990's.

All active landfills in the region expect to remain open into 2005. However, the operator for Tazewell Recycling and Disposal Facility, East Peoria, had proposed an August, 2005, closure date. The site was still open in December, 2005.

## As Envirofil of Illinois Inc. expands, Atkinson Landfill also receives approval to expand

Illinois EPA approved two expansions at a Macomb, Illinois, landfill on Apr. 20, 2004. Envirofil of Illinois Inc. expanded horizontally by 57 acres and by 19 acres vertically, adding 9.25 million cubic yards of airspace to its facility.

Atkinson Landfill, Atkinson, also received a significant modification permit on Jan. 16, 2004; this process includes a new liner and waste excavation, along with a vertical and horizontal expansion. The site is still under construction as of May 18, 2005.

Knox County Landfill #3, Oneida, opened Cell 9 (5.9 acres) on July 2, 2004. Quad Cities Landfill, Phase IV, Milan, opened two portions of Module 6 in August and September 2004. Upper Rock Island County Landfill, East Moline, opened a 5.87 acre cell on Feb. 9, 2004.

## Landfills: Waste Accepted 2004; Remaining Capacities Jan. 1, 2005

<b>Total</b>			<b>4,521,285</b>		<b>203,304,000</b>			

\* Five landfills accepted out-of-state waste during 2004 totaling 1,283,081 gate cubic yards, or 28.4% of the region's total, from nine other states.

<sup>1</sup> Standing among 52 landfills that accepted waste during 2004.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2005.

<sup>3</sup> UD = Under Development as of 1-16-04, a lateral and a vertical expansion is being developed.

<sup>4</sup> 57 ac. horizontal expansion & 19 ac. vertical expansion approved on 4-20-04.

<sup>5</sup> Significant modification to permit approved 11-26-03, approved site opening on 6-30-04.

## Spoon Ridge Landfill ranks first in capacity since 1997

The Agency granted Spoon Ridge Landfill, near Fairview, a permit in December, 1997, that allowed the facility's owner and operator to expand the disposal area from 80 to 372 acres, the total landfill area changed from 995 to 1,038 acres, and raise peak elevation from 813.5 to 915 feet. With a design capacity of 84.6 million airspace cubic yards, the facility has been the state's largest landfill for the past seven years, but next to last in terms of waste received.

On June 30, 1998, the owners announced a change to temporarily close Spoon Ridge as part of a nationwide effort to cut costs. The landfill owners said, in published reports, they would use the time to continue developing transfer stations and securing waste contracts that will eventually allow waste from greater Chicago area and southeastern Wisconsin to be transported to Spoon Ridge.

## Delegated inspections performed in Tazewell County

The Illinois EPA has delegated inspection authority to Tazewell County Health Department for duties usually performed by the Agency's field office, such as investigating citizen complaints about open dumping and open burning, and for inspecting the county's two active landfills and one compost facility. Tazewell County's program was the first delegation partnership in the State, in place since 1987.

## Transfer station operators report 14,367 tons handled

The City of Kewanee's municipally owned and operated transfer station handled almost 9,000 gate tons of waste, 62 percent of the amount reported for the region. However, one transfer station did not voluntarily report. A landscape waste transfer station, Peoria City/County Compost LSW Transfer Station, Brimfield, opened in December, 2002. Peoria Recycling and Transfer, Peoria, at the present time takes recyclables, yet is not permitted by Illinois EPA as a transfer station so it cannot accept municipal waste for transfer at this time.

## Questions and Complaints

Illinois EPA Region Three personnel investigate reports of suspected illegal waste disposal, and inspect the Region's landfills, transfer stations and compost facilities, except in **Tazewell County**, where joint responsibility has been delegated to a local authority.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

Peoria City/Co. Comp. LSW TS	Brimfield	Peoria	3,641
Wigand Recycl. & Trans. Facility <sup>1</sup>	Chillicothe	Peoria	0
<b>Total</b>			<b>14,367</b>

<sup>1</sup> Active in 2004, but waste amounts accepted unknown

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the city of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all counties except for Hancock County. Ten year plan updates have been adopted by Henry, Marshall, Peoria, Rock Island, Stark and Tazewell counties. Hancock County has completed its 15-year plan update.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

**Details concerning Region Three landfills, transfer stations, and compost facilities follow on pages R3.5 through R3.23.**

## Forty-four percent of landscape waste receipts handled at one site

The Peoria/Quad Cities region's compost facilities processed 25,720 gate tons of landscape wastes during 2004, 9.9 percent more than in the previous year. About 44.4 percent of the landscape waste in the region handled in 2004 was managed at the compost facility located at Peoria City/County Landfill #1, ranked tenth in the State.

### Compost Facilities: Waste Accepted 2004

	Municipality	County	Tons
Knox County Landfill <sup>1</sup>	Wataga	Knox	3,628
Monmouth Municipal <sup>1</sup>	Monmouth	Warren	3,471
Pekin Composting Facility <sup>1</sup>	Pekin	Tazewell	3,561
Peoria City/Co. LF #1 <sup>1</sup>	Brimfield	Peoria	11,419
Upper Rock Island County	East Moline	Rock Island	3,641
<b>Total</b>			<b>25,720</b>

<sup>1</sup> Permit renewed in 2003 or 2004.

## Recycling rates average 27.5 percent

The Agency does not regulate recycling, and it is not required to, but does survey recycling coordinators statewide. Recycling rates ranging from 1.5 to 49.3 percent were reported. The regional recycling rate of 27.5 percent is viewed as the average rate for 2004. Five counties did not voluntarily report new data for 2004. ♦

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD	Tons	Percent

# **Landfills Transfer Stations Compost Facilities**

## **Trash Could Ruin Us All!**

Dirty roads and messy streets,  
How will we survive?  
Air is dirty,  
Waters black,  
The trees are going to cry.

The air is filled with gas and oil,  
There are tires in the streets,  
And leaks in tanks go washing down,  
Quickly through the streams.

Birds are dying,  
Fish are too.  
It's time to clean up,  
So how about you?

Does it seem like a lot?  
What can you do?  
Recycle clean up,  
And there's more you can do.

I don't have time to name them all,  
But if nobody helps,  
**TRASH COULD RUIN US ALL!**

**Kelsey Swindle** - Lisle Junior High School, Lisle

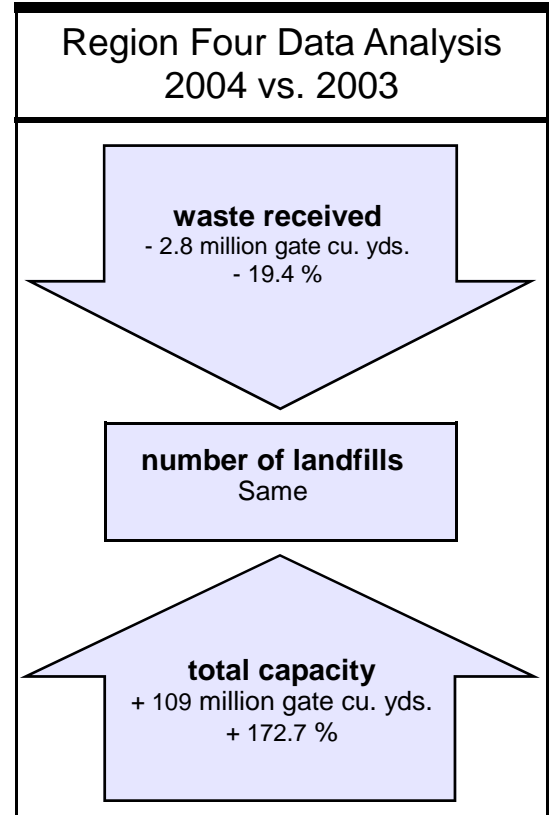

**M**ORE THAN 11.2 MILLION GATE CUBIC YARDS OF WASTE WAS accepted in East Central Illinois during 2004. This figure is down 19.4 percent from the previous year, a difference of 2.8 million cubic yards. Sixty-four percent of that region's total waste receipts was accepted at Livingston Landfill, Pontiac.

