

# Nonhazardous Solid Waste Management and Landfill Capacity in Illinois: 2005

# Nonhazardous Solid Waste Management And Landfill Capacity In Illinois: 2005

Reporting period for waste disposal: Jan. 1 to Dec. 31, 2005  
Reporting date for landfill capacity: Jan. 1, 2006

This report has been prepared for the Governor of the State of Illinois and the General Assembly  
in accordance with Section 4 of the Illinois Solid Waste Management Act.

# Additional Information and Acknowledgements

## How to Obtain Additional Information

To learn more about municipal solid waste landfills, transfer stations or compost facilities in Illinois, please call 217-785-8604, or write to:

Illinois Environmental Protection Agency  
Bureau of Land  
Division of Land Pollution Control  
Waste Reduction and Compliance Section  
P.O. Box 19276  
Springfield, IL 62794-9276

Our Internet address is <http://www.epa.state.il.us>

When using courier services (UPS, Airborne, etc.), please use the following street address and zip code:

1021 North Grand Avenue East  
Springfield, IL 62702

## Acknowledgements

This document is produced and published by the Illinois Environmental Protection Agency, Douglas P. Scott, Director. Primary Editor was Ellen Robinson of the Waste Reduction and Compliance Section, Bureau of Land.

The report is printed in the Agency's print shop. Many thanks to Tom Davis who provided publishing advice to the Primary Editor. Dennis McMurray and Nina Dugger provided editing. Excellent typing and design was provided by Judy Brubaker, the Section's administrative support. Posters were from fifth and sixth graders from Illinois schools who won our 2003-2004 contest. Full length, fold-out State of Illinois and Chicago Metropolitan area maps were designed by Ted Prescott using GIS software.

Illinois EPA Bureau of Land personnel contributed their time and expertise to the development of this publication. Computer data calculation was provided by Darrel Watkins. Assistance with technical matters regarding permitting and inspecting was provided by Tom Hubbard, Gary Cima, Gary Steele and Imran Syed. Photos were chosen by Gary Steele and Ellen Robinson. Todd Marvel is our used tire expert. Cheryl Stinnett collected data regarding transfer stations.

The Agency also wishes to thank the staff of the 18 delegated counties, plus Ambraw Valley Solid Waste Agency and the City of Chicago who inspect and have first-hand knowledge of approximately 50 percent of the landfills, transfer stations and compost sites covered in this report. Staff from our seven regional offices and delegated partners are responsible for inspecting all Agency-permitted waste management facilities.

The capacity remaining in Illinois landfills as of January 1, 2006, decreased slightly, less than one percent. The available space overall should serve the State's residents for at least another 19 years. In this, the Agency's 19th annual report on landfill disposal and available landfill capacity in Illinois, we report to you not only the remaining capacity, but many other useful facts about landfills and pollution control facilities throughout the state.

Since its inception thirty-five years ago, the Illinois EPA has overseen the development and operation of a productive system of modern sanitary landfills. The Agency continues to ensure that these facilities meet the strictest disposal standards in history, and that they are engineered to be fully protective of human health and the environment, especially where it concerns any possibility of groundwater contamination.

In 2005, the number of active landfills in Illinois accepting waste was 51. Years of waste disposal remaining for these landfills, however, varied tremendously from region to region; ranging from nine years in the Chicago Metropolitan area to 51 years in Southern Illinois.

During 2005, Indian Creek Landfill #2, Hopedale, received a significant modification permit and re-opened. Two other landfills remain under development in Atkinson and Marion.

Roxana Landfill Inc. was allowed to expand both vertically and horizontally on June 6, 2005. On June 8, 2006, Lee County Landfill, Dixon, was permitted to expand.

Kankakee Recycling & Disposal Facility, Chebanse, ceased accepting waste on November 18, 2005. RCS Landfill Inc., Jerseyville, decided for business reasons to de-activate their landfill on April 28, 2006. These activities of landfill operators to close landfills affect the local governments who rely on revenue from landfill fees to fund recycling programs.

In 2005, 102 active transfer stations and 40 active compost facilities are available to help manage waste generated in Illinois.

Inspections of waste management facilities are conducted by personnel from Illinois EPA's seven regional field offices and our delegated partners. Our delegated partners include 18 counties, Ambraw Valley Solid Waste Agency and the City of Chicago. They have the authority to inspect landfills, transfer stations and compost sites in their jurisdictions, and investigate citizen complaints about illegal dumping of waste.

The Illinois EPA hopes you will find this information useful and instructive and welcomes your comments and suggestions as to how it may be improved.

*Douglas P. Scott*  
Director  
Illinois EPA

## How to Use the Illinois EPA Landfill Capacity Report

Nonhazardous Solid Waste Management and Landfill Capacity in Illinois is Illinois EPA's annual report describing the management of nonhazardous municipal solid waste by the State's solid waste landfills, transfer stations and compost facilities. The report is divided into sections representing Illinois EPA's administrative regions. [Region 1](#) includes Northwestern Illinois counties; [Region 2](#) includes Chicago Metropolitan counties; [Region 3](#) includes Peoria/Quad Cities area counties; [Region 4](#) includes East Central Illinois counties; [Region 5](#) includes West Central Illinois counties; [Region 6](#) includes Metropolitan East St. Louis area counties; and [Region 7](#) includes Southern Illinois counties.

Each regional section includes newly designed specification pages describing the chief physical characteristics of each landfill. Provided are: its location and hours of operation, tipping fee, quantities of wastes received for the last three years, the landfill's certified remaining capacity (in gate cubic yards) for the last two reporting dates, solid waste management fees paid in 2005, the Agency regional field office or delegated local authority that inspects the facility, and the name, address and phone number of the landfill's owner and operator. Similar, but scaled down, specification pages are included for each transfer station. In all, this report includes details of 55 landfills, 104 transfer stations and 44 compost facilities. Those sites included were permitted to and accepted some waste in 2003, 2004 and/or 2005.

Landfill details are found in [Appendices A through D](#); transfer station details are found in [Appendices E through G](#); landscape waste compost facility information is found in [Appendices H through J](#); the contact list for local (county) solid waste planning and recycling coordinators is found in [Appendix K](#); in [Appendix L](#), information is found about updated local (county) solid waste plans; and information about local municipal waste generation and recycling is found in [Appendix M](#).

Additionally, this 19th edition of the report contains a [state map designed with GIS software showing locations of Illinois landfills](#). A [Chicago Metropolitan area map](#) also shows the locations of transfer stations in addition to the location of landfills.

## Executive Summary

**T**HIS IS THE ILLINOIS EPA'S 19TH ANNUAL REPORT describing the management of nonhazardous municipal solid waste by the state's solid waste landfills, transfer stations and compost facilities.

The report is divided into sections representing Illinois EPA administrative regions. Each regional section includes specification pages describing the chief physical characteristics of each landfill.

The list of active waste management facilities during 2005 includes 51 landfills, 102 transfer stations and 40 compost sites.

Illinois municipal solid waste landfills are required to report to the Illinois EPA the quantities of solid waste they receive each year, and to calculate and report the amount of remaining capacity on the first day of the following year.

During 2005, 51 landfills reported receiving a total of almost 52.3 million gate cubic yards (more than 15.8 million gate tons) of waste. This volume was almost 1.5 million gate cubic yards less than the total received during 2004, a 2.7 percent decline.

As of Jan. 1, 2006, 51 landfills reported having a combined remaining capacity of almost 980.4 million gate cubic yards (almost 297.1 million gate tons), or almost 6.1 million gate cubic yards less than on Jan. 1, 2005, a decline of less than one (0.6) percent.

Dividing wastes disposed during 2005 by capacity remaining on Jan. 1, 2006, indicates an overall landfill life expectancy in Illinois of 19 years at 2005 disposal rates and barring capacity adjustments.

A new landfill in Region 3: Indian Creek Landfill #2, Hopedale, is open. One landfill, Kankakee RDF, Chebanse closed in November 2005. Expansions were approved at Lee County Landfill, Dixon, and at Roxana Landfill Inc., Roxana, in 2005.

**Nonhazardous  
Solid Waste Management  
And Landfill Capacity**

**2005**

**M**UNICIPAL SOLID WASTE IS THE TERM USED TO DESCRIBE the garbage discarded by America's households, stores, offices, factories, restaurants, schools and other institutions. "Discarded" most often, in Illinois, means disposed in Agency-permitted landfills. Waste is also handled through other alternative means of solid waste management, such as recycling and composting, after it is collected.

The US EPA's *Municipal Solid Waste in the United States: 2003 Facts & Figures* says that nationwide 55.4 percent of solid waste was landfilled, 23.5 percent was recycled, 7.1 percent was composted and 14 percent was incinerated. The 2003 report is the latest one published by US EPA.

In 2005, Illinois landfills accepted almost 52.3 million gate cubic yards of solid waste. Most Illinois waste was discarded in landfills within our borders. Wastes entering or leaving Illinois are not believed to noticeably affect this equation. Of all solid waste landfilled in Illinois in 2005, 13 percent, or almost 7.0 million cubic yards or 2.1 million tons, accepted by 25 landfills came from 10 other states. We know this because Illinois landfills have reported these quantities on a quarterly basis to the Illinois EPA since 1992. Waste haulers are not required to report how much Illinois waste they transport to landfills in other states or from which counties in Illinois waste is transported.

## Almost 7.7 million tons of municipal waste is recycled

Much of Illinois is rural and far from recycling markets. Most local governments provide recycling education and collect recycling data from haulers as a public service.

Local recycling coordinators in Illinois, in 2005, voluntarily reported that almost 7.7 million tons of municipal waste were recycled. Total municipal waste generated was reported at 18.5 million tons.

Most of the heavily populated counties in the Chicago Metropolitan and Metropolitan East St. Louis areas voluntarily report recycling and waste generation figures annually. Recycling markets and public interest in recycling are high there.

There is at present no mechanism in the State of Illinois law that requires permitting for or reporting from recycling centers that do not already transfer other municipal waste types from transfer stations to landfills.

## \$75,000 Grant Keeps Illinois Beautiful

Keep Illinois Beautiful's President Joyce Kagan Charmatz accepted a ceremonial check from Illinois EPA's Director on May 10, 2005. Funding for this \$75,000 grant came from enforcement penalties.

Each of 13 affiliates will receive \$5,000 to be used for environmental education, waste reduction (reducing litter and increasing recycling), beautification and community improvement. The rest will support the organization and its web site. The organization's mission is to provide environmental education, public awareness and community involvement, keeping Illinois clean and green.

Region 1: Winnebago/Rockford Clean & Beautiful; Region 2: Elgin Proud & Beautiful, Keep Chicago Beautiful, Keep Evanston Beautiful Inc., Keep Oak Park Beautiful, and Keep West Cook Beautiful; Region 3: Keep Rock Island Clean & Beautiful Inc. and Peoria City Beautiful; Region 4: Keep Vermilion County Beautiful; Region 6: Keep Centralia Beautiful Clean & Green, Keep Salem Beautiful and Keep Mt. Vernon/Jefferson County Beautiful; Region 7: Keep Carbondale Beautiful Inc.

For more information, contact Joyce Kagan Charmatz at 312-863-6196.

## 2005 Annual Report

### Topics Covered

- Waste disposed in landfills, 2003-2005 (in gate cubic yards and in gate tons)
- Specification pages for 55 landfills, 104 transfer stations and 44 compost sites
- Waste handled by transfer stations, 2003-2005 (in tons)
- Remaining disposal capacity as of Jan. 1, 2005, and Jan. 1, 2006 (in gate cubic yards)
- Waste generated and recycled, 2005 (in tons)
- Waste composted, 2003-2005 (in tons)

## Burn Barrels Outreach Campaign

Illinois EPA began a Burn Barrel Public Education Campaign in September 2004 with funding from US EPA. The goal of this 10-week initiative was to educate the public about the environmental hazards of burning household waste and help them find alternative disposal options. The campaign consisted of newspaper advertisements and radio spots targeted in various parts of Illinois.

Local governments, including Solid Waste & Recycling Coordinators and delegated agencies, became a great asset for us in promoting this public education campaign. Federal resources combined with State and local partnerships could influence some citizens to make better choices for waste disposal.

Two newspaper ads may include local contact information, and may be placed in local newspapers. Our web site, <http://www.Illinoisburnbarrels.org> could link to yours. Newly revised Illinois EPA brochures are also available to distribute. ♦

## State Environmental Program Fees altered as of July 1, 2003

In 2003, the Illinois General Assembly approved Governor Rod R. Blagojevich's proposal for new and increased fees for several types of environmental programs operated by Illinois EPA to implement federal and state regulations. The fees impacted a wide range of facilities, including landfills.

Those fees are authorized under Senate Bill 1903 (Public Act 93-32, signed into law on June 20, 2003), and the fees became effective on July 1, 2003, at the beginning of the state fiscal year.

Municipal waste landfill operators currently pay two fees based upon the volume of waste received each year. Both of these fees (Solid Waste Surcharge and Subtitle D Fee) were increased beginning with the waste received on July 1, 2003 and there after.

The amount of the fee depends upon the total waste volume received in a calendar year. Operators receiving more than 150,000 cubic yards of waste annually have the option of measuring waste by volume (cubic yards) or weight (tons) to decide which unit to use in calculating the fee payment. Operators that receive less than 150,000 cubic yards in a year would fall into one of four other fee payment categories (see table below).

Permit-holders are aware that failure to pay fees when they are due could result in a referral to the Attorney General's Office and potential penalties, pursuant to statute.

Additional information or assistance is available by contacting Kevin Mably, Accountant, Bureau of Land, Planning and Reporting Section, Financial Management Unit, at 217-785-8604.

Solid waste surcharges paid to units of local governments at this time remain the same as those described in the (Illinois) Environmental Protection Act, Section 22.15(j).

### State Solid Waste Surcharge Fees

<b>Landfills Receiving:</b>	<b>now pay a solid waste fee of:</b>	<b>and also Subtitle D Fees</b>
Greater than 150,000 cu. yds./yr.	\$2.00/ton or \$0.95/cy	\$0.22/ton or \$0.101/cy
Between 100,000 and 150,000 cu. yds./yr.	\$52,630	\$7,020
Between 50,000 and 100,000 cu. yds./yr.	\$23,790	\$3,120
Between 10,000 and 50,000 cu. yds./yr.	\$7,260	\$975
Less than 10,000 cu. yds./yr.	\$1,050	\$210

## Cost to build landfills require investments

Developing a landfill requires enormous investments in land and equipment totaling millions of dollars, plus engineering expenses, fees to state and local governments, taxes, typical operating costs and additional millions set aside for post-closure care. Consideration will need to be made of costs to design, build, permit, operate, and conduct post-closure care at a landfill.

Consideration of costs include those in the pre-development stage, for site development and site operation, closure and post-closure care and financial assurance.

## Landfills are developed cell by cell

Landfills are divided into sections called phases or cells, which are developed as needed, filled systematically so that specific loads of waste can be located weeks or months later, and covered with soil or other materials to prevent the spread of odors and problems with vermin.

Trucks arriving at a landfill are inspected for prohibited nonhazardous wastes and for hazardous wastes that Illinois bans from landfilling including: bulk liquids, landscape wastes, lead acid batteries, potentially infectious medical waste, used motor oil, white good components and whole used tires. Loads are weighed and details about them are recorded. They are then taken to the exposed portion of the active cell, which is known as the working face.

Trucks empty their loads at the working face, where specially designed bulldozers spread and compact the waste, crushing it to eliminate air pockets and squeezing it into the smallest space possible.

A ranking of these active facilities ([Appendix C](#)) finds the top five landfills received 43.9 percent of waste landfilled in Illinois. This unequal distribution of waste creates a difference between an *average* landfill, which would have accepted almost 1.0 million gate cubic yards (about 311 thousand gate tons) of waste, and a *median* landfill, which would have received about 395 thousand gate cubic yards (about 120 thousand gate tons).

## Three landfill closings affect capacity

Three landfills reached their capacity limit and closed their gates during 2003, 2004 and 2005. In Region 1: Freeport Municipal Landfill #4 ceased accepting waste in April, 2003. In Region 2: Kankakee Recycling and Disposal Facility ceased accepting waste on Nov. 18, 2005. In Region 6: South Chain of Rocks RDF ceased accepting waste on July 23, 2004, and declared certified closure on June 22, 2005.

Streator Area Landfill #3, Streator, had a horizontal expansion of 4.7 million cubic yards of airspace under review, but chose to temporarily close on April 9, 2005. On April 28, 2006, the landfill in Jerseyville went inactive, for business reasons.

## New funding to crack down on illegal dumps

Governor Rod Blagojevich recommended a Fiscal Year 2006 Budget for the Illinois Environmental Protection Agency (IEPA) that includes \$5.5 million for Project IRID (Illinois Removes Illegal Dumps), a new initiative that will shut down open dumps, crack down on landfill violators and regulate construction debris disposal sites. The new initiative will be paid for by using a portion of existing fees paid by landfills.

The new IRID funding allots \$1.5 million for additional IEPA landfill inspection and enforcement staff who will take on new responsibilities for regulating an estimated 500 abandoned quarries and sand pits in Illinois that are used for disposal of construction and demolition waste.

An additional \$1 million would be used for increased grants to county governments that help inspect landfills and open dumping. The remaining \$3 million would go toward cleaning up the estimated 600-900 open dumps across the state where responsible parties cannot be found, and to assist communities in removing construction and demolition debris from brownfields sites needed for redevelopment.

"In the past year we have also made it easier for citizens to use the Internet to access IEPA's information on air and water quality, cleanups and enforcement," Director Scott added. "They can also file environmental complaints and make suggestions for enforcement projects online and these efforts will also continue and expand," Director Scott added. ♦

## Statistics for an Average Landfill in Illinois, 2005

### Waste Disposed

1.0 million gate cu. yds. (about 311 thousand gate tons)

### Capacity Available

19.2 million gate cu. yds. (5.8 million gate tons)

## Gate Cubic Yards and Tons

Illinois landfills are required to report to the Illinois EPA the quantities of waste received during each calendar year. They must also calculate how much capacity remains available for future waste disposal as of Jan. 1st of the following year.

These figures are submitted to the Agency in "gate cubic yards," or the volume of waste entering the landfill's gate. Remaining capacities are expressed as *certified* gate cubic yards, meaning that calculations have been certified as true and accurate by a licensed professional engineer. These numbers are found on landfill specification pages in each of seven regional sections in this report.

The term "in-place cubic yards" is used to indicate wastes that have been compressed to a half or a third or a quarter of their original volume, depending on the degree of compaction achieved by the landfill.

Gate cubic yards can be difficult to visualize. To aid the reader, we have divided gate cubic yards by an industry standard of 3.3 to achieve approximate tons. In other words **3.3 gate cubic yards = one gate ton.**

## Acronyms Used in this Report

AKA	Also known as
CS or CF	Compost site or compost facility
CY or Cu.Yd.	Cubic Yard (may be gate or in-place)
HDPE	High density polyethylene
LF	Landfill
LSW	Landscape waste
MRRF	Material Recycling and Recovery Facility
PPD/PCD	Pounds per person per day/Pounds per capita per day
RDF	Recycling and Disposal Facility
TPD	Tons per day
TPY	Tons per year
TS	Transfer station

### Six landfills permitted to expand in 2004; two landfills open in northern and southern Illinois

Six landfills in the state were permitted by Illinois EPA to expand in 2004. Additionally, in June 2004, Indian Creek Landfill No. 2, Hopedale, was allowed to modify its permit and re-open, although it had been inactive since the early 1990's.

Prairie View RDF newly opened in January 2004 in Wilmington. In March 2004, Perry Ridge Landfill newly opened in DuQuoin.

### US EPA's MSW Report, 2003

National solid waste data is available in the report *Municipal Solid Waste in the United States: 2003 Facts & Figures* that was published in April 2005. The report is found on-line at <http://www.epa.gov/msw/msw99.htm> by searching for report number EPA530-F-05-003. This report contains information about waste generation. It categorizes the municipal solid waste stream by waste type. The report's executive summary is abstracted on page 8.

## New Facilities Permitted to Expand or be Upgraded in 2006

Region	Landfill	Municipality	Opening Date	Details	Design Airspace (cu. yds.) <sup>1</sup>
One: Northwestern Illinois	Lee County Landfill	Dixon	6-8-06	Vertical (78 ft.) and horizontal (125 ac.) expansion	29,400,000
Three: Peoria/Quad Cities	Atkinson Landfill	Atkinson	Under Construction	Lateral (78.2 ac.) and vertical expansions over 45.7 ac.	9,250,000
Four: East Central Illinois	ADS/McLean Co. LF #2	Bloomington	Under Review	horizontal expansion	1,500,000
Four: East Central Illinois	Streator Area #3	Streator	Under Construction	horizontal expansion	4,700,000

<b>Total</b>					<b>47,963,575</b>

<sup>1</sup> Includes space for waste, intermediate or daily cover and capacity (in-place cubic yards)

## Waste was imported into Illinois from 10 other states

Illinois regional waste disposal and landfill capacities are shown on a per capita basis in the table on the bottom of page six. Chicago Metropolitan Region has the lowest remaining capacity per capita. There is a moratorium against landfills within Chicago's city limits. Land prices are high in Chicago. Waste generated by Chicago Metropolitan region's population then becomes a state-wide problem for Illinois counties. Also affected is available capacity at landfills in at least two adjacent states, Indiana and Wisconsin.

## Solid waste disposal data for 2005 is now available from the State of Indiana

Indiana Department of Environmental Management (IDEM), Indianapolis, reported in its [2005 Summary of Indiana Solid Waste Facility Data](#) that 87 percent of waste imports to Indiana came from 27 Illinois counties. More than 2.7 million tons of Illinois waste were imported into Indiana in 2005. Of the amount of Illinois waste disposed of in Indiana in 2005, 96 percent came from the Chicago area.

Illinois waste in 2005 was sent for disposal to one or more of 12 different landfills, seven transfer stations, one incinerator or two construction & demolition disposal sites in these 16 Indiana counties: Allen, Fulton, Hendricks, Knox, Lake, Marion, Newton, Pike, Porter, Putnam, Shelby, Vanderburgh, Vermilion, Vigo, Warren and White.

Cook County, Illinois, in 2005 sent to Indiana's landfills and transfer stations 2,624,219 tons of waste. That amount is 80 percent of the waste imports to Indiana.

Indiana's 2005 report is available on-line at [www.in.gov/idem/land](http://www.in.gov/idem/land). Contact Ms. Michelle Weddle, Project Coordinator, IDEM at 317-233-4624 for more information.

Any limits to out-of-state waste disposal in other states, or local capacity shortages, could put pressure on Chicago Metropolitan area waste management systems, and may cause a local shortage in landfill disposal capacity for Chicago Metropolitan area's citizens, in the next decade.

## State of Origin of Wastes Received at Illinois Landfills in 2005<sup>1</sup>

Thirteen percent of all solid waste landfilled in Illinois in 2005, 7 million gate cubic yards (2.1 million tons), comes to Illinois as imports from out-of-state. Waste haulers are not required by state law to report how much Illinois waste they transported to landfills in other states or from which counties (in Illinois) waste is transported.

Most states exporting waste to Illinois are neighbors of Illinois and share its borders.

State of Origin	Cu. Yds.	Percent
Missouri	5,275,461	75.6%
Iowa	1,313,769	18.8%
Indiana	204,119	2.9%
Wisconsin	155,284	2.2%
Other States <sup>2</sup>	16,419	0.2%
Kentucky	14,113	0.2%
<b>Total</b>	<b>6,979,165</b>	<b>100%</b>

<sup>1</sup> 25 landfills accepted some waste from other states in 2005.

<sup>2</sup> Five other states include: Arkansas, Kansas, Minnesota, Nebraska and Tennessee

## Illinois Landfills: Waste Accepted in 2005 Versus 2004

Region	Landfills Accepting Waste 2005 <sup>1</sup>	Waste Accepted, Gate Cu. Yds.		Yearly Change		2005 Waste Share of State Total
		2005 <sup>2</sup>	2004 <sup>3</sup>	Cu. Yds.	Percent	
One: Northwestern Illinois	7	12,960,037	12,317,877	+ 642,160	+ 5.2	24.8
Two: Chicago Metropolitan	10	11,579,571	11,918,357	- 338,786	- 2.8	22.1
Three: Peoria/Quad Cities	9	4,364,835	4,521,285	- 156,450	- 3.5	8.3
Four: East Central Illinois	9	9,896,608	11,810,022	- 1,913,414	- 16.2	18.9
Five: West Central Illinois	5	2,177,606	1,925,322	+ 252,284	+ 13.1	4.2
Six: Metropolitan East St. Louis	5	9,026,017	9,201,085	- 175,068	- 1.9	17.3
Seven: Southern Illinois	6	2,290,601	2,060,922	+ 229,679	+ 11.1	4.4
<b>Totals</b>	<b>51</b>	<b>52,295,275</b>	<b>53,754,870</b>	<b>- 1,459,595</b>	<b>- 2.7</b>	<b>100</b>

<sup>1</sup> Includes facilities that accepted municipal waste for less than one complete calendar year.

<sup>2</sup> Includes 6,979,165 cubic yards of out-of-state waste (13% of state total) accepted by 25 Illinois landfills during 2005.

<sup>3</sup> Includes 7,240,330 cubic yards of out-of-state waste (13% of state total) accepted by 27 Illinois landfills during 2004.

## Illinois Landfills: Remaining Capacities Jan. 1, 2006 Versus Jan. 1, 2005

Region	Landfills Reporting Capacity 1-1-06	Reported Capacity, Gate Cu. Yds.		Yearly Change		Capacity Share of State Total
		1-1-06	1-1-05	Gate Cu. Yds.	Percent	
One: Northwestern Illinois	7	186,215,000	193,613,000	- 7,398,000	- 3.8	19.0
Two: Chicago Metropolitan	10	107,994,000	130,133,000	- 22,139,000	- 17.0	11.0

<b>Totals</b>	<b>51</b>	<b>980,402,000</b>	<b>986,473,000</b>	<b>- 6,071,000</b>	<b>- 0.6</b>	<b>100</b>

### Two Landfills Opened in 2004

Prairie View Recycling and Disposal Facility, Wilmington, and Perry Ridge Landfill, DuQuoin, opened in January and March 2004.

Six additional landfills expanded in 2004, and one landfill in Hopedale was upgraded and re-opened.

### Capacity loss of less than one percent documented on Jan. 1, 2006

In a year that brought a less than one (0.6) percent decrease in landfill capacity, five of seven regions reported declines ranging from 0.6 percent to 17 percent.

The table below compares landfill remaining capacities in “snapshots” taken Jan. 1, 2005, and Jan. 1, 2006. The highest capacity decline of 17 percent was reported in the Chicago Metropolitan region.

Two new landfills (Prairie View Landfill, Wilmington, and Perry Ridge Landfill, DuQuoin), six expansions and one upgraded landfill (Indian Creek Landfill #2, Hopedale) throughout the State help buffer these landfill closures.

## Waste Disposed and Landfill Capacity Per Capita; Landfill Life Expectancy

Region	Estimated Population	Waste Disposed, Cu. Yds. <sup>1</sup>		Remaining Capacity, Cu. Yds.		Landfill Life Years <sup>2</sup>
		2005	Per Capita	Jan. 1, 2006	Per Capita	
One: Northwestern Illinois	822,898	12,960,037	15.7	186,215,000	226.3	14
Two: Chicago Metropolitan	8,745,491	11,579,571	1.3	107,994,000	12.3	9
Three: Peoria/Quad Cities	760,131	4,364,835	5.7	202,066,000	265.8	46
Four: East Central Illinois	863,562	9,896,608	11.5	164,228,000	190.2	17
Five: West Central Illinois	563,134	2,177,606	3.9	51,087,000	90.7	23
Six: Metropolitan East St. Louis	712,077	9,026,017	12.7	150,965,000	212.0	17
Seven: Southern Illinois	434,736	2,290,601	5.3	117,847,000	271.1	51
<b>Totals</b>	<b>12,902,029</b>	<b>52,295,275</b>	<b>4.1</b>	<b>980,402,000</b>	<b>76.0</b>	<b>19</b>

<sup>1</sup> Amounts reported in gate cu. yds.