In fact, Livingston Landfill accepted more waste than any other landfill in the State, a total of almost 7.6 million gate cubic yards, almost double that of the next to largest recipient. Onyx/Orchard Hills Landfill, Davis Junction, took the number two slot, having accepted 4.7 million gate cubic yards of waste in 2004.

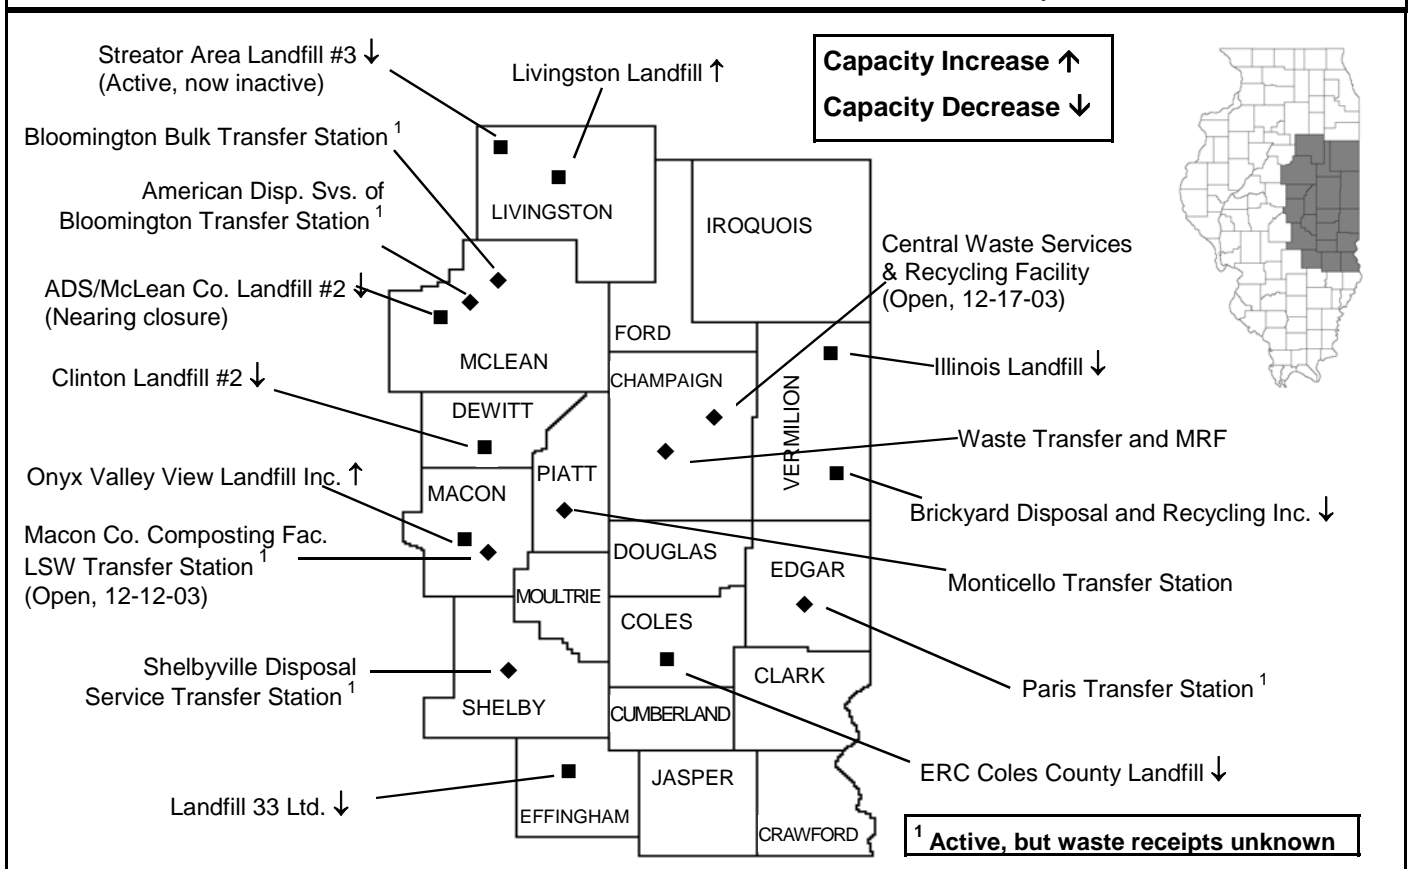

As of Jan. 1, 2005, an additional 109 million gate cubic yards of landfill capacity was available in Region Four, this figure increased 172.7 percent from the previous year.

Available capacity reported in the region on Jan. 1, 2005 at nine landfills was almost 171.9 million gate cubic yards.

American Disposal Services/McLean County Landfill, Bloomington, proposed to close some time during 2005. This site was still open, as of September, 2005. Another landfill, Streator Area Landfill #3, Streator, was active during 2004, but became inactive in April, 2005. The landfill is being prepared for future waste acceptance.

## Landfills and Transfer Stations: Active & Under Development in 2004

## Region Four Solid Waste Statistics

**Counties** 19  
**Area (square miles)** 12,096  
**Population (est.)** 863,227

**Landfill life expectancy**  
**Years remaining** 15 \*

**Landfills**  
**Active in 2004** 9

**Transfer Stations**  
**Active in 2004** 8  
**New in 2003** 2

**Compost facilities**  
**Active in 2004** 4  
**New in 2004** 1

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Livingston Landfill ranked second in capacity remaining

Almost 70 percent of the capacity available in the region is at Livingston Landfill, ranked second in the State. Fifteen years of capacity remain in the region.

On Oct. 8, 2004, Illinois EPA approved Livingston Landfill's permit that included a 48 acre horizontal expansion of Parcel ABC, a 159 acre horizontal expansion of Parcel D, and a 75 foot vertical increase over Parcel D. This added 50.5 million cubic yards airspace capacity at this landfill.

Clinton Landfill #2 also received an Illinois EPA permit to open a new area named Phase 5B on March 25, 2004.

Streator Area Landfill's vertical expansion was approved on June 4, 2003. This landfill became inactive as of April, 2005, while the landfill is being prepared to accept waste. New cells opened at Brickyard Disposal and Recycling, Danville, on Feb. 7, 2003 and Dec. 11, 2003, and at Livingston Landfill on Dec. 30, 2003.

An expansion of almost 1.2 million in-place cubic yards was approved for Landfill 33, Effingham, on June 28, 2002. Two lateral expansions totaling 1.6 million in-place cubic yards at ERC Coles County Landfill, Charleston, were approved on May 13th and September 10th in 2002. A 12 acre cell 10B opened on April 20, 2005 at ERC Coles County Landfill.

\* Five landfills accepted out-of-state waste during 2004 totaling 116,062 gate cubic yards, or 1% of the region's total.

<sup>1</sup> Standing among 52 landfills that accepted waste during 2004.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2005.

<sup>3</sup> Cell 4C approved on 2-7-03; and Cell 5A approved on 12-11-03.

<sup>4</sup> Mod. #35 approved operation of Phase 5B on 3-25-04.

<sup>5</sup> Permits for lateral expansions of one million and 600,000 in-place cubic yards approved on 5-13-02 and 9-10-02. Operation of Cell 10B approved on 4-20-05.

<sup>6</sup> Permit for a vertical expansion of 1.2 million in-place cubic yards approved on 6-28-02.

<sup>7</sup> Operation of Cell D-6 permitted on 12-30-03. Expansions totalling 50.5 million in-place cu. yds. of capacity approved on 10-8-04.