<sup>2</sup> Remaining capacity divided by waste disposed. Tells how long a region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Statewide Landfill Capacity is Adequate Despite Same Number of Facilities

At the end of each year, Illinois landfill operators calculate how much waste they will be able to accept in the future. This volume is known as remaining or available capacity, and is expressed in gate cubic yards, meaning waste received at the landfill's gate before it is compacted. One industry rule of thumb says 10 gate cubic yards of waste can be compressed into five compacted cubic yards. Obviously, the greater the compaction, the more waste can be buried.

In 2005, 51 landfills reported accepting 52.3 million gate cu. yds. of waste from Illinois counties and 10 other states besides Illinois. The 980.4 million cubic yards of available capacity allows for 19 years of landfill life statewide.

### Tight Regulations Force Cutbacks

Active landfills accepting waste each year

### Pushing Survivors to Build Capacity

Available landfill space, millions of gate cubic yards

### Average Landfill Capacity Increases

Millions of gate cubic yards

### While Disposal Rates Remained Constant

Wastes landfilled, millions of gate cubic yards

## National Solid Waste Management Figures for 2003 Reported by US EPA <sup>1</sup>

Number of municipal solid waste landfills in the US (2002)		1,767	
Average number of landfills per state		35	
	<b>Million Tons</b>	<b>Percent</b>	<b>PPD <sup>2</sup></b>
Waste generated	236.2	100%	4.45
Waste recycled and composted	72.3	30.6%	1.36
Waste recycled	55.4	23.5%	1.04
Waste composted	16.9	7.1%	0.32
Waste landfilled and combusted	163.9	69.4%	3.09
Waste landfilled	130.8	55.4%	N/A
Waste combusted	33.1	14.0%	N/A

<sup>1</sup> Source: *Municipal Solid Waste in the United States: 2003 Facts & Figures*, US EPA Office of Solid Waste and Emergency Response, April 2005

<sup>2</sup> PPD = Pounds Per Person Per Day

### Municipal Waste Management Plans and Plan Updates

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Every five, 10 and 15 years, each plan must identify changes in planning areas, evaluate progress in the plan implementation and, if necessary, revise plan recommendations and goals. A county also has the option of updating its solid waste generation data. The plan is then submitted to Illinois EPA for review and comment.

Questions concerning these plans should be directed to the appropriate local administrators listed in [Appendix K](#) of this report. Due dates for submitting plan updates to Illinois EPA are found in [Appendix L](#).

Contact Ellen Robinson for more information about this requirement of state law at 217-785-8604. ♦

### Municipal waste management in Illinois: 2005

Landfilling continues to play the largest role in the handling of municipal waste in Illinois. It is estimated that 61.3 percent of the waste stream was landfilled in 2005. Waste data collected is from landfill operators (more than 15.8 million tons), and compost site operators (393,568 tons), and the amount reported as recycled by local recycling coordinators (about 9.6 million tons) were added together and percentages for each were calculated.

Waste generation, as calculated by recycling coordinators, does not include the amounts of landscape waste land applied on-farm and any household management of municipal waste. No waste was burned in commercial municipal waste incinerators in Illinois during 2005.

Municipal waste management then, computes to the following rates: landfilling: 61.3 percent; recycling: 37.1 percent and composting: 1.5 percent. These figures are outlined below in a pie chart.

#### Municipal Waste Management in Illinois: 2005

## In Illinois, recycling information is county-based

County solid waste coordinators are asked to voluntarily answer an Illinois EPA survey and to provide a checklist of items that can be recycled in their county.

Contact information for recycling coordinators from the counties is available on-line at <http://www.illinoisrecycles.com>. In Illinois, 102 counties and the City of Chicago are required under the Solid Waste Planning and Recycling Act to be responsible for solid waste management issues within their jurisdiction.

### Municipal Waste Generated & Recycled

Region	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD <sup>1</sup>	Tons	Percent
One: Northwestern Illinois	822,898	895,781	6.0	224,315	25.0
Two: Chicago Metropolitan	8,745,491	20,890,853	13.1	8,527,772	40.8
Three: Peoria/Quad Cities	760,131	977,033	7.0	281,427	28.8
Four: East Central Illinois	863,562	1,055,654	6.7	214,921	20.4
Five: West Central Illinois	563,134	467,624	4.6	106,377	22.7
Six: Metropolitan East St. Louis	712,077	611,011	4.7	177,970	29.1
Seven: Southern Illinois	434,736	389,708	4.9	59,002	15.1
<b>Total</b>	<b>12,902,029</b>	<b>25,287,664</b>	<b>10.7</b>	<b>9,591,784</b>	<b>37.9</b>

<sup>1</sup> PCD = Pounds per capita per day.

### State Solid Waste and Recycling Grants

The Illinois Department of Commerce and Economic Opportunity (DCEO), Bureau of Energy and Recycling, issues a number of state grants to governments, not-for-profit organizations and businesses.

For information about state grant programs promoting recycling, view their program information at [www.illinoisrecycles.com](http://www.illinoisrecycles.com).

<u>Division and Contact Person</u>	<u>Phone</u>

## On-Farm Composting Facilities

In rural areas, farming provides an outlet to manage landscape waste through the (Illinois) Environmental Protection Act's provisions for on-farm composting and its exemption from permitting, provided the site meets all Section 830.106 a) and b) requirements including:

- The site where composting is done must be located on property farmed by the person operating the composting facility. The farm acreage used for the composting process cannot be more than two percent of the property's acreage.
- The compost site, and the land where the compost is to be used, shall be "principally and diligently devoted to the production of agricultural crops".
- The land used and the farmer shall not be associated with a waste hauling company, or a generator of non-agricultural compost materials (a tree trimming business, nursery, cemetery or utility company). If the farmer is paid to haul the landscape waste to the site, he would not be qualified for the exemption.
- The compost needs to be used on the farm within 18 months after completion of composting.
- The compost site must meet required setbacks from wells (200 feet), nearest residence (one-fourth mile) and groundwater (five feet). The site cannot be within the 10-year flood plain, or have more than 10 occupied non-farm homes within one-half mile.
- The farmer needs to register the site with the Illinois EPA, and submit an annual report. Fourteen sites in Illinois have done so.
- The standards of 35 Ill. Adm. Code, Section 830.106 and minimum performance standards of 830.202 apply, that includes controlling odors, processing waste within five days, run-off and run-on control and windrow construction.

## Composting increased by 1.5 percent

Landscape wastes were banned from Illinois landfills beginning July 1, 1990.

In 2005, the State's 40 compost facilities processed 393,568 tons of landscape waste, a 1.5 percent increase from 2004's total of 387,645 tons handled at 40 sites.

Seventeen compost sites are located in the Chicago Metropolitan area. Six compost sites are located in the Metropolitan East St. Louis area.

Almost 30 percent of the landscape waste collected in 2005 was managed at the top two compost sites: Thelan Sand & Gravel Site #1, Antioch, and BFI Modern Landfill Compost Facility Site #2, Belleville, operated by St. Louis Composting.

### Compost Facilities: Waste Handled in 2005

Region	Active Facilities	Tons
One: Northwestern Illinois	5	37,179
Two: Chicago Metropolitan	17	198,408
Three: Peoria/Quad Cities	5	21,203
Four: East Central Illinois	4	30,251
Five: West Central Illinois	1	60
Six: Metropolitan East St. Louis	6	104,468
Seven: Southern Illinois	2	1,999
<b>Total</b>	<b>40</b>	<b>393,568</b>

### Six facilities in Illinois accept organic materials for composting:

Region	Site Name	City
1	Rare Earth Diversified Services	Walnut
2	Thelen Sand & Gravel #3	Antioch
3	LHF Compost Inc.	Peoria
4	Eldon Steidinger Farm	Strawn
	ISU Farm Compost	Lexington
5	Excel Corporation	Beardstown

### Land application of landscape waste

An increasing amount of landscape waste may also be managed by land application in Illinois in accordance with Section 21(q)(2) of the (Illinois) Environmental Protection Act. Application must not exceed 20 tons per acre per year. There are 14 farms throughout Illinois that accept landscape waste for land application.

## Transfer station and recycling center regulations proposed

The Agency has proposed developing specific regulations for transfer stations. The Illinois Pollution Control Board web site <http://www.ipcb.state.il.us> has more details about the status of the rule-making process. For more information about this process, contact 217-524-3300; our Bureau of Land permit reviewer on call.

### Transfer Stations: Waste Handled in 2005

Region <sup>1</sup>	Facilities	Tons
One: Northwestern Illinois	6	125,316
Two: Chicago Metropolitan	70	4,805,636
Three: Peoria/Quad Cities	4	43,180
Four: East Central Illinois	9	106,378
Five: West Central Illinois	4	153,450
Six: Metropolitan East St. Louis	5	28,596
Seven: Southern Illinois	4	126,222
<b>Total</b>	<b>102</b>	<b>5,388,778</b>

<sup>1</sup> Each region contains active sites that did not voluntarily report amounts of waste accepted.

In 2005, 45 of the 102 active transfer stations (44 percent) voluntarily reported handling almost 5.4 million tons of municipal waste, or 10 percent of waste landfilled statewide.

We do know the number of transfer stations that were permitted and accepted waste for transfer, because they are inspected on a regular basis by our Field Operations staff and the delegated partners. Over the next decade, the number of transfer stations can be expected to increase, as will the amount of waste they will handle.

The list of transfer stations above includes those that accept waste for less than a complete year and those that only accept landscape waste for transfer.

## Resource Conservation Challenge (RCC) has Multi-faceted Goals

This federal initiative has three primary objectives:

- 1) to prevent pollution and promote recycling and reuse of materials;
- 2) to reduce the use of toxic chemicals; and
- 3) to conserve energy and materials.

The Scrap Tire Workgroup of the RCC works on issues related to scrap tire management, clean-up and market development. There are several committees that consist of representatives from various State environmental agencies, industry, U.S. EPA and those academics having expertise in scrap tire management, market development and application technologies. These committees discuss goals, tire-derived fuel, civil engineering, rubberized asphalt and ground rubber issues.

Action plans were developed to:

- divert 85 percent of newly generated scrap tires to reuse, recycling or energy recovery by 2008 (vs. 70% in 2003) and
- reduce by 55 percent the number of tires (270 million in 2003) in existing stockpiles by 2008.

### Diversion of scrap tires to reuse, recycling or energy recovery

The best solution to divert scrap tires from tire piles and landfills consists of finding strong and diverse markets. About 290 million scrap tires are generated in the United States each year, so any major market disruption will cause a significant increase in tire piles. More diverse recycling and re-use markets are needed to adapt to market fluctuations.

### Reduction of tire piles/stockpiles

Tire pile cleanup is principally achieved by supporting State tire pile clean-up programs already in place. In addition, the topics of ground rubber, civil engineering applications, rubberized asphalt and Tire Derived Fuel will be thoroughly explored.

### Future Projects

Sixteen distinct projects are planned that will collectively achieve the overall goals for diversion of scrap tires to reuse, recycling or energy recovery and stockpile reduction. Some steps will need to be modified in order to react to developing situations before and after 2008.

For more information about used tire management, contact Todd Marvel, Bureau of Land, Used Tire Program, at 217-785-8604. ♦

## **CCDD regulations adopted for operations in mines, quarries or other excavations**

Public Act PA-272, effective July 19, 2005, required a permit to use Clean Construction or Demolition Debris (CCDD) as fill in a current mine, quarry or other excavation. It also required the Pollution Control Board to adopt regulations for these operations by September 1, 2006. This was completed on August 17, 2006 with the adoption of Part 1100 of the Illinois Administrative Code. These regulations were adopted after input from several stakeholders, including the Illinois Association of Aggregate Producers. Part 1100 replaces the interim operating standards contained in Section 22.51 (c) (2) of the Act. The use of an instrument to screen in-coming loads, and the record-keeping requirements were retained. The Part 1100 standards address the additional issues of surface water control, more formalized load checking, salvaging and boundary control. An annual report and an annual map showing the extent of filling are now needed. Subpart C and D of the 1100 regulations describe what will be needed in a permit application and the procedural requirements. The Bureau of Land's Permit Section will contact registered operations regarding the submittal of permit applications.

The remainder of the Section 22.51 requirements do not change. Also, these standards only apply to those sites that are in a current or former mine, quarry or other excavation. The conditions contained in the Illinois Environmental Protection Act, Section 3.160, must be met at other sites utilizing clean construction or demolition debris.

The new regulations may be obtained from the Illinois Pollution Control Board's Web page at [www.ipcb.state.il.us](http://www.ipcb.state.il.us). ♦

## **Permitting requirements of Illinois EPA**

New landfills or landfill expansions cannot be built unless the Bureau of Land issues a permit. A Bureau of Air permit for a landfill identified as a potential new source of air pollution must also be obtained.

An initial completeness review of a permit application normally takes 30 days. If omissions are found, the application is rejected as incomplete. The applicant then has 35 days to provide additional information to make an application complete. Once an application is found to be complete, technical reviews are conducted.

### **Approval or denial of permit applications**

During the review period, comments are solicited from Bureau of Land's Regional Office, Groundwater Assistance Unit and the Solid Waste Unit. After review of the application, the addenda, and comments from public officials, the general public and the regional office, final action is ready to be taken.

If the reviewers have found the application to completely adhere to applicable environmental regulations, the permit is approved outright or with special conditions. If the application is deficient, the Permit Section denies the permit.

Rather than sending out a formal denial letter, the reviewer prepares a draft denial letter which explains the areas in the application that are deficient. The applicant has a choice of either providing some additional information in the form of an addenda to the original application or asking the reviewer for a formal denial that could be appealed to the Illinois Pollution Control Board. Additional information is usually provided. Approval or denial of a permit application takes 180 days, unless an extension is granted.

If the application is denied, an owner/operator could submit a new application, appeal the Agency's denial of the permit through the Illinois Pollution Control Board or they could abandon the project. Most applicants choose to submit a new application, starting the 180-day process over again.

Permits for landfills contain detailed requirements for the design, construction, capacity and operation of the landfills. They also contain stringent requirements for monitoring the groundwater beneath and around the landfill to detect releases from the landfill that would adversely impact the quality of the groundwater. Finally, the permit contains detailed requirements to properly "close" the landfill once it has been filled to permitted capacity and to provide for proper care of the landfill after it has been closed.

Periodically, the owner/operator of a landfill must modify the facility's permit. These modifications may address many things, including changes in construction and/or operational practices; construction of cells within the permitted landfill boundaries; and groundwater monitoring issues.

This report documents significant permit actions. However, only those permit actions which change the items mentioned in the “Facility Facts” section of the landfill specification pages are acknowledged. Footnotes on each facility specification page show permit actions made during 2002, 2003 and 2004. On page four of the Introduction there is a chart entitled “[New Facilities Permitted to Expand or be Upgraded in 2004](#),” that presents more details on vertical or horizontal (lateral) expansions.

For more information about items discussed in this report, submit a Freedom of Information Act (FOIA) request on-line. Please be very specific in your request for information and include the site’s identification number, if possible. Go to <http://www.epa.state.il.us> to make a FOIA request.

### **Closure and post-closure care period**

Once a landfill has received its permitted volume of waste, it must be “closed” in accordance with an approved plan and with Illinois landfill regulations. Proper closure of a landfill includes establishing a proper grading plan to allow for precipitation to run off the landfill; constructing a final cover over the waste to minimize the amount of precipitation that can infiltrate the landfill; establishing a vegetative cover system over the final cover system to minimize erosion; and finalizing the gas and leachate management systems to ensure that gas and leachate generated in the landfill after the landfill is closed are properly managed.

After a landfill has been properly closed, it must then receive at least 30 years of post-closure care. Proper post-closure care includes maintaining the vegetative cover to ensure it does not erode; monitoring the groundwater to ensure there have been no releases due to the landfill; and removing the gas and leachate generated in the landfill to ensure that they do not have adverse impacts on the area surrounding the landfill.

Closure activities, depending on the site, may include: capping the landfill; installing monitoring devices if they are not already in place; providing topsoil, seeding, and mulching as necessary; and possibly converting the land for follow-up use. Routine post-closure care continues for 30 years after the landfill closure certification is approved and includes maintaining the surface cover; monitoring gas produced; flaring or collecting any gas; monitoring, pumping and transporting any leachate; and monitoring groundwater. Cost estimates for both closure and post-closure care must be based on an engineering estimate of the cost for a third party to perform the necessary work and maintenance. Financial assurance is also required for corrective action measures, such as remediation of groundwater contamination.

## **Financial Assurance Requirements**

Funding for landfill closure, post-closure maintenance and corrective action must be provided by the landfill owners and operators, ensuring costs are not borne by taxpayers. Many different mechanisms are available to help landfill owners prove now that they will be able to pay later.

Financial assurance mechanisms for landfill closure and long-term care fall into three broad categories: cash-in-hand, trust funds or escrow accounts; third-party insurance, including letters of credit and surety bonds; and various types of self-insurance. Self-insurance can include a financial test, a guarantee by a parent corporation or government entity, or deferred funding in the form of pledge of revenues. The state can further determine which mechanisms are allowable for publicly and privately owned landfills and how landfill owners and operators must provide accounting.

Closure and long-term cost estimates are revisited annually for active landfills. For those which closed under Part 807 regulations, review takes place every two years. Costs are updated based upon the remaining post-closure care period and adjusted for inflation. The funds available must be adequate to cover the projected costs.

For more information about Illinois regulations regarding financial assurance for landfills, contact Brian White, Bureau of Land, at 217-785-8604. ♦

## How to Check Status of Bureau of Land Permit Applications on the Internet

Once the Agency receives a permit application, the Bureau of Land, Permit Section (Section), proceeds with a technical review. One of the databases available to everyone on the Internet is the Solid Waste Unit's web database search. With this database, one can determine the status of permit applications that have been submitted, and who the permit reviewer is.

A Solid Waste Unit web database search located at <http://epadata.epa.state.il.us/land/solidwaste> is designed to inform the public about applications submitted, or permits obtained from the Bureau of Land (BOL). The Section issues permits for the management of non-hazardous waste at landfills, transfer stations, compost, and waste storage, treatment, processing, and recovery facilities. On the search results page, the log number is linked to a brief description of the application. The main identifiers for applications are:

1. the official BOL name of the site
2. the closest city to the site
3. the county where the facility is located
4. the application's log number and
5. the site number: a 10-digit number that is unique to each specific facility.

Choose search method from "Active" or "Inactive" applications:

"Active" means an application is pending for the site. "Inactive" means that there are no applications currently pending, but there may be applications for which the Section has taken final action (issued, denied or withdrawn).

Further searches may be made by City, County, Log number or Site number.

For more help in using this database search, contact the BOL Permit Reviewer on call at 217-524-3300. ♦

## Landfill liner study and engineering education for Illinois EPA staff

Illinois EPA's Bureau of Land, Permit Section, wrote some recommendations in January 2003 for the 92nd General Assembly in fulfillment of House Resolution 715.

"A Study of the Merits and Effectiveness of Alternate Liner Systems at Illinois Landfills" is outlined on our web site. Methodology and conclusions reached, as well as the entire report, can be accessed at [www.epa.state.il.us/land/publications/#solid-waste-permits](http://www.epa.state.il.us/land/publications/#solid-waste-permits).

In addition, Illinois EPA has provided civil engineering training for its staff. Topics included landfill liquid management, landfill gas emissions, slope stability and slope failures, and geotechnical engineering analysis. These classes were taught by civil engineering professors from Clemson University, Clemson, South Carolina, and University of Illinois, Urbana.

## Nonhazardous Solid Waste Management and Landfill Capacity in Illinois: 19th Annual Report (2005)

Section 4 of the Illinois Solid Waste Management Act requires the Agency to "publish a report regarding the projected disposal capacity available for solid waste in sanitary landfills. . . . Such reports shall present the data on an appropriate regional basis. . . [and] shall include an assessment of the life expectancy of each site."

This legislative mandate explains why the main body of this report is organized by seven Illinois EPA administrative regions, and why landfill capacity and life expectancy are emphasized in nearby tables and charts, and in text, tables, map symbology and landfill specification pages in the regional sections.

Other states which write a report similar to this are Florida, Indiana, Washington and Virginia. For more information contact Peter Gorer, Florida Dept. of Environmental Protection at 850-487-9532; Michelle Weddle, Indiana Dept. of Environmental Management at 317-233-4624; Ellen Caywood, Washington Dept. of Ecology at 206-459-6259; and John Ely, Virginia Dept. of Environmental Quality at 804-698-4249.

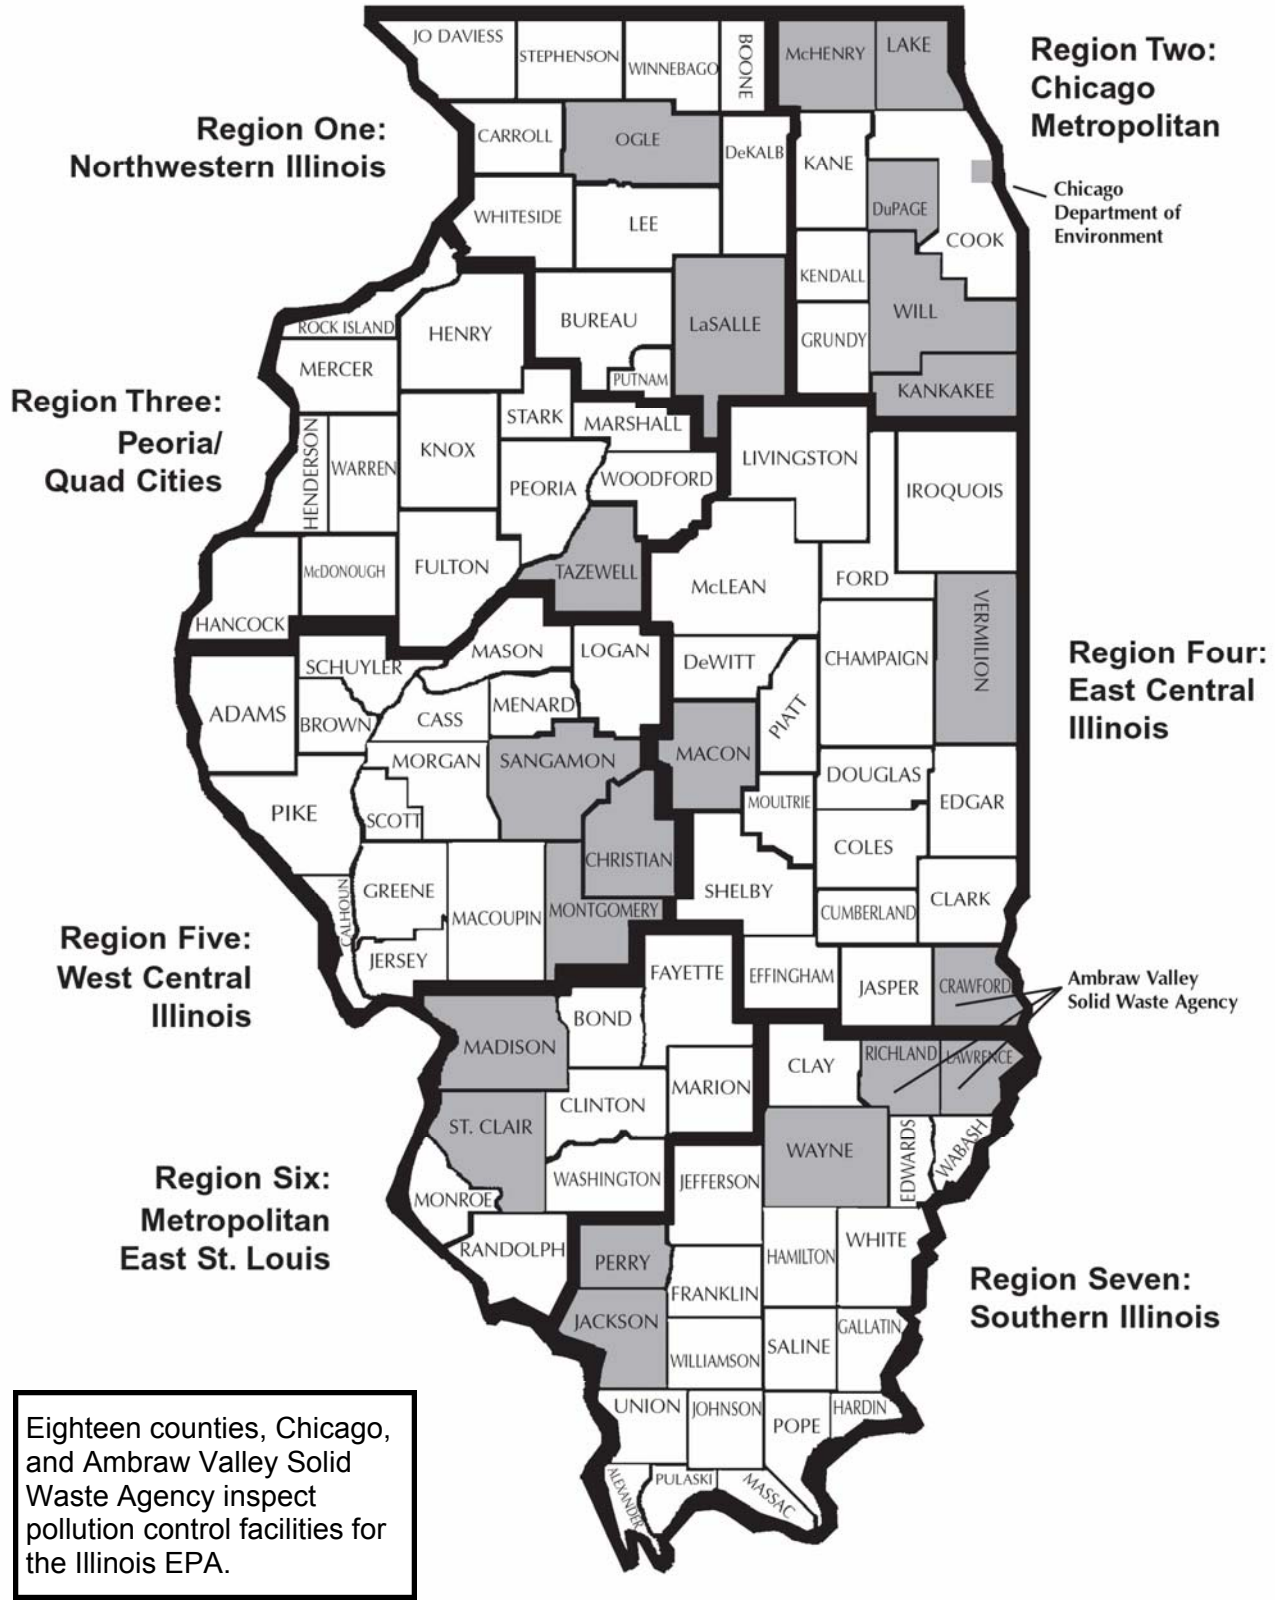

## Conclusion

Our state-wide analysis of solid waste management is now concluded.

For more details about solid waste management throughout the seven Illinois EPA administrative regions of Illinois, see the body of the document on pages R1.1 through R7.17.