<sup>8</sup> Vertical expansion of 480,000 in-place cu. yds. approved on 6-4-03. Site became inactive as of 4-05.

## Ambraw Valley Solid Waste Agency, Macon and Vermilion counties have delegated duties

The Illinois EPA has delegated inspection authority to Ambraw Valley Solid Waste Agency covering the counties of Crawford, Lawrence and Richland, the Macon County Solid Waste Management Department and the Vermilion County Health Department.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA's Champaign field office: investigations into complaints about open dumping, inspecting pollution control facilities, investigating and enforcing suspected violations of land pollution laws.

## Transfer station reporting is voluntary

Only three of the Region's eight transfer stations voluntarily reported solid waste accepted in 2004. The 99,500 ton figure of waste receipts underrepresents what is actually happening in the region due to the lack of data being voluntarily reported.

Transfer Stations: Waste Handled 2004			
	Municipality	County	Tons
American Disp. Serv. TS <sup>1</sup>	Bloomington	McLean	0
Bloomington Bulk Transfer Station <sup>1</sup>	Bloomington	McLean	0
Central Waste Services & Recycling <sup>2</sup>	Urbana	Champaign	90,150
Macon County Composting <sup>1 &amp; 3</sup>	Decatur	Macon	0
Monticello Transfer Station	Monticello	Piatt	1,400
Paris Transfer Station <sup>1</sup>	Paris	Edgar	0
Shelbyville Disposal Service TS <sup>1</sup>	Shelbyville	Shelby	0
Waste Transfer & Mat'l. Recovery	Champaign	Champaign	8,000
<b>Total</b>			<b>99,550</b>

<sup>1</sup> Active in 2004, but waste receipts unknown.  
<sup>2</sup> Open, 12-17-03  
<sup>3</sup> LSW transfer station open, 12-12-03.

## Composting activity reported to Illinois EPA

Almost 27,000 gate tons of landscape waste were processed at four compost facilities in Region Four. Macon County Composting, Decatur, opened under a new operator in 2003. Decatur Compost Inc. opened for business in April, 2004.

Compost Facilities: Waste Accepted 2004			
	Municipality	County	Tons
Brickyard Disp. & Recy. Compost	Danville	Vermilion	3,678
Decatur Compost Inc. <sup>1</sup>	Decatur	Macon	2,965
Macon County Composting <sup>2</sup>	Decatur	Macon	9,144
Urbana Municipal Landscape	Urbana	Champaign	11,029
<b>Total</b>			<b>26,816</b>

<sup>1</sup> Open, 4-5-04      <sup>2</sup> New operator in 2003

## Expansions approved at Livingston Landfill, Pontiac in October, 2004

Illinois EPA approved on 10-8-04, a 207 acre horizontal and 75 foot vertical expansion totalling 50.5 million in-place cu. yds.

## Questions and Complaints

Illinois EPA Region Four personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Crawford, Macon and Vermilion counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

**Illinois EPA**  
**2125 S. 1st St.**  
**Champaign, IL 61820**  
**Phone: 217-278-5800**  
**Fax: 217-278-5808**

**Ambraw Valley Solid Waste Agency (Crawford County)**  
**P.O. Box 83, 1630-1700 S. Eaton St.**  
**Robinson, IL 62454-3638**  
**Phone: 618-544-7045**  
**Fax: 618-544-5027**

**Macon County Solid Waste Management Department**  
**Room 212**  
**141 S. Main**  
**Decatur, IL 62523-1293**  
**Phone: 217-425-4505**  
**Fax: 217-424-1459**

**Vermilion County Health Department**  
**200 S. College St., Suite A**  
**Danville, IL 61832**  
**Phone: 217-431-2662**  
**Fax: 217-431-7483**

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates were submitted by Champaign, Clark, Crawford, DeWitt, Douglas, Effingham, Iroquois, Jasper, Livingston, Macon, McLean, Piatt, Shelby and Vermilion Counties. Champaign, Crawford, Effingham, Ford, Iroquois, Jasper, McLean, Piatt and Vermilion Counties completed ten year plan updates.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K in this report.

**Details concerning Region Four landfills, transfer stations, and compost facilities follow on pages R4.5 through R4.26.**

## Average recycling rate is 20 percent

The Agency does not regulate recycling; however, it does seek current waste generation and recycling information from recycling coordinators statewide. Recycling rates in this region range from 4.6 percent to 28.2 percent.

In Region Four, nine of 19 county recycling coordinators offered data for 2004, a 47.4 percent response rate. Therefore, 52.6 percent of the data is from before 2004.

The region's multi-year average recycling rate is 20 percent. ♦

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD	Tons	Percent
Champaign	168,473	194,569	6.3	43,948	22.6

# Landfills Transfer Stations Compost Facilities

*Re-opening Sangamon Valley Landfill required the efforts of many people with talents in engineering, design, development, and construction. A new landfill cell is being prepared. The closed portion of the landfill shows erosion that required remedial attention.*

**W**ASTE LANDFILLED IN WEST CENTRAL ILLINOIS (REGION Five) during 2004 amounted to only 3.6 percent of the state's total, the lowest in the State.

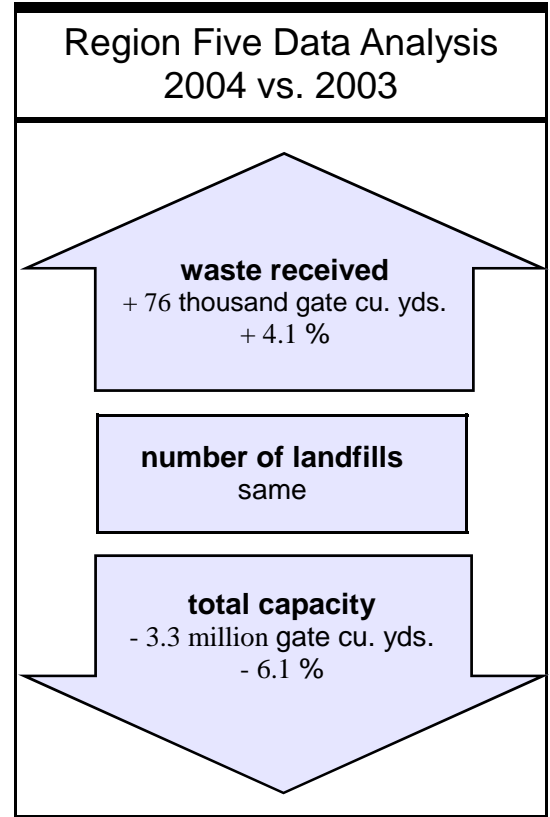

Region Five's five active landfills accepted more than 1.9 million gate cubic yards of waste during 2004. This volume differed slightly from 2003's total waste landfilled by adding 4.1 percent, or an increase of just more than 76,000 gate cubic yards.