The Appendices also contain supporting documentation that will prove to be very useful to those interested in these facilities. ♦♦

**Local Agencies Delegated to Inspect Pollution Control Facilities for the Illinois EPA**

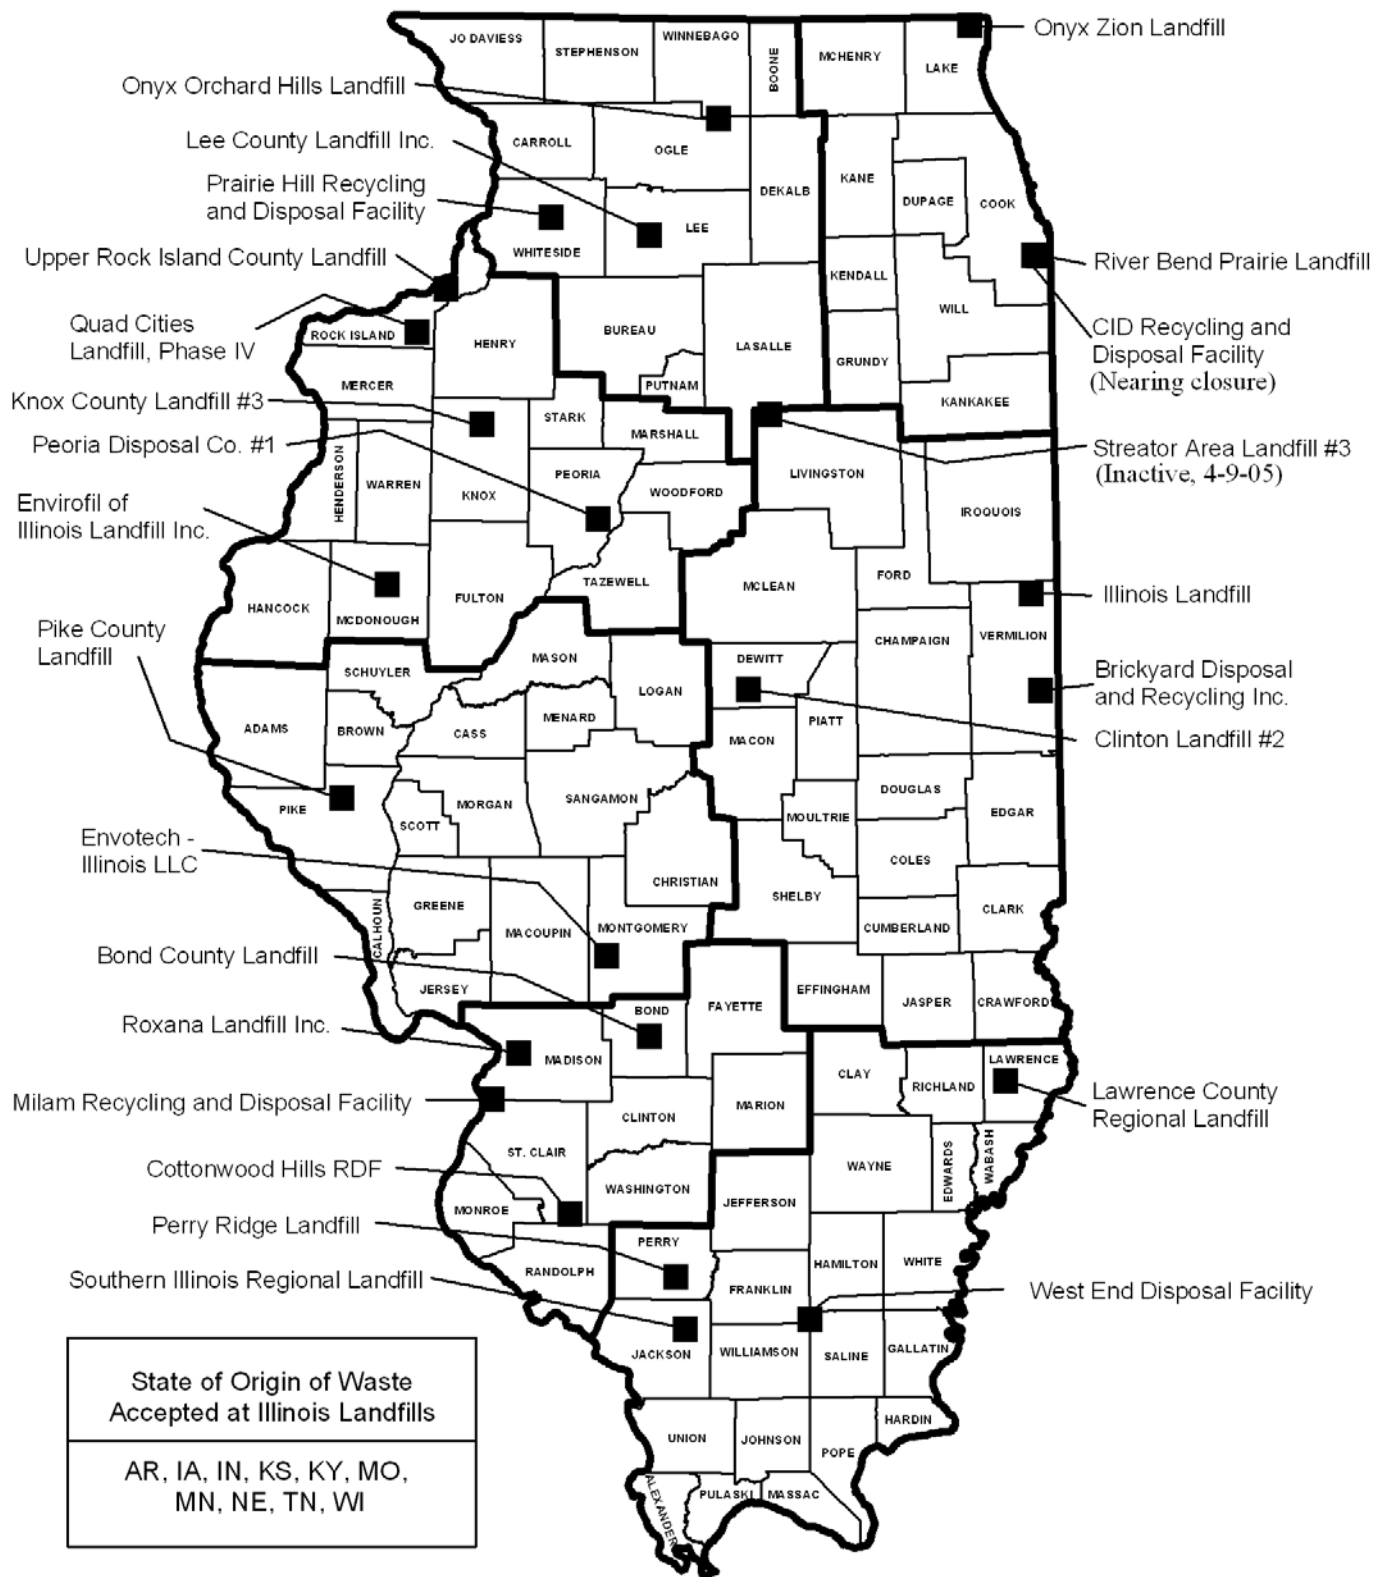

Eighteen counties, Chicago, and Ambrav Valley Solid Waste Agency inspect pollution control facilities for the Illinois EPA.

# Illinois Landfills, 2005

# Landfills Receiving Waste from Other States in 2005

# Illinois Environmental Protection Agency Administrative Regions

**Regional offices are located in Rockford, Des Plaines, Peoria, Champaign, Springfield, Collinsville and Marion**

# Landfills Transfer Stations Compost Facilities

*"Pitch in! Put Waste in its Place" By Lauren Lee, student, Grower Middle School, Willowbrook (DuPage County). Winner of Illinois EPA's School Poetry, Prose and Poster Contest for 5th and 6th graders.*

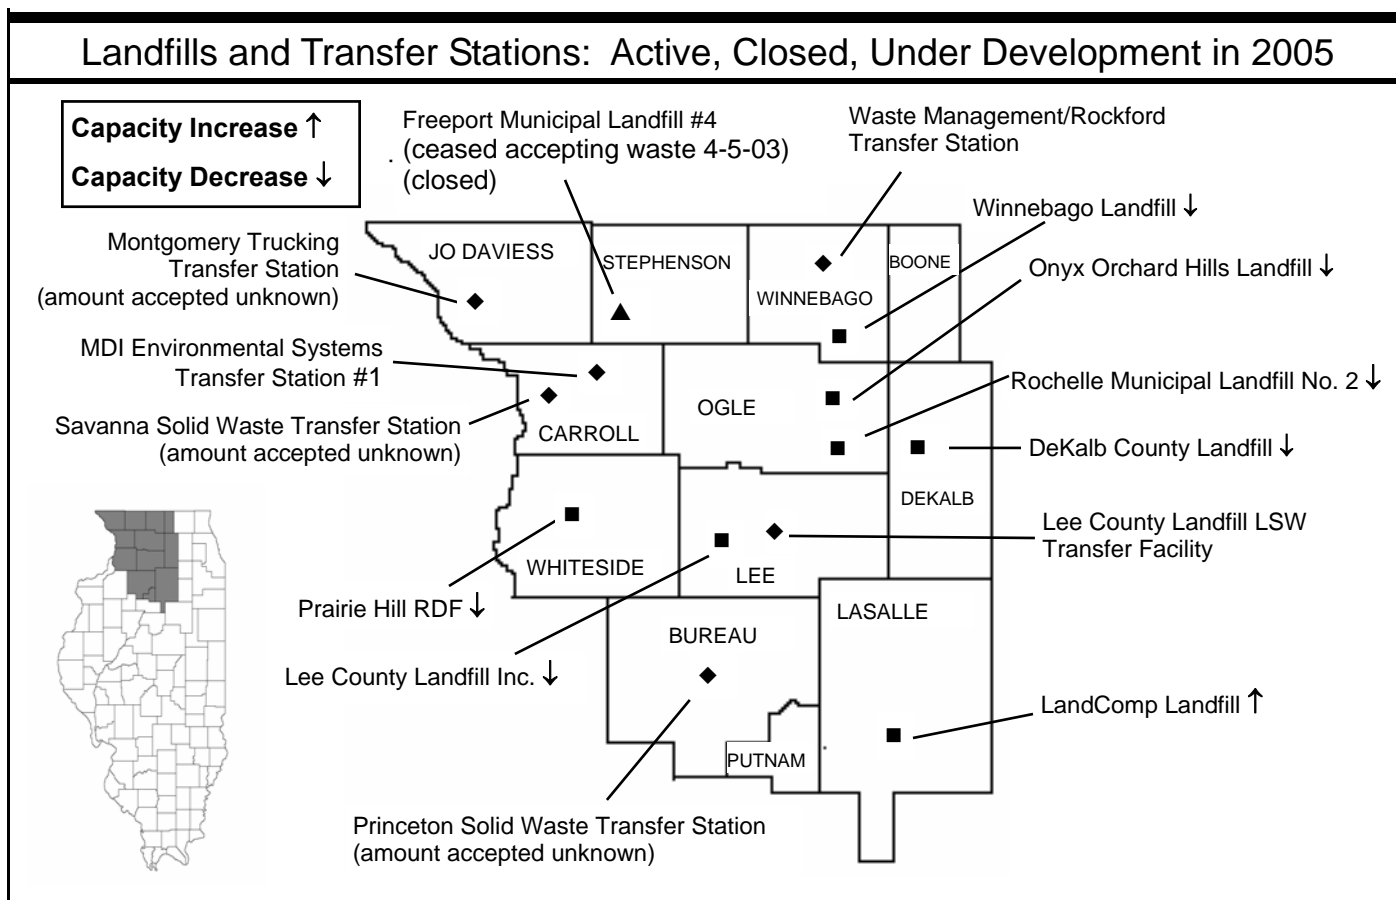

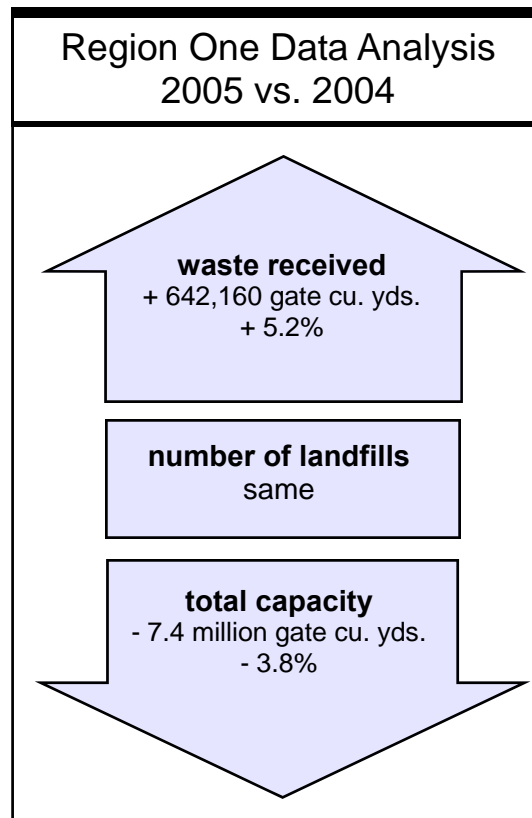

**T**WO LANDFILLS IN REGION ONE SHOW UP IN THE TOP THREE rankings of all the State's landfills in terms of waste receipts for 2005. Onyx Orchard Hills Landfill, Davis Junction, ranks second in the state by accepting almost 5.1 million gate cubic yards; Lee County Landfill, Dixon, is third with 4.0 million gate cubic yards received.

Because Cook County (County Seat: Chicago) has only two landfills left: CID RDF #3 and #4 and Congress Development Company, transfer stations in Chicago Metropolitan area have been consolidating wastes into semi trucks and transporting it to landfills in Northwestern and Central Illinois.

Region One's seven active facilities received 13 million gate cubic yards of waste in 2005 — or 642,160 gate cubic yards more than in 2004, a 5.2 percent increase.

### Two landfills expand available capacity in 2004

Capacity available for waste disposal decreased 3.8 percent from 2004 to 2005, by a total of 7.4 million gate cubic yards based upon increased waste disposal in the region. Onyx Orchard Hills, Davis Junction, received approval for vertical and horizontal expansions on July 26, 2004. Winnebago Reclamation Service, Rockford, added capacity on April 27, 2004 when its permit application for vertical and horizontal expansions was approved.

## Region One Solid Waste Statistics

<b>Counties</b>	<b>12</b>
<b>Area (square miles)</b>	<b>7,371</b>
<b>Population (est.)</b>	<b>822,898</b>
<b>Landfill life expectancy</b>	
<b>Years remaining</b>	<b>14 *</b>
<b>Landfills</b>	
<b>Active in 2005</b>	<b>7</b>
<b>Transfer Stations</b>	
<b>Active in 2005</b>	<b>6</b>
<b>Compost facilities</b>	
<b>Active in 2005</b>	<b>5</b>

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Capacity declined 3.8 percent as of Jan. 1, 2006

This region is second in the state, behind Peoria/Quad Cities, in remaining capacity, with a 19 percent capacity share. Onyx Orchard Hills Landfill reported almost 100.6 million gate cubic yards of space available as of Jan. 1, 2006, making it third in the state in capacity ranking on that date. Prairie Hill RDF, Morrison, with almost 44 million gate cubic yards ranks seventh in capacity remaining.

Total capacity for the Region's seven landfills, reporting on Jan. 1, 2006, was over 186.2 million gate cubic yards which means 14 years of remaining capacity for the region.

## Expansions help boost the State's capacity

On July 26, 2004, Onyx Orchard Hills obtained approval for an additional 19.6 million cubic yards airspace with its 40.5 foot vertical expansion and its 76 acre horizontal expansion.

Winnebago Reclamation Services, Rockford, received a permit to expand vertically and horizontally on April 27, 2004. This expansion will add 1.8 million cubic yards of airspace for waste disposal at this landfill. Operation of south unit expansion Phase 1 was approved on Dec. 21, 2005.

Lee County Landfill, Dixon, also opened Cells 13 and 14 in September and October 2004. Vertical and horizontal expansions at this landfill were approved on June 18, 2006, but is not included in the latest capacity figure available.

## Expansions

<u>Approved Later</u> <sup>1</sup>	<u>Airspace</u>
Lee County Landfill Inc.	29.4 million

<sup>1</sup> Approved on June 18, 2006, so it was not included in the Jan. 1, 2006 capacity figure

## Landfills: Waste Accepted 2005; Remaining Capacities Jan. 1, 2006

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>		
DeKalb County Landfill	DeKalb	DeKalb	320,943	30	3,067,000	35	88	2015

<b>Totals</b>			<b>12,960,037</b>		<b>186,215,000</b>			

\* Three landfills accepted out-of-state waste from Iowa and Wisconsin during 2005 totaling 94,854 gate cu. yds. or < 1% of the region's total.

<sup>1</sup> Standing among 51 landfills that accepted waste during 2005.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

<sup>3</sup> Vertical and horizontal expansions approved on 6-18-06, not included in this capacity figure.

<sup>4</sup> Expansions of 40.5 foot vertical and 76 ac. horizontal approved on 7-26-04.

<sup>5</sup> Additional capacity of 1.8 million in-place cu. yds. permitted on 4-27-04. Operation of south unit expansion Phase 1 approved on 12-21-05.

**Another expansion approved later than Jan. 1, 2006 in Lee County**

Seven landfills in the Northwestern Illinois region remained open into 2005. Lee County Landfill, Dixon, received approval to expand its capacity by 29.4 million cubic yards in June 2006.

**Delegated inspections in LaSalle and Ogle counties**

The Illinois EPA delegated inspection authority to the LaSalle County Department of Environmental Services and Development and to the Ogle County Solid Waste Management Department. Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA field office in Rockford: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, also inspecting landfills, transfer stations and compost facilities permitted through the Agency’s Bureau of Land. (Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2003; these facilities are not included in this report.)

**Waste Mgt./Rockford dominated regional transfer station activity**

An Agency survey determined Region One’s transfer stations handled 125,316 gate tons of municipal waste in 2005, an amount equivalent to almost one percent of the waste landfilled in the region. Of those three voluntarily reporting, Waste Management/Rockford processed 60 percent of the regional total, and MDI Environmental Systems Transfer Station #1 accepted an additional 38 percent. Three others did not voluntarily report.

There were two inactive transfer stations in 2005. In the City of Mendota, Illinois, Waste Management temporarily closed its transfer station during the year. Rockford Landscape Waste Transfer Station was inactive during 2005.

The City of Freeport proposes to open a transfer station to replace its landfill that closed. More information about it will appear in the 2006 (20th) annual report. The City of Freeport received a permit to develop the site on December 8, 2004, but the site has not yet been permitted to operate.

**Questions and Complaints**

Illinois EPA Region One field office personnel investigate reports of suspected illegal waste disposal, and inspect the region’s landfills, transfer stations and compost facilities, except in **LaSalle and Ogle** counties, where some responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the city of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year (1996), depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all counties in Region One.

Ten year plan updates have also been adopted by DeKalb, LaSalle, Lee, Ogle, Putnam, Stephenson, Whiteside and Winnebago counties.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in [Appendix K](#) of this report.

**Details concerning Region One landfills, transfer stations and compost facilities follow on pages R1.5 through R1.23.**

## Rockford Composting/Cherry Valley leads in composting

Region One's five active compost facilities reported processing more than 37,179 gate tons of landscape waste in 2005. The two sites: Rockford Composting, Cherry Valley, (ranked sixth in the state) processed 62 percent of the region's total. Freeport Municipal Landfill #4 Compost Facility was certified closed on Jan. 9, 2004.

### Compost Facilities: Waste Accepted 2005

	Municipality	County	Tons
Rockford Composting	Cherry Valley	Winnebago	23,104
DeKalb County Landfill <sup>1</sup>	DeKalb	DeKalb	9,961
Rockford Composting	Rockford	Winnebago	1,688
States Land Improve.	Ottawa	LaSalle	1,530
Peru Municipal Landfill #2	Peru	LaSalle	896
<b>Total</b>			<b>37,179</b>

<sup>1</sup> Permit renewed on 3-22-06

## Average regional recycling rate remains healthy

The Agency does not regulate recycling, nor is the Agency required to obtain statistics. Nevertheless, as a public service, the Agency sought this information from county recycling coordinators, who reported recycling rates ranging from 3.0 to 54.6 percent.

Region One's overall recycling rate of 25 percent is a multi-year average. Seven counties did not report new data in 2005. Rankings were not made, as recycling goals are subject to markets for the recyclable materials. ♦

N

**T**HE VOLUME OF SOLID WASTE BURIED IN REGION TWO IN 2005 declined by 2.8 percent from the previous year. The region's landfills received over 11.6 million gate cubic yards of waste (about 3.5 million gate tons) — which amounted to 22 percent of all waste landfilled in Illinois that year.

Significantly, 45.6 percent (almost 5.3 million cubic yards) of waste accepted locally was deposited in two landfills: Onyx Zion Landfill, Zion, ranked sixth of all landfills in the State; and Settler's Hill Recycling and Disposal Facility (RDF), Batavia, ranked seventh. These landfills each accepted between 2.4 and 2.8 million gate cubic yards of waste for disposal in 2005. Two other landfills in the region rank 8th and 9th in terms of waste received.

The newest landfill, Prairie View RDF, Wilmington, was under development by 2003. It was approved to operate on Jan. 16, 2004, and Phase 1A South (8.06 ac.) opened three days later. On Mar. 3, 2004, Phase 1 B South (5.76 ac.) opened. Waste receipts at this site are limited to coming from Will County only. Fifty-Six (56) percent of the capacity available is located at this landfill which ranked fifth in the State, in terms of available capacity.

For the region, nine years of capacity remain, based upon current waste disposal rates.

On Jan. 1, 2005, the Chicago Metropolitan Region had 130.1 million gate cubic yards of available landfill space. By Jan. 1, 2006, that capacity had decreased 17 percent. The capacity available was down by 22.1 million gate cubic yards.

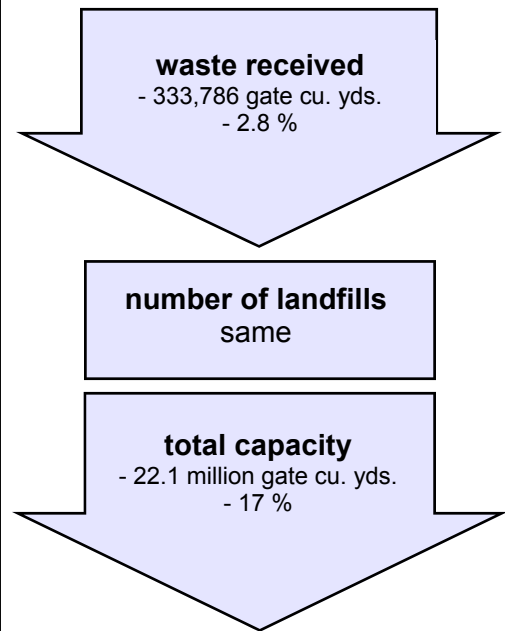

The region will have even fewer landfills in the coming years. One landfill, Kankakee RDF, Chebanse, closed in November, 2005. Ten landfills remained open into 2006.

However, two landfills plan to close prior to December 31, 2006. CID RDF (Calumet City/Chicago) is nearing closure. This site and Settler's Hill RDF will close by Dec. 31, 2006.

To buffer this need for more landfill space, more transfer stations were permitted to open in the Chicago Metropolitan area. Cook and DuPage Counties additionally have construction and demolition debris recycling centers/transfer stations that are not required to have state permits, although local zoning requirements need to be followed.

Local solid waste coordinators have provided model recycling programs for their citizens. They also continually kept their citizens informed during a garbage hauler labor strike that lasted nine days in October, 2003 that affected both commercial and residential sectors in the Chicago Metropolitan area.

## Region Two Data Analysis 2005 vs. 2004

## Garbage Hauler's Strike: 2003

In October, 2003, national newspapers and on-line internet news services reported daily on a nine day strike by personnel employed by private waste companies regarding wages and benefits. The strike affected approximately eight million people in the Chicago metropolitan area.

Commercial businesses reported overflowing trash bins. Transfer station operators reported overflowing staging areas; and some of the landfills as far away as Pontiac, Illinois, reportedly closed for a short period of time.

Local solid waste coordinators answered many calls from citizens about garbage pick-up schedules. Inspectors at Chicago Department of Environment and Illinois EPA's Des Plaines Regional Office were available to provide guidance to ensure that problems were minimized.

Most transfer stations within Chicago's city limits are open 24 hours per day, and resumed multi-shift operations at 6 p.m. on the ninth day after an agreement was reached.

## **Illinois EPA issues operating permit for Will County Landfill**

*Facility is located within the former Joliet Army Ammunition Plant property*

Former Illinois EPA Director Renee Cipriano announced that the Agency had issued a landfill operating permit on Jan. 16, 2004 to Prairie View Recycling and Disposal Facility, which is owned by Will County and will be operated by Waste Management of Illinois Inc.

The landfill is situated on an approximately 455-acre parcel within the former Joliet Army Ammunition Plant property, near Wilmington. The approved plans will allow the landfill to accept municipal waste and nonhazardous special waste for disposal and will have a waste "footprint" of approximately 223 acres, with a total waste volume of over 30 million cubic yards.

"The economic benefit of constructing and operating this facility will be important to the community," said Cipriano. "In addition to the over 100 construction jobs it will provide, and ultimately up to a dozen employees, the county and communities will reap the benefits from their share of the tipping fees paid to the facility for disposal."

Specifically, this permit will allow waste disposal in an eight-acre cell. Additional cells are expected to be added, as disposal needs mandate. The design of this facility should allow it to operate for 23 years. Proper closure and long-term monitoring requirements are also incorporated into the permit conditions. The Illinois EPA DesPlaines Regional Office inspected construction activities to ensure compliance with the development permit issued by the Illinois EPA in Nov. 24, 2003.

The Joliet Arsenal produced explosives and munitions for the Army, and was a major employer in the area during World War II and the Korean and Vietnam conflicts.

The landfill is mandated by the federal government to accept nonhazardous waste from the former Arsenal at no charge from the properties owned by the Army, Veteran's Cemetery and the Midewin National Tallgrass Prairie.

## **Chicago's Solid Waste Management Plan and Updates**

The City of Chicago adopted a solid waste management plan in 1992 that established a four point waste management strategy including: source reduction; recycling, reuse and composting; combustion with energy recovery; and disposal in landfill facilities. They recognize that not all waste can be eliminated; recycling and composting have environmental impacts; combustion has attractive features but its resultant ash may require special disposal. In its five year plan update, the City had eliminated combustion as a preferred method of waste disposal.

In 1995, the city implemented a bold program for recycling by co-collection of recyclables with waste and processing at three Material Recovery and Recycling Facilities (MRRF's) (pp. R2.21, R2.58, R2.64).

The city conducts two household hazardous waste and tire collection days along with an electronic collection day. The Mayor's Office for Green Technologies investigates additional energy saving and recycling initiatives. Other departments involved in waste management are the Department of Environment; Department of Purchases and Contracts that oversees vendor use of recycled products; Department of Transportation uses re-ground asphalt in road beds; and General Services installs energy-saving light fixtures in city buildings.

The City Council committee on Energy, Environmental Protection and Public Utilities monitors programs and produces legislative initiatives to accomplish the goals of the City's plan.

The city is examining new initiatives including brightly colored stickers on garbage bags containing recyclables, blue shopping bags provided by Dominicks and Walgreens, neighborhood recycling grants, and equipment and procedures that could improve both the blue bag recycling program and assist the city in the event of another strike by commercial waste haulers, such as the one that occurred in October, 2003 (see side bar on p. R2.1).

Citizens are encouraged to phone the city of Chicago's recycling hot line with questions or comments about all areas of waste disposal and recycling. In 2003, the city received and responded to over 2,300 public inquiries.

The City's ten year plan update was written in March 2006. More initiatives that reduce, reuse and recycle waste will be aimed at improving and expanding current programs. One goal is to establish a permanent household hazardous waste collection site and electronics recycling drop-off program, that help create skilled jobs promoting the City's local economy.