**Landfill life exceeds statewide average**

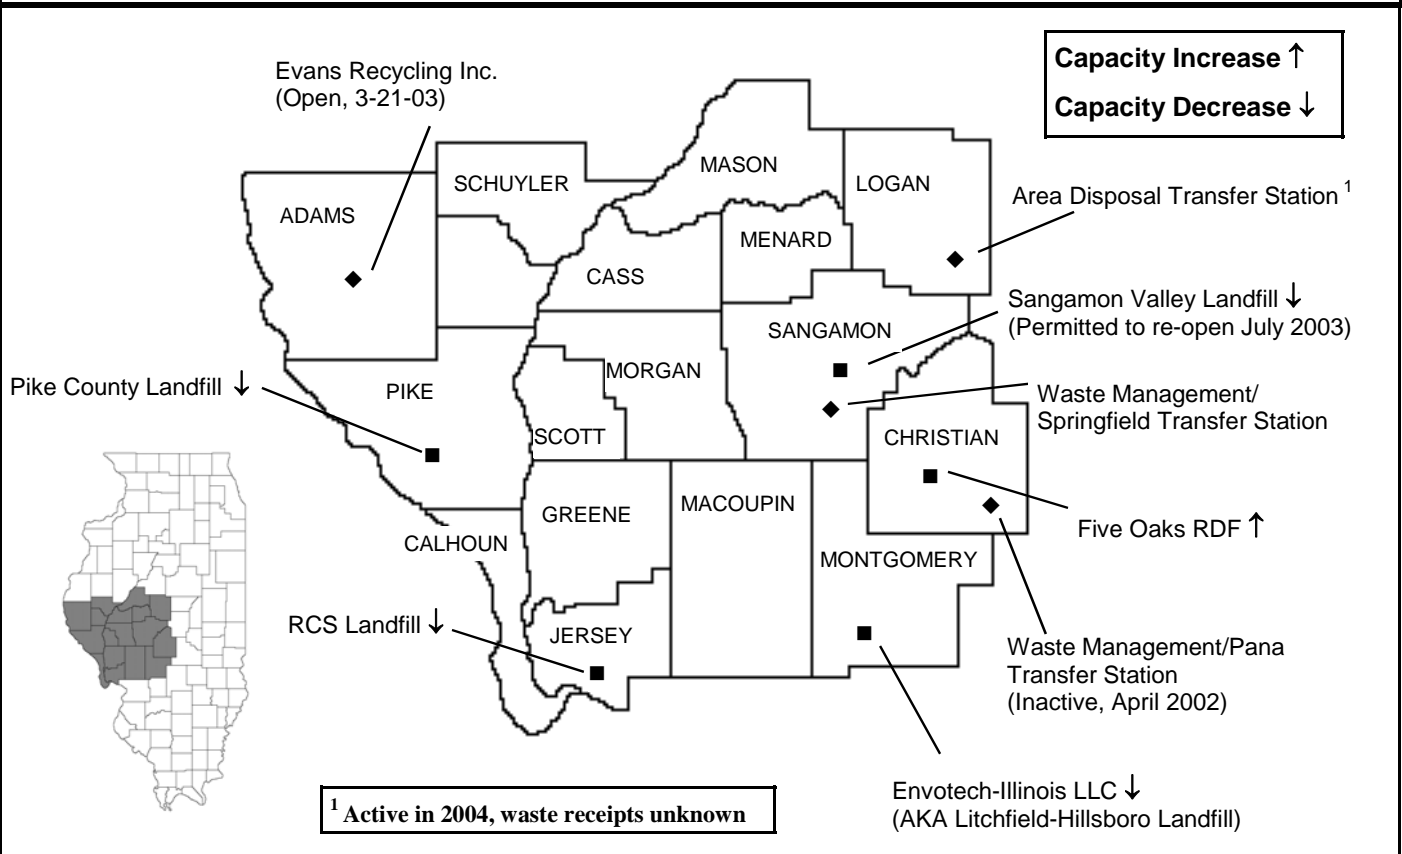

As a region, West Central Illinois has the third most landfill life remaining: 26 years; Southern Illinois (Region 7) at 58 years and Region Three (Peoria/Quad Cities) at 45 years have more years of landfill life remaining. On the low end, Chicago Metropolitan Area (Region 2) has 11 years remaining. The whole state has 18 years of landfill capacity left.

The region's capacity decreased by 3.3 million gate cubic yards as reported on Jan. 1, 2005, a 6.1 percent decline from the previous year.

Five Oaks Recycling and Disposal Facility, Taylorville, is ranked eighth in terms of capacity remaining at Illinois landfills as of Jan. 1, 2005, with 30.2 million gate cubic yards of capacity left.

**Landfills and Transfer Stations: Active and Inactive in 2004**

## Region Five Solid Waste Statistics

**Counties** 17  
**Area (square miles)** 9,408  
**Population (est.)** 562,749

**Landfill life expectancy**  
**Years remaining** 26 \*

**Landfills**  
**Active in 2004** 5

**Transfer Stations**  
**Active in 2004** 3

**Compost facilities**  
**Active in 2004** 1

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Region Five Capacity Increases

Envotech-Illinois LLC 4.1 ac. Cell 7, Phase 2B, opened 12-22-03  
 Pike County LF 5.2 ac. Phases 10 and 11A open on 1-16-04

## Sangamon Valley Landfill re-opened in July 2003

One full year of waste disposal is now available for Sangamon Valley Landfill. It re-opened in the latter part of 2003, under its new operators.

Sangamon Valley Landfill's owners re-activated a site that had been inactive since 1995 (with Illinois EPA's approval) on July 7, 2003, when the operators opened Cell 1A, Area II.

## New cells open at three other landfills

Cell 7, Phase 2B (4.1 acres) opened at Envotech-Illinois LLC, Litchfield, on Dec. 22, 2003. This is in addition to the 4.5 acre cell that opened on May 22, 2002, at this landfill. On Jan. 16, 2004, Pike County Landfill received a permit to operate Phases 10 and 11A, adding 5.2 acres to their permitted disposal area. Additionally, RCS Inc. Landfill, Jerseyville, opened Cell #2 (side slope) and Cell #3A, adding 3.5 acres to their operating disposal area.

## Three counties have delegation agreements

The Illinois EPA has delegated inspection authority to the Christian County Solid Waste Management Department, Montgomery County Coordinated Services Office and Sangamon County Department of Public Health.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA's Springfield field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land.

## Landfills: Waste Accepted 2004; Remaining Capacities Jan. 1, 2005

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>		
Envotech-Illinois LLC * <sup>3</sup>	Litchfield	Montgomery	228,332	41	4,000,000	34	62	2022
Five Oaks RDF	Taylorville	Christian	814,114	19	30,269,000	8	175	2042
Pike County Landfill * <sup>4</sup>	Baylis	Pike	332,599	34	4,825,000	31	72	2019
RCS Landfill	Jerseyville	Jersey	90,538	47	2,915,000	40	23.6	2036
Sangamon Valley Landfill <sup>5</sup>	Springfield	Sangamon	459,739	27	8,636,000	23	74.42	2023
<b>Totals</b>			<b>1,925,322</b>		<b>50,645,000</b>			

\* Two landfills accepted out-of-state waste during 2004 from Iowa and Missouri totaling 36,436 gate cubic yards, or 1.9% of the region's total.

<sup>1</sup> Standing among 52 landfills that accepted waste during 2004.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2005.

<sup>3</sup> Cell 7, Phases 2A and 2B open, 5-22-02 and 12-22-03.

<sup>4</sup> Phases 10 and 11A open, 1-16-04.

<sup>5</sup> Re-opened, July 7, 2003.

(Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2002; these facilities are not included in this report.)

Christian and Montgomery counties each have one active landfill. Sangamon County's landfill was re-activated in 2003.

Sangamon County has an active transfer station; Montgomery County and Christian County do not. Sangamon County also has an active compost facility.

### Transfer station's activity in 2004 is largely Springfield's waste

Only one of Region Five's three transfer stations voluntarily reported accepting municipal waste during 2004. This means that 165,000 tons of waste reported as being transferred tells only part of the story.

Evans Recycling Inc. now operates a landscape waste transfer operation in Quincy. It opened on March 21, 2003.

## Questions and Complaints

Illinois EPA Region Five personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Christian, Montgomery and Sangamon counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

**Illinois EPA**  
**4500 South Sixth Street Road**  
**Springfield, IL 62706**  
**Phone: 217-786-6892**  
**Fax: 217-786-6357**

### Transfer Stations: Waste Handled 2004

	Municipality	County	Tons
Area Disposal TS <sup>1</sup>	Lincoln	Logan	0
Evans Recycling Inc. <sup>1 &amp; 2</sup>	Quincy	Adams	0
Waste Mgt./Springfield	Springfield	Sangamon	165,000
<b>Total</b>			<b>165,000</b>

<sup>1</sup> Active in 2004, waste receipts unknown.

<sup>2</sup> Permitted to develop and operate, 3-21-03.

### One compost site in the region receives landscape waste

Thirteen gate tons of landscape wastes (an amount less than one percent of regional wastes landfilled) were processed through the region's only compost site active in 2004. Dirksen Parkway Compost Facility manages landscape waste generated from the State Capitol complex in downtown Springfield. Its permit was renewed on Sept. 8, 2005.

Quincy Compost Facility, Quincy, was certified closed on July 30, 2003.

### Compost Facilities: Waste Accepted 2004

	Municipality	County	Tons
Dirksen Parkway Compost <sup>1</sup>	Springfield	Sangamon	13
<b>Total</b>			<b>13</b>

<sup>1</sup> Permit renewed, 9-8-05.

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by Brown, Calhoun, Cass, Christian, Greene, Logan, Macoupin, Mason, Menard, Montgomery, Morgan, Pike, Sangamon, Schuyler and Scott Counties.

Additionally, Christian, Jersey, Logan, Menard and Sangamon County completed their ten year plan updates.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

**Details concerning Region Five landfills, transfer stations and compost facilities follow on pages R5.5 through R5.15.**

## Recycling rates range from 1.3 to 48.8 percent, for an average rate of 23.1 percent

The Illinois EPA encourages but does not regulate recycling, and is not obligated to collect and report recycling data; it does, however, as a public service, seek this information from county recycling coordinators.

Seven recycling coordinators (out of 17 counties) in Region Five provided new data for 2004, a 41 percent response rate.

The multi-year average for the full region, which includes recycling data reaching back to 1992, is 23.1 percent. ♦

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD	Tons	Percent
Adams	68,277	74,763	6.0	19,438	26.0

## Region Six: Metropolitan East St. Louis

# Landfills Transfer Stations Compost Facilities

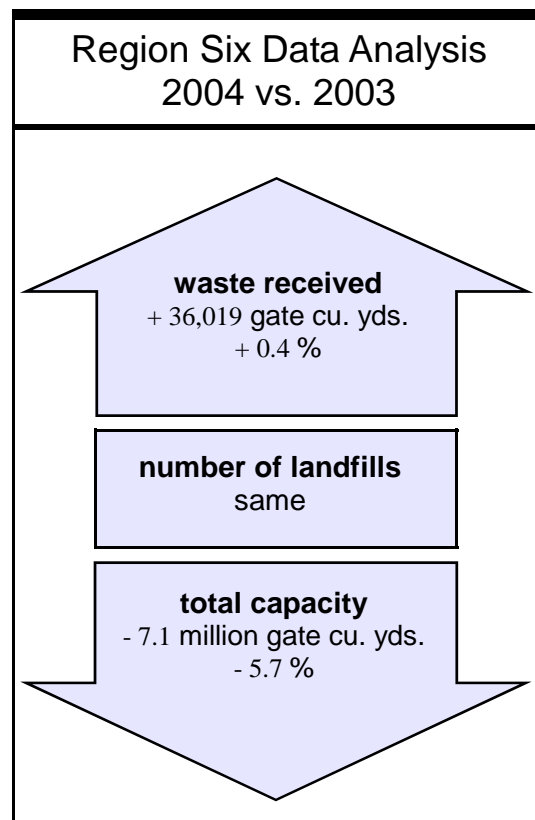

*Many closed landfills such as BFI Modern Landfill Site #2, Belleville, serve as a destination for homeowners to bring their grass clippings, leaves and brush. St. Louis Composting, the new operator, began operations in October 2003.*

**W**HERE A LANDFILL IS LOCATED CERTAINLY DOES matter. Region Six is the closest region to St. Louis, Missouri, and 55.3 percent of its waste came from Missouri and five other states.

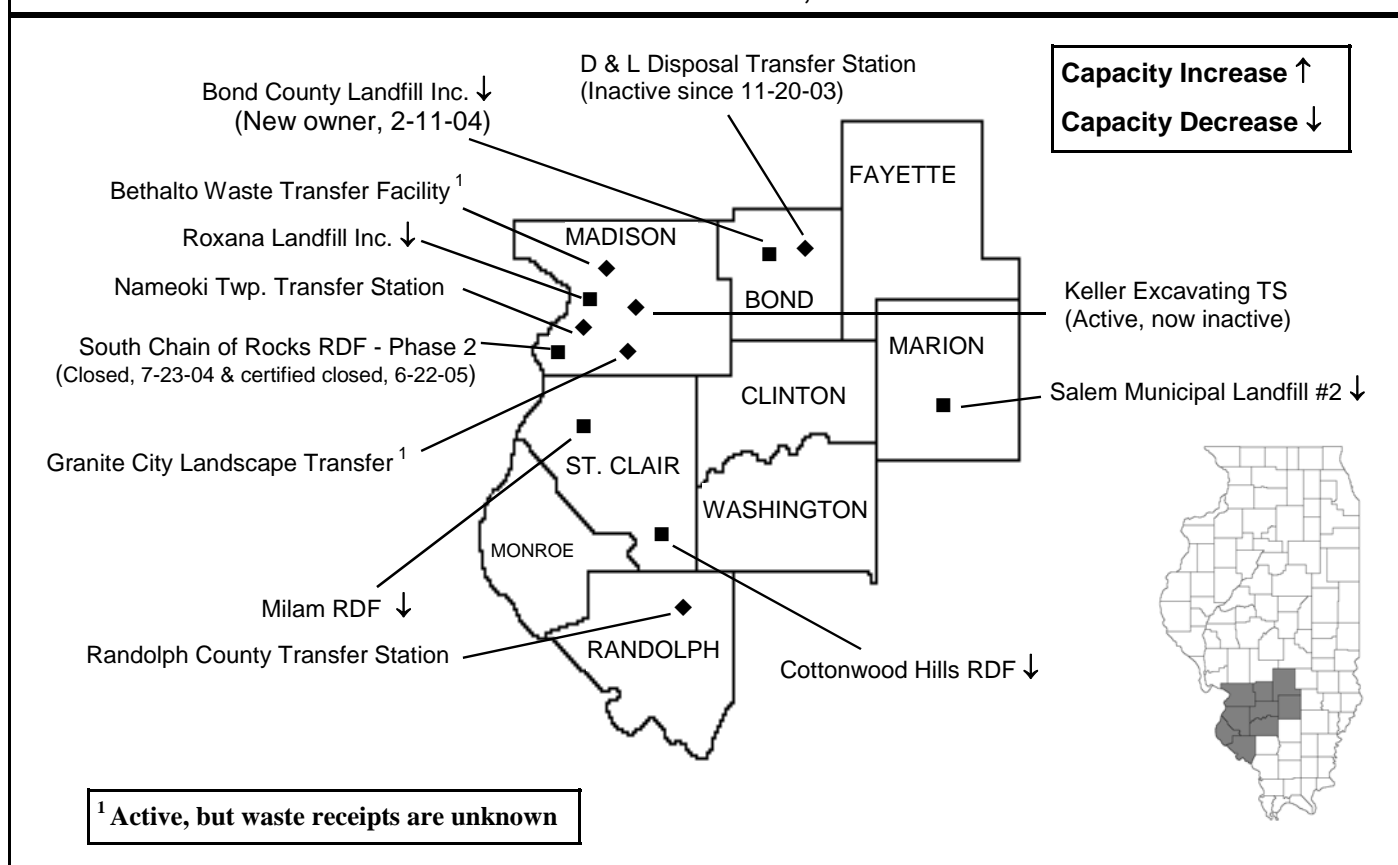

During 2004, six Metropolitan East St. Louis facilities received 17.1 percent of solid wastes landfilled statewide. The amount disposed in 2004 increased less than one percent from the previous year. Almost 9.2 million gate cubic yards of wastes were landfilled in the Metropolitan East St. Louis area in 2004. Figures differed by 36,019 gate cubic yards year to year.