For more information contact Christopher Sauve, Recycling Coordinator, at 312-744-4616. ♦

## Questions and Complaints

Illinois EPA Des Plaines field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **DuPage, Kankakee, Lake, McHenry and Will counties and the City of Chicago**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

Fax: 847-249-4972 or 847-782-6280

*Continued on page R2.6*

## Solid waste transfer stations vital to Region Two

Region Two is home to 70 of the state's 102 active transfer stations. Cook County has 47 (that figure includes 15 sites in the City of Chicago); Will and Lake Counties each have six; Kane County has four; Kankakee and DuPage counties have two each and McHenry County has one.

Transfer stations consolidate locally collected waste for efficient shipment to distant landfills. Some transfer stations separate and remove recyclables from the municipal waste stream. Transfer stations handling only landscape waste, with transfer in less than 24 hours, are included in the list of Agency-permitted sites.

The region's transfer stations are noted in the map on page R2.0, and in the table on pages R2.5 and R2.6. Some of Region Two's transfer stations handled more waste than the state's busiest landfills. Therefore 4.8 million tons transferred is an estimate, because less than half of them voluntarily reported. We know they are active because field staff inspect their operations regularly.

## New transfer stations permitted to open in Chicago Metropolitan area

### *New sites open in May and June 2003*

Disposal (Municipal Waste) Management Systems Inc., DesPlaines, ceased accepting waste Nov. 3, 2005, certified closed Jan. 27, 2006; Greenwood Development, Maywood; and Oak Forest Public Works Department (LSW only) all opened transfer stations in May 2003. Will County also had two new landscape waste transfer stations in Romeoville (Land & Lakes/Willow Ranch and Willow Ranch Composting Inc.) which both opened in May 2003. Rocks Ann Trucking, Waukegan, opened a transfer station in Lake County in June 2003, although the operator changed in 2005 to READCO LLC.

### *New sites open in May, July and December 2004*

Land & Lakes/Wheeling LSW Transfer Station opened in Deerfield in May 2004. Marengo Disposal Company (MDC) opened a landscape waste (LSW) transfer facility at the Meyer Material Company property in McHenry in July 2004. Star Disposal LSW Transfer Station, Park Ridge, opened in December 2004.

### *New sites open in October and November 2005*

Batavia Transfer Station (Kane County) opened in Batavia on Nov. 30, 2005. Eco Materials/Waukegan LSW Transfer Station (Lake County) opened on Oct. 24, 2005.

### *Site permitted in October 2005, but did not open*

Robbins Recycling and Transfer has not yet decided to open, due to business concerns.

## Six agencies hold delegation agreements

The Illinois EPA has delegated inspection authority to the following agencies in Region Two:

- Chicago Department of Environment
- DuPage County Dept. of Economic Development and Planning
- Kankakee County Planning Dept.
- Lake County Health Department and Community Health Center
- McHenry County Health Department
- Will County Land Use Dept., Waste Services Division

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA DesPlaines field office: investigating and enforcing suspected violations of land pollution laws and regulations and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. (Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2003; these facilities are not included in this report.)

DuPage County inspects two transfer stations. Kankakee County inspects one inactive landfill, two transfer stations and two compost facilities.

Lake County inspects two active landfills, six transfer stations, and six compost facilities. McHenry County inspects one transfer station and two active compost facilities. Will County inspects two active landfills, six active transfer stations, and three compost facilities. Chicago Department of Environment is responsible for inspecting 13 transfer stations. The Agency's Des Plaines office inspects the hazardous waste landfill CID RDF, Calumet City, and landfills, transfer stations and compost sites in Cook, Grundy, Kane and Kendall counties and sites owned/operated by the city of Chicago and Will County.

## More than 198,000 tons of landscape waste composted

The tonnage accepted by compost sites in Region 2, 198,408 tons, is equivalent to 50 percent of total landscape waste composted in the State at all permitted facilities.

Three of the Region's compost sites show up in the top five of all of the State's compost facilities. Thelen Sand and Gravel #1, Antioch, was first; Green Organics, Bristol, was fourth; and Joyce Farms Recycling Inc., Essex, was fifth. A new compost site called Midwest Organics Recycling opened in McHenry on Sept. 6, 2005.

Christiansen Farms was permitted as a compost site on March 6, 2006.

## Compost Facilities: Waste Accepted 2005

	Municipality	County	Tons

Land and Lakes #1 & #2, Starlight Drive-In, and Winnetka Municipal Landfill Compost Facility were inactive compost sites during 2005.

<sup>1</sup> New in 2005 (1)

<sup>2</sup> Permit renewal still under review

## Recycling rates ranged from 11.2 to 52.1 percent

The Agency does not regulate recycling; however, it does survey recycling coordinators statewide. Coordinators in Region Two reported recycling rates ranging from 11.2 to 52.1 percent, giving the region an average recycling rate of 40.8 percent.

Seven counties (Grundy, Kane, Kankakee, Kendall, Lake, McHenry and Will) have passed ordinances in support of recycling in residential and/or commercial sectors. In Cook County, Chicago and West Cook County Solid Waste Agency have passed similar ordinances in support of recycling.

Recycling rates are high here, in part, because of accessibility of markets for recyclables in Chicago and because Chicago is an international business center. The Chicago Board of Trade considers recyclables to be commodities. ♦

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all. City of Chicago, DuPage, Grundy, Kane, Kendall, Lake, McHenry and Will Counties have completed ten year plan updates. Lake County has also completed its 15 year plan update.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in [Appendix K](#) of this report.

**Details concerning Region Two landfills, transfer stations, and compost facilities follow on pages R2.9 through R2.110.**

# Landfills Transfer Stations Compost Facilities

*"Pitch in. Put Waste in its Place: Are You as Smart as They Are?" by Emily Heinz, student, Hampshire Middle School, Hampshire (Kane County). Winner of Illinois EPA's School Poetry, Prose and Poster Contest for 5th and 6th graders.*

## Region Three Solid Waste Statistics

**Counties** 14  
**Area (square miles)** 8,170  
**Population (est.)** 760,131

**Landfill life expectancy**  
**Years remaining** 46 \*

**Landfills**  
**Active in 2005** 9  
**Re-opened in 2005** 1  
**Under Development in 2005** 1

**Transfer Stations**  
**Active in 2005** 4

**Compost facilities**  
**Active in 2005** 5

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Indian Creek Landfill No. 2 re-opens, as Tazewell RDF nears closure

In Hopedale, Indian Creek Landfill No. 2 received a significant modification to its permit on Nov. 26, 2003 in order to develop Areas 2 and 3. An Illinois EPA permit to open was granted on June 30, 2004. This site had previously been inactive since the early 1990's.

All active landfills in the region expect to remain open into 2006. The operator for Tazewell Recycling and Disposal Facility, East Peoria, has proposed a closure date in 2006. A transfer station is expected to be built at the landfill site. The site was still open in June 2006.

## Envirofil of Illinois Inc. and Atkinson Landfill expand

Illinois EPA approved two expansions at Envirofil of Illinois Inc. on Apr. 20, 2004. The site expanded horizontally by 57 acres and by 19 acres vertically, adding 9.25 million cubic yards airspace to its facility.

Atkinson Landfill, Atkinson, also received a significant modification permit on Jan. 16, 2004; including a new liner, waste excavation, a 45.7 acre vertical and a lateral expansion (78.2 ac.). The site is still under construction as of June 2006.

New cells opened in three other landfills in the region at Knox County Landfill #3, Oneida, Quad Cities Landfill, Phase IV, Milan, and Upper Rock Island County Landfill, East Moline, during 2004 and 2006.

\* Five landfills accepted out-of-state waste during 2005 totaling 1,321,392 gate cubic yards, or 30.3% of the region's total, from nine other states.

<sup>1</sup> Standing among 51 landfills that accepted waste during 2005.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

<sup>3</sup> UD = Under Development as of 1-16-04, a lateral expansion (78.2 ac.) and a vertical expansion (45.7 ac.) are under construction.

<sup>4</sup> 57 ac. horizontal expansion & 19 ac. vertical expansion approved on 4-20-04, adding 9.25 million cu. yds. airspace.

<sup>5</sup> Significant modification to permit approved 11-26-03, approved site opening on 6-30-04.

## Spoon Ridge Landfill ranks first in capacity since 1997

The Agency granted Spoon Ridge Landfill, near Fairview, a permit in December, 1997, that allowed the facility's owner and operator to expand the disposal area from 80 to 372 acres. The total landfill area changed from 995 to 1,038 acres, and its peak elevation rose from 813.5 to 915 feet. With a design capacity of 84.6 million airspace cubic yards, the facility has been the state's largest landfill for the past eight years, but this year it is last in terms of waste received.

On June 30, 1998, the owners announced a change to temporarily close Spoon Ridge as part of a nationwide effort to cut costs. The landfill owners said, in published reports, they would use the time to continue developing transfer stations and securing waste contracts that will eventually allow waste from the greater Chicago area and southeastern Wisconsin to be transported to Spoon Ridge.

## Delegated inspections performed in Tazewell County

The Illinois EPA has delegated inspection authority to Tazewell County Health Department for duties usually performed by the Agency's field office, such as investigating citizen complaints about open dumping and open burning, and for inspecting the county's two active landfills and one compost facility. Tazewell County's program was the first delegation partnership in the State, in place since 1987.

## Transfer station operators report 43,180 tons handled

Wigand Recycling and Transfer Facility, Chillicothe, handled 35,083 gate tons of waste, 81 percent of the amount voluntarily reported for the region by two sites. Kewanee's municipally owned and operated transfer station handled more than 8,000 tons of municipal waste. However, two other transfer stations chose not to complete the Agency's voluntary survey.

## Questions and Complaints

Illinois EPA Region Three personnel investigate reports of suspected illegal waste disposal, and inspect the Region's landfills, transfer stations and compost facilities, except in **Tazewell County**, where joint responsibility has been delegated to a local authority.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

Peoria City/Co. Comp. LSW TS <sup>1</sup>	Brimfield	Peoria	0
<b>Total</b>			<b>43,180</b>

<sup>1</sup> Active in 2005, but waste amounts accepted unknown

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the city of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all counties except for Hancock County.

Ten year plan updates have been adopted by Henderson, Henry, Knox, Marshall, Peoria, Rock Island, Stark, Tazewell and Woodford counties.

Hancock, Rock Island and Tazewell counties have completed their 15-year plan updates.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in [Appendix K](#) of this report.

**Details concerning Region Three landfills, transfer stations, and compost facilities follow on pages R3.5 through R3.23.**

## Almost forty percent of landscape waste receipts handled at Peoria City/County Landfill #1

The Peoria/Quad Cities region's compost facilities processed 21,203 gate tons of landscape wastes during 2005, 17 percent less than in the previous year. About 40 percent of the landscape waste in the region handled in 2005 was managed at the compost facility located at Peoria City/County Landfill #1, ranked fifteenth in the State.

### Compost Facilities: Waste Accepted 2005

	Municipality	County	Tons
Peoria City/Co. LF #1 <sup>1</sup>	Brimfield	Peoria	8,351
Pekin Composting Facility <sup>1</sup>	Pekin	Tazewell	3,949
Monmouth Municipal <sup>1</sup>	Monmouth	Warren	3,365
Knox County Landfill <sup>1</sup>	Oneida	Knox	2,794
Upper Rock Island County	East Moline	Rock Island	2,744
<b>Total</b>			<b>21,203</b>

## County recycling rates average 28.8 percent

The Agency surveys recycling coordinators statewide each year. Four counties did not voluntarily report new data. Recycling rates ranging from 1.9 to 70.2 percent were reported. The regional recycling rate of 28.8 percent is considered to be the average rate for 2005. ♦

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD	Tons	Percent

## Atkinson Landfill (Under Development)

County	Henry
Municipality	Atkinson
Location	137 Commercial Dr.
Location ☎	309-936-7468
Hours of operation	N/A
Waste accepted	Municipal and nonhazardous special
Tipping fee	N/A
Owner	Atkinson Landfill Co.
Operator	Atkinson Landfill Co.

\*Formerly named Henry County Landfill #2.

### Facility Facts

Identification number	0730200003
Design capacity, cu.yds.	14,100,000
Total permitted landfill area, acres	249.8
Permitted disposal area, acres	204
Highest permitted elevation, feet (msl)	790
Leachate monitoring stations	Unknown
Groundwater monitoring wells	7
Methane collection system	None
Years remaining, estimated by landfill	20
Date/year to open -- Date/year to close	1980 - 2026

\*On 1-16-04, a significant modification of the permit approved a new liner and waste excavation. A lateral expansion of 78.2 ac. for a total of 204 ac. waste footprint and a vertical expansion to be placed over 45.7 ac. of the presently permitted landfill were approved for construction on 1-16-04. Landfills under development report design capacity, rather than remaining capacity. As of June 2006, the landfill expansions are still under construction.

## Spoon Ridge Landfill\*

<b>County</b>	Fulton
<b>Municipality</b>	Fairview
<b>Location</b>	Route 1, Highway 97 North
<b>Location ☎</b>	309-778-2787
<b>Hours of operation</b>	Mon.-Sun.: 24 hours a day
<b>Waste accepted</b>	Municipal, nonhazardous special
<b>Tipping fee</b>	Unknown
<b>Owner</b>	BFI Waste Systems of North America Inc.**
<b>Operator</b>	BFI Waste Systems of North America Inc.**

\*The site is operating in a diminished capacity, in response to unfavorable market conditions. Under fully operating conditions, the waste volume could be three million cu. yds. per year. During calendar year 2005, waste was accepted only on 6-10-05. All other days during calendar year 2005 and onward through March 2006, this landfill did not accept any waste. In April - June 2006, waste was again accepted at the landfill, but it was exempt from state solid waste management fees. However, the site did become more active in calendar year 2006.

### Facility Facts

## Region Four: East Central Illinois

# Landfills Transfer Stations Compost Facilities

Poster by Adrienne Strohm, student, North Elementary School, Marshall, 2003-2004  
Winner of Illinois EPA's School Poetry, Prose and Poster Contest for 5th and 6th graders.