On Jan. 1, 2005, Region Six landfill capacity decreased almost 7.1 million gate cubic yards, or down 5.7 percent from the previous year. Operators in the region reported 13 years of capacity remaining for waste disposal.

The 85 million gate cubic yards of capacity reported on Jan. 1, 2005, by Cottonwood Hills RDF, Marissa, is 72.6 percent of the landfill capacity available in the region. On the lower end, South Chain of Rocks RDF-Phase 2, Granite City, depleted its capacity when it ceased accepting waste on July 23, 2004, and certified closed on June 22, 2005.

### Landfills and Transfer Stations: Active, Closed & Inactive in 2004

## Region Six Solid Waste Statistics

**Counties** 9  
**Area (square miles)** 5,061  
**Population (est.)** 710,514

**Landfill life expectancy**  
**Years remaining** 13 \*

**Landfills**  
**Active in 2004** 6  
**Open into 2005** 5

**Transfer Stations**  
**Active in 2004** 5  
**Inactive in 2004** 1

**Compost facilities**  
**Active in 2004** 6  
**Open into 2005** 5

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Construction of new cells permitted at all six landfills

All six landfills applied for and received permits to construct new cells or areas during 2003 to early 2005. More details about these developments are found on the landfill specification pages that follow this regional overview.

## Expansion permits are approved by Illinois EPA

The Illinois EPA approved on Oct. 16, 2003, a 4.75 million cubic yard vertical expansion at Milam RDF, East St. Louis. At the same site, its Phase IV Northeast expansion received approval on Jan. 26, 2004; and Phase V Northwest area changes received approval on Jan. 5, 2005.

Later on in 2005, at Roxana Landfill Authority, Roxana, a 99.49 acre horizontal and 20.5 million cubic yards air-space vertical expansion received Illinois EPA approval on June 6, 2005.

## Three landfills rank in top 10

Milam RDF had the distinction of ranking 4th in the state in quantities of all the municipal waste disposed during 2004, and Roxana Landfill Inc. ranked 5th. Cottonwood Hills RDF ranked 10th of 52 landfills accepting waste in 2004. These three landfills accepted 95 percent of all of the waste that was landfilled in the region.

## Landfills: Waste Accepted 2004; Remaining Capacities Jan. 1, 2005

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year

So. Chain of Rocks RDF-Phase II * <sup>8</sup>	Granite City	Madison	71,980	48	0	NA	64	2004
<b>Totals</b>			<b>9,129,105</b>		<b>117,050,000</b>			

\* Five landfills accepted waste from six other states during 2004 totaling 5,049,580 gate cubic yards, or 55.3% of the region's total.

<sup>1</sup> Standing among 52 landfills that accepted waste during 2004.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2005.

<sup>3</sup> Mod. #20 opened Phase IIIB (4.3 ac.) on 1-21-05.

<sup>4</sup> Phase 1A South & North approved on 8-26-02 and 11-20-03. Phase 3 Northwest (4.32 ac.) and all of Phase I East slope was open by 12-16-04.

<sup>5</sup> Phase IV NW expansion approved on 2-25-03; 4.75 million cu. yds. vertical expansion approved on 10-16-03; Phase IV NE expansion approved on 1-26-04; Phase V NW approved on 1-5-05.

<sup>6</sup> New modules approved in 2003 and 2004. Vertical expansion (20.5 million air-space cu. yds.) and 99.49 ac. horizontal expansion approved on 6-6-05.

<sup>7</sup> Phase II East approved on 9-24-03; Phase II West approved on 10-4-04.

<sup>8</sup> Ceased accepting waste on 7-23-04; certified closed on 6-22-05.

## More than half of wastes disposed came from six other states

Salem Municipal Landfill #2 was the only active facility in the region that did not accept out-of-state waste. Of the total waste accepted in Region Six, almost 5.1 million cubic yards, or 55.3 percent, originated elsewhere.

Region 6 sites received waste from these states: Arkansas, Iowa, Kansas, Kentucky, Michigan and Missouri.

Landfills and their percentage accepted from other states include: Bond County Landfill (1 percent); Cottonwood Hills (78 percent); Milam RDF (62 percent); Roxana Landfill Inc. (44 percent), and South Chain of Rocks (70 percent).

## Madison and St. Clair counties also conduct inspections

The Illinois EPA has delegated inspection authority to the Madison County Planning and Development Department and the St. Clair County Health Department.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise be performed by the Illinois EPA's Collinsville field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land.

(Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2002; these facilities are not included in this report.)

Both Madison and St. Clair Counties have two active landfills each. Both counties also have compost facilities, but only Madison County has transfer stations (four).

## Five transfer stations were open for business, and two voluntarily reported

Two of the five transfer stations in Region Six voluntarily reported that 126 tons were transferred during 2004. The amount of waste transferred by these facilities is underrepresented, because three of them did not report.

Transfer Stations: Waste Handled 2004			
	Municipality	County	Tons
Bethalto Waste Transfer <sup>1</sup>	Bethalto	Madison	0
Granite City Landscape <sup>1</sup>	Granite City	Madison	0
Keller Excavating TS <sup>2</sup>	Edwardsville	Madison	91
Nameoki Township	Granite City	Madison	35
Randolph County Trans. Stn.	Sparta	Randolph	0
<b>Total</b>			<b>126</b>

<sup>1</sup> Active in 2004, but waste receipts unknown  
<sup>2</sup> Active in 2004, now inactive

## Questions and Complaints

Illinois EPA Region Six field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Madison and St. Clair counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

**Illinois EPA**  
**2009 Mall St.**  
**Collinsville, IL 62234**  
**Phone: 618-346-5120**  
**Fax: 618-346-5155**

**Madison County Planning and Development Dept.**  
**157 N. Main, Suite 254**  
**Edwardsville, IL 62025-1964**  
**Phone: 618-692-7040 Ext. 4663**  
**Fax: 618-692-8982**

**St. Clair County Health Department**  
**19 Public Square, Suite 150**  
**Belleville, IL 62220-1624**  
**Phone: 618-233-7769**  
**Fax: 618-236-0676 or 618-233-7713**

Expansion approved after Jan. 1, 2005 figure was calculated

Landfill	Details
Roxana Landfill Authority, Roxana	99.49 ac. horizontal and 20.5 million air space cu. yds. vertical

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all the Region Six counties.

Additionally, Madison, Monroe and St. Clair counties have also completed ten year plan updates.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

**Details concerning Region Six landfills, transfer stations and compost facilities follow on pages R6.5 through R6.23.**

## BFI Modern Landfill Compost Facility Site #2 leads

St. Louis Composting (the new operator at Belleville's only compost facility) accepted 53,775 tons of landscape waste in 2004. It accepted 254 more tons than second-ranked Thelen Sand and Gravel Site #1, Antioch. Both sites handled 14 percent of the amount that was composted in Illinois during 2004.

The six compost facilities in the region processed 100,990 gate tons of landscape waste in 2004. The region's sites handled 26 percent of the total landscape waste received for composting in Illinois.

Centralia Landscape and Waste Recycling, Centralia, closed on Nov. 5, 2004, and was certified closed on Jan. 11, 2005, so only five sites were open into 2005.

### Compost Facilities: Waste Accepted 2004

	Municipality	County	Tons
BFI Modern Landfill	Belleville	St. Clair	53,775
Centralia Landscape <sup>1</sup>	Centralia	Marion	752
Milam RDF	East St. Louis	St. Clair	36,405
Nashville Municipal	Nashville	Washington	223
Roxana Landfill Compost <sup>2</sup>	Roxana	Madison	9,005
Salem Municipal Landfill #2	Salem	Marion	830
<b>Total</b>			<b>100,990</b>

<sup>1</sup> Ceased accepting waste, 11-5-04 and certified closed, 1-11-05

<sup>2</sup> Compost site expansion approved, 3-8-04.

## Recycling rates varied from 2.1 to 35.2 percent

The Illinois EPA encourages but does not regulate recycling, and is not obligated to collect and report recycling data; it does, however, as a public service, seek this information from county recycling coordinators. Eight of the nine counties in the region voluntarily responded to the recycling survey in 2004.

Recycling rates in Region Six ranged from 2.1 percent to 35.2 percent. The regional average recycling rate was 26.8 percent. ◆

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD	Tons	Percent

# **Landfills Transfer Stations Compost Facilities**

## **Waste on Earth**

There is a lot of waste on our planet. There are piles and piles of waste all over the world. One thing you could do to help save your world is recycle things: like paper, plastic and aluminum. To recycle, you can collect those items and take them to your nearby facility. When you take those items to the facility, they crush them and make them into new ones. My family saves aluminum cans and takes them to a facility, but on the way, I see a lot of piles of waste that are from people just throwing away instead of recycling and reusing.

Another thing you can do is to reuse some items. For example, you can cut off the top of a 2-liter soda bottle and plant a flower or a plant in it with dirt. You could also take some pieces of old glass and put them together in a cool design and make a window ornament. There are a lot of things you can do to reduce the amount of waste on our planet. After you read my essay, you can see that you can make a difference in our world.

**Kim Whitfield** - Oak Grove East School, Bartonville

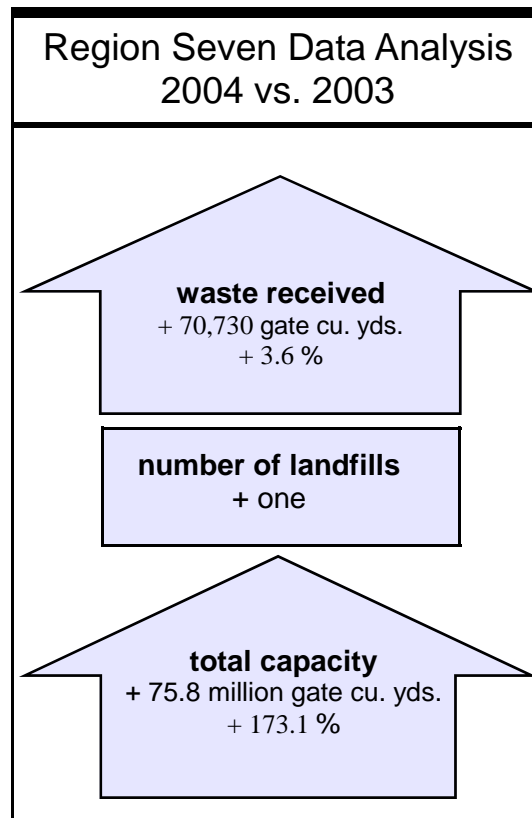

**R**EGION SEVEN'S FIVE ACTIVE LANDFILLS ACCEPTED 2.0 million gate cubic yards of waste during 2004. This volume was up 3.6 percent, or 70,730 gate cubic yards more than 2003's total.

In terms of landfill life in years, Region Seven had the most, 58 years.

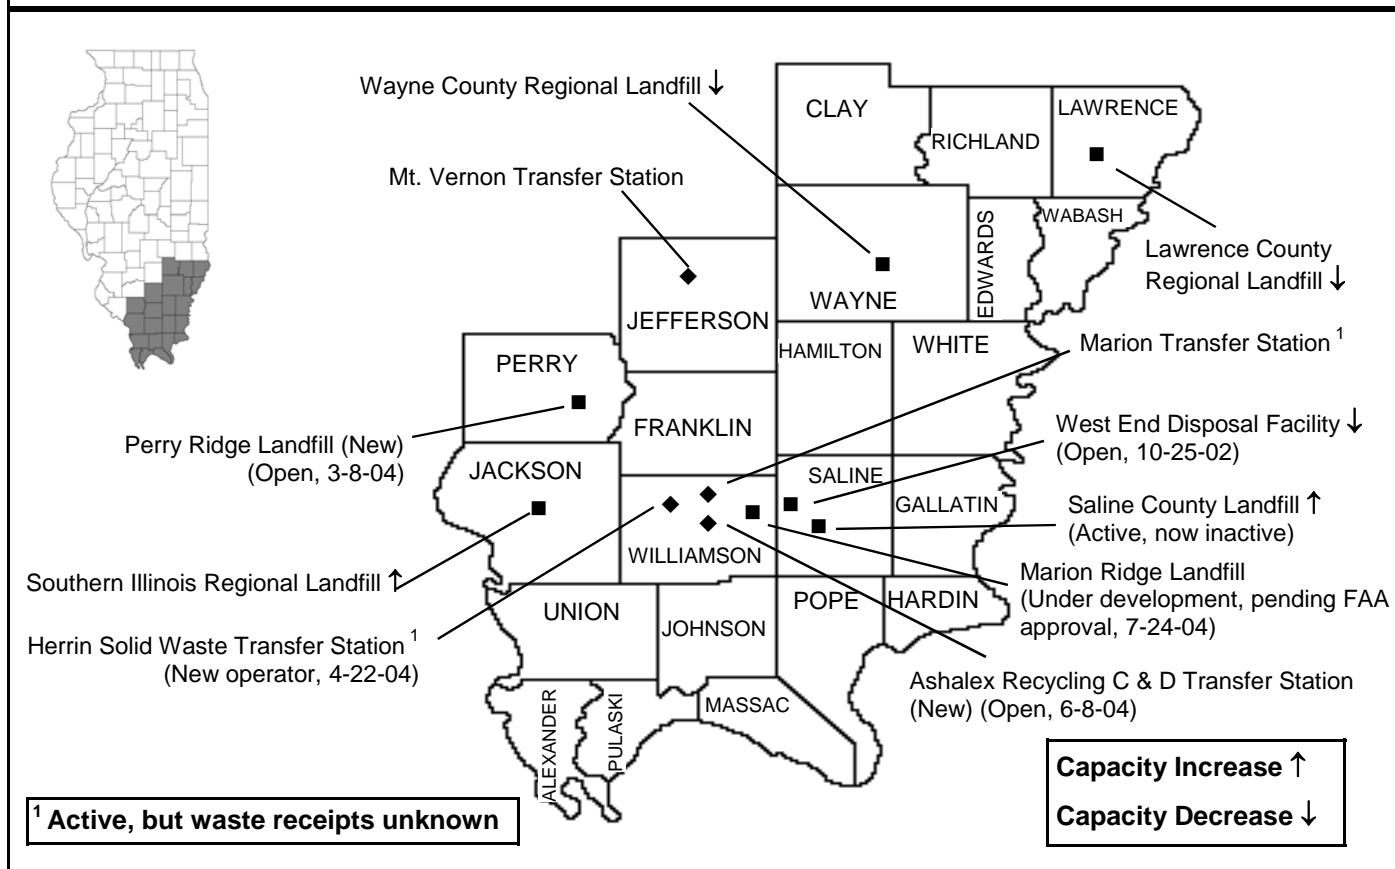

Southern Illinois Regional Landfill, near DeSoto, stayed at 11th place in waste disposal ranking of all State landfills in 2004, and accounted for nearly 64.5 percent of the waste landfilled in the region during the year.

Of the 1.3 million gate cubic yards of waste received by Southern Illinois Regional Landfill in 2004, 489,682 gate cubic yards, or 37 percent, came from Arkansas, Kentucky and Missouri. Lawrence County Regional Landfill, Sumner, accepted 72,311 gate cubic yards or 31 percent of its waste in 2004 from Indiana. Saline County Landfill Inc., Harrisburg, and West End Disposal Facility, Thompsonville, accepted seven and six percent of their waste, respectively, from Kentucky.

The regional percentage of imported waste is 28.2 percent, considerably less than Region Six (Metropolitan East St. Louis), where out-of-state waste comprised 55.3 percent of total waste landfilled. The state-wide average of imported waste is 13 percent.

### Landfills and Transfer Stations: Active, Inactive & Under Development in 2004

## Region Seven Solid Waste Statistics

**Counties** 22  
**Area (square miles)** 8,421  
**Population (est.)** 435,482

**Landfill life expectancy**  
**Years remaining** 58 \*

**Landfills**  
**Active in 2004** 6  
**Open into 2005** 6  
**New in 2002** 1  
**New in 2004** 1

**Transfer Stations**  
**Active in 2004** 4

**Compost facilities**  
**Active in 2004** 2  
**New in 2004** 1

\* Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Three landfills boost capacity

As of Jan. 1, 2005, the region's landfills reported a total capacity of 119.6 million gate cubic yards. Three of the region's landfills contain 81.2 percent of the capacity available in the region for waste disposal thus they are 6th, 9th, and 10th of all the State's 51 landfills reporting remaining capacity.

The largest of these landfills, Southern Illinois Regional Landfill, has almost 51.2 million cubic yards of capacity available. On July 2, 2004, this landfill's South Unit lateral expansion was approved. The landfill contains 143.3 acres and will bring to the region 20.6 million more in-place cubic yards of landfill capacity.

## Landfills open in Perry and Saline Counties

The need for more capacity in Region Seven is appeased for the time being by the opening of two landfills: West End Disposal Facility, Thompsonville, on October 25, 2002 and Perry Ridge Landfill, DuQuoin on March 8, 2004.

West End Disposal Facility expects to operate for 28.3 years. The landfill has an initial design capacity of 14.5 million airspace cubic yards.

Perry Ridge Landfill expects to operate for 23 years. This landfill has an initial design capacity of 14.9 million airspace cubic yards.

Saline County Landfill had been active during part of 2004, however, it was temporarily closed on Feb. 22, 2004. On Aug. 19, 2004, a 28.9 acre lateral expansion of the landfill was approved for development, increasing future disposal capacity by 3.1 million cubic yards. The site remains inactive as it prepares itself to accept waste.

A landfill in Marion is proposed to be developed, however it needs FAA review and action before construction takes place.

## Landfills: Waste Accepted 2004; Remaining Capacities Jan. 1, 2005

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>

<b>Totals</b>			<b>2,033,859</b>		<b>119,597,000</b>			

\* Four landfills accepted out-of-state waste from Arkansas, Indiana, Kentucky and Missouri during 2004, totaling 573,590 gate cubic yards, or 28.2% of the region's total.

<sup>1</sup> Standing among 52 landfills that accepted waste during 2004.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2005.

<sup>3</sup> Operation of Cell 3 approved 11-26-02.

<sup>4</sup> Permitted to operate, 12-12-03. Started accepting waste, 3-8-04.

<sup>5</sup> Unit 2 (28.9 acres) lateral expansion (3.1 million in-place cu. yds.) approved on 8-19-04; site temporarily closed, 2-11-04.

<sup>6</sup> South unit lateral expansion approved on 7-2-04 (143.3 ac. and 20.6 million in-place cu. yds.).

<sup>7</sup> Permit to open, 10-24-02.

UD = Under Development during 2004, pending FAA approval.

## County agencies inspect facilities; investigate dumping

The Illinois EPA has delegated inspection authority to local governments in Jackson, Perry and Wayne counties. A multiple county delegated partner is Ambraw Valley Solid Waste Agency that inspects Lawrence County Regional Landfill and several closed sites in Crawford, Lawrence and Richland counties.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA's Marion field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. (Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2002; none of which are included in this report.)

## Transfer station activity is underrepresented

In 2004, even though there are only four active transfer stations, they nevertheless play an important role. One facility voluntarily reported handling 120 tons of municipal waste during 2004. Actual amounts of waste received at three other active transfer stations is not known.

Transfer Stations: Waste Handled 2004			
	Municipality	County	Tons
Ashalex Recycling C & D TS	Marion	Williamson	120
Herrin Solid Waste <sup>1</sup>	Herrin	Williamson	0
Marion Transfer Station <sup>1</sup>	Marion	Williamson	0
Mt. Vernon TS <sup>1</sup>	Mt. Vernon	Jefferson	0
<b>Total</b>			<b>120</b>

<sup>1</sup> Active in 2004, but waste receipts unknown.

## Ashalex Recycling Compost Site open in Marion

The region's two compost facilities reported handling 1,376 tons of landscape waste, 11 percent less than the amount accepted in the previous year.

A new compost site, Ashalex Recycling Compost Site, Marion opened on Sept. 1, 2004.

Compost Facility: Waste Accepted 2004			
	Municipality	County	Tons
Ashalex Recycling Compost <sup>1</sup>	Marion	Williamson	460
New Earth	Carterville	Williamson	916
<b>Total</b>			<b>1,376</b>

<sup>1</sup> Open, 9-1-04

## Questions and Complaints

Illinois EPA Region Seven field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Crawford, Jackson, Perry, Lawrence, Richland and Wayne counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation data. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by Clay, Edwards, Franklin, Gallatin, Hardin, Jackson, Jefferson, Lawrence, Massac, Perry, Pope, Richland, Saline, Union, Wabash, Wayne, and White Counties.

Ten year plan updates have been completed by Lawrence and Richland Counties.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

**Details concerning Region Seven landfills, transfer stations and compost facilities follow on pages R7.5 through R7.17.**

## Average recycling rate is 14.6 percent

The Agency does not regulate recycling nor does it possess any mechanism to compel county recycling coordinators to respond to Agency surveys seeking current recycling rates, or otherwise attest to the viability of local recycling programs.

Recycling rates in Southern Illinois were the lowest of all seven regions, because of its location and distance to markets for the recyclable materials. Rates ranged from 3.4 to a high of 35.0 percent, yielding a multi-year average of 14.6 percent.

Eight of 22 counties in the region offered data for 2004. This would be a survey response rate of 36 percent. ♦

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled

# Solid Waste Landfills

## Appendices A, B, C & D

*Waste placed in a cell at Prairie View Recycling and Disposal Facility, Joliet, is covered by a layer of soil at the end of each operating day. This landfill is located at the former Joliet Arsenal. An 8.06 acre area opened in January 2004; and another 5.76 acre area opened the following March.*

15. Supplementary Notes			
16. Abstract (Limit 200 words)  This 18th annual report on municipal solid waste disposal and remaining landfill capacity is arranged by Illinois EPA administrative regions. Featured are specification pages describing the chief characteristics of 57 municipal solid waste landfills; their status (active, inactive, closed, under development); locations and hours of operation; tipping fees; quantities of wastes received in 2002, 2003 and 2004; remaining capacities on Jan. 1, 2004, and Jan. 1, 2005; solid waste management fees paid in 2004; names, addresses and phone numbers of landfill owners and operators. Quantities reported by landfills are given in gate cubic yards; as a convenience to the reader, those volumes are divided by 3.3 to provide rough equivalents in tons. The report also includes scaled-down specifications for 103 municipal solid waste transfer stations and 47 compost facilities.  During 2004, 52 landfills reported receiving 53.8 million gate cubic yards of waste. This volume was almost 3.3 million gate cubic yards less than the total received during 2003, a 5.8 percent increase. As of Jan. 1, 2005, 51 landfills reported remaining capacities totaling 986.5 million gate cubic yards, or 311.8 million gate cubic yards more than on Jan. 1, 2004, an increase of 46.2 percent. Dividing wastes disposed during 2004 by capacity remaining on Jan. 1, 2005, suggests a landfill life expectancy in Illinois of 18 years, at current (2004) disposal rates, barring capacity adjustments, until capacity is depleted.