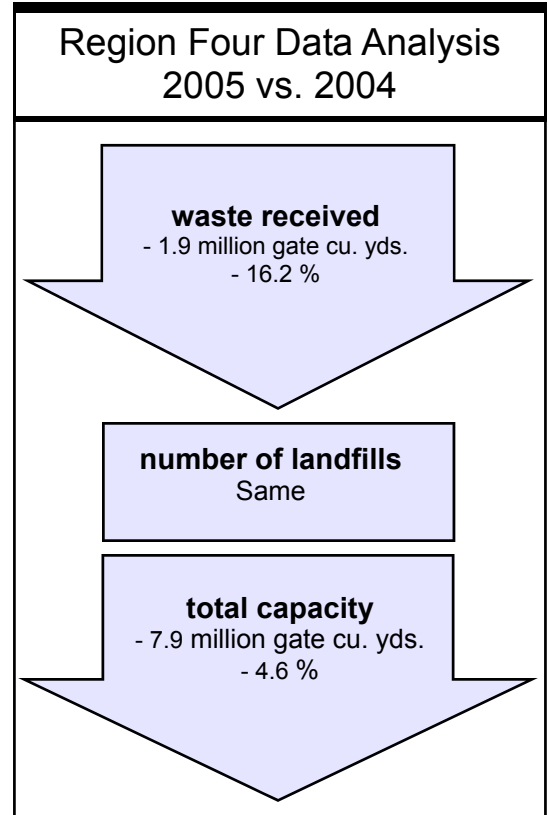

**A**BOUT 9.9 MILLION GATE CUBIC YARDS OF WASTE WAS accepted in East Central Illinois during 2005. This figure is down 16.2 percent from the previous year, a difference of 1.9 million cubic yards.

Sixty-seven percent of that region's total waste receipts was accepted at Livingston Landfill, Pontiac. In fact, Livingston Landfill accepted more waste than any other landfill in the State, a total of almost 6.7 million gate cubic yards, almost 1.6 million cubic yards more than that of the next largest recipient. Onyx/Orchard Hills Landfill, Davis Junction, took the number two slot, having accepted almost 5.1 million gate cubic yards of waste in 2005.

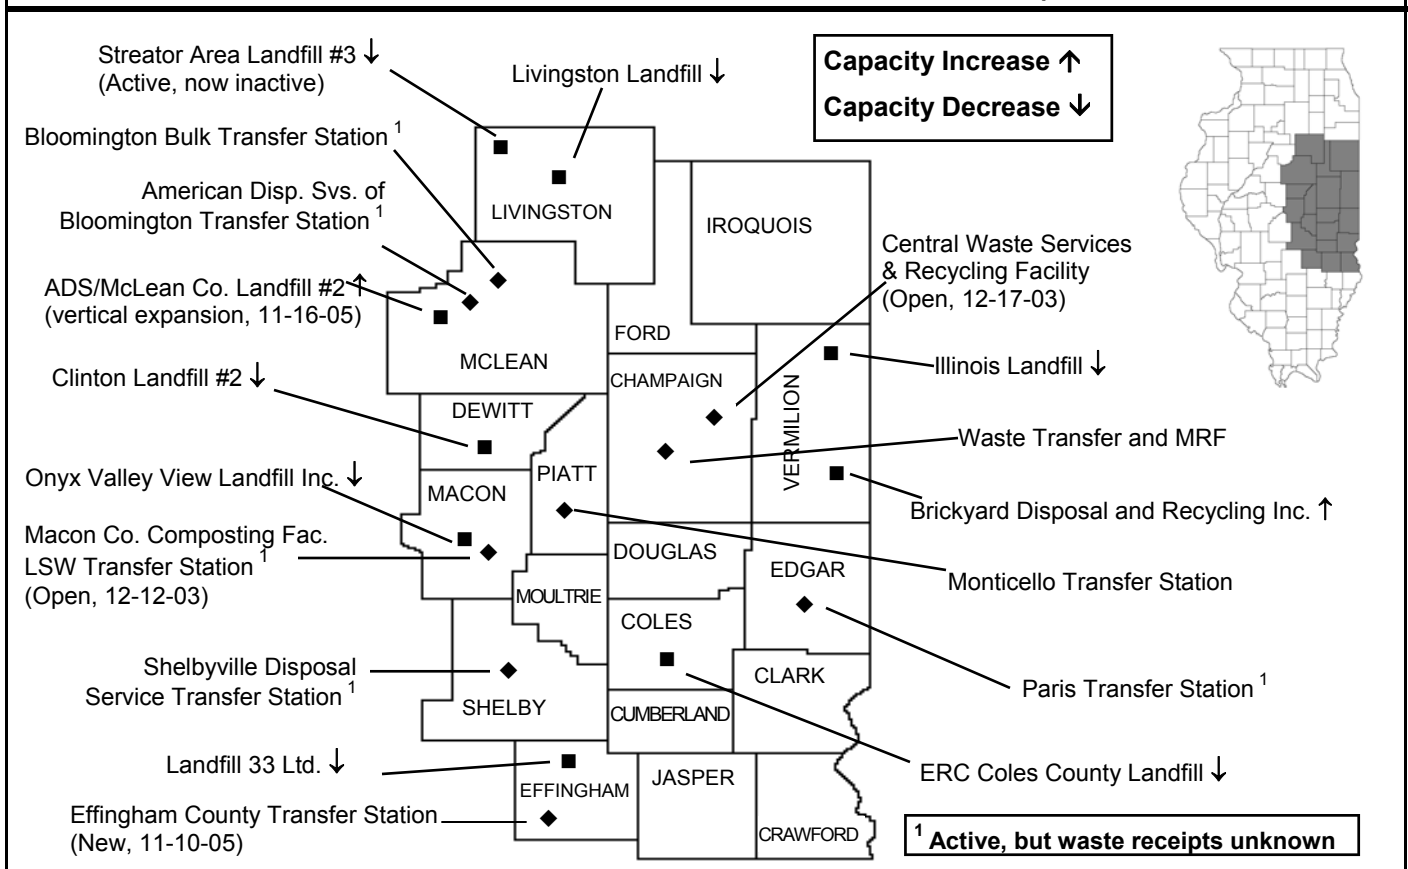

More than 7.9 million gate cubic yards less landfill capacity was available in Region Four this year, declining just 4.6 percent from the previous year.

Available capacity reported at nine landfills in the region on Jan. 1, 2006 was more than 164.2 million gate cubic yards.

However, one landfill has become inactive since the beginning of 2006. Streator Area Landfill #3, Streator, was active during the spring season until April 2006 when it closed its gates for now. The landfill is being prepared for future waste acceptance in its proposed expansion that is still under review by Illinois EPA.

## Landfills and Transfer Stations: Active & Under Development in 2005

## Region Four Solid Waste Statistics

<b>Counties</b>	<b>19</b>
<b>Area (square miles)</b>	<b>12,096</b>
<b>Population (est.)</b>	<b>863,562</b>
<b>Landfill life expectancy</b>	
<b>Years remaining</b>	<b>17 *</b>
<b>Landfills</b>	
<b>Active in 2005</b>	<b>9</b>
<b>Transfer Stations</b>	
<b>Active in 2005</b>	<b>9</b>
<b>New in 2005</b>	<b>1</b>
<b>Compost facilities</b>	
<b>Active in 2005</b>	<b>4</b>

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Livingston Landfill ranked second in capacity remaining

More than 69.2 percent of the capacity available in the region is at Livingston Landfill, ranked second in the State. Fifteen years of capacity remain in the region.

On Oct. 8, 2004, Illinois EPA approved Livingston Landfill's permit that included a 48 acre horizontal expansion of Parcel ABC, a 159 acre horizontal expansion of Parcel D, and a 75 foot vertical increase over Parcel D. This added 50.5 million cubic yards airspace capacity at this landfill.

ADS/McLean County Landfill, Bloomington, also received an Illinois EPA permit to open a vertical expansion on Nov. 16, 2005.

Streator Area Landfill's vertical expansion was approved on June 4, 2003. This landfill became inactive as of April, 2005, while the landfill is being prepared to accept waste.

New cells opened at two landfills in 2003 and at one landfill in 2004. Three landfills had new areas open in 2005. A new disposal area opened at one landfill in early 2006.

An additional horizontal expansion application is under review at this time at the landfill in Bloomington and at Streator's Landfill as well.

## Landfills: Waste Accepted 2005; Remaining Capacities Jan. 1, 2006

	Municipality	County	Waste		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>

<b>Totals</b>			<b>9,896,608</b>		<b>164,228,000</b>			

\* Four landfills accepted out-of-state waste during 2005 totaling 125,800 gate cubic yards, or 1% of the region's total.

<sup>1</sup> Standing among 51 landfills that accepted waste during 2005.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

<sup>3</sup> Vertical expansion approved 11-16-05; horizontal expansion under review.

<sup>4</sup> New cells approved in 2005 at three landfills.

<sup>5</sup> Horizontal and vertical expansions totaling 50.5 million in-place cu. yds. of capacity approved on 10-8-04.

<sup>6</sup> Vertical expansion of 480,000 in-place cu. yds. approved on 6-4-03. Site became inactive as of 4-05. Horizontal expansion still under review.

## Ambraw Valley Solid Waste Agency, Macon and Vermilion counties have delegated duties

The Illinois EPA has delegated inspection authority to Ambraw Valley Solid Waste Agency (covering the counties of Crawford, Lawrence and Richland), the Macon County Solid Waste Management Department and the Vermilion County Health Department.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA's Champaign field office: investigations into complaints about open dumping, inspecting pollution control facilities, investigating and enforcing suspected violations of land pollution laws.

## Central Waste Services & Recycling leads transfer activity at 91 percent

Three of the Region's nine transfer stations voluntarily reported solid waste accepted in 2005. The 106,378 ton figure of waste receipts underrepresents what waste is actually transferred in the region. Ninety-one percent of reported waste was transferred at one site, Central Waste Services & Recycling in Urbana.

### Transfer Stations: Waste Handled 2005

	Municipality	County	Tons
Central Waste Services & Recycling	Urbana	Champaign	96,978
Waste Transfer & Mat'l. Recovery	Champaign	Champaign	8,000
Monticello Transfer Station	Monticello	Piatt	1,400
<b>NEW</b> American Disp. Serv. TS <sup>1</sup>	Bloomington	McLean	0
Bloomington Bulk Transfer Station <sup>1</sup>	Bloomington	McLean	0
Effingham County TS <sup>1 &amp; 2</sup>	Mason	Effingham	0
Macon County Composting <sup>1</sup>	Decatur	Macon	0
Paris Transfer Station <sup>1</sup>	Paris	Edgar	0
Shelbyville Disposal Service TS <sup>1</sup>	Shelbyville	Shelby	0
<b>Total</b>			<b>106,378</b>

<sup>1</sup> Active in 2005, but waste receipts unknown.

<sup>2</sup> Open, 11-10-05

## Seventy percent of composting in region at two sites

More than 30,251 gate tons of landscape waste were processed at four compost facilities in Region Four.

### Compost Facilities: Waste Accepted 2005

	Municipality	County	Tons
Urbana Municipal Landscape	Urbana	Champaign	12,404
Decatur Compost Inc.	Decatur	Macon	9,810
Macon County Composting	Decatur	Macon	6,083
Brickyard Disp. & Recy. Compost <sup>1</sup>	Danville	Vermilion	1,954
<b>Total</b>			<b>30,251</b>

<sup>1</sup> Operated by City of Danville

## Horizontal expansion permit applications still under review

Landfill	Town	Airspace
ADS/McLean Co. LF #2	Bloomington	1.5 million
Streator Area LF #3	Streator	4.7 million

## Questions and Complaints

Illinois EPA Region Four personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Crawford, Macon and Vermilion counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

**Illinois EPA, Bureau of Land**  
**2125 S. 1st St.**  
**Champaign, IL 61820**  
**Phone: 217-278-5800**  
**Fax: 217-278-5808**

**Ambraw Valley Solid Waste Agency (Crawford County)**  
**P.O. Box 83, 1630-1700 S. Eaton St.**  
**Robinson, IL 62454-3638**  
**Phone: 618-544-7045**  
**Fax: 618-544-5027**

**Macon County Solid Waste Management Department**  
**Room 212**  
**141 S. Main**  
**Decatur, IL 62523-1293**  
**Phone: 217-425-4505**  
**Fax: 217-424-1459**

**Vermilion County Health Department**  
**200 S. College St., Suite A**  
**Danville, IL 61832**  
**Phone: 217-431-2662**  
**Fax: 217-431-7483**

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates were submitted by Champaign, Clark, Crawford, DeWitt, Douglas, Effingham, Iroquois, Jasper, Livingston, Macon, McLean and Vermilion Counties.

Ten year plan updates have been completed by Champaign, Coles, Crawford, DeWitt, Effingham, Ford, Iroquois, Jasper, McLean, Piatt, Shelby and Vermilion Counties. Macon County also completed its 15 year plan update.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in [Appendix K](#) in this report.

**Details concerning Region Four landfills, transfer stations, and compost facilities follow on pages R4.5 through R4.26.**

## Multiple years recycling rate average is 20.4 percent

Each year, the Agency attempts to seek current waste generation and recycling information from recycling coordinators statewide.

In Region Four, just five of 19 county recycling coordinators offered data for 2005, a 26 percent response rate.

Recycling rates in this region range from 4.9 percent to 30.7 percent. The data that is given dates from 1992 to 2005.

The region's multi-year average recycling rate is 20.4 percent. The recycled amount for this region is 214,921 tons. ♦

### Municipal Waste Recycled

## Region Five: West Central Illinois

# Landfills Transfer Stations Compost Facilities

*Illinois EPA's float won the "Director's Award for Best Non-Commercial Entry" in the Illinois State Fair opening Twilight Parade on August 10, 2006. The race car was constructed primarily by students in the Governor's Environmental Corps from aluminum cans, plastic containers and other recyclable items. It was also on display at the DuQuoin State Fair.*

**W**ASTE LANDFILLED IN WEST CENTRAL ILLINOIS (REGION Five) during 2005 amounted to only 4.2 percent of the state's total, the lowest in the state. Nevertheless, the landfills serve their purposes locally.

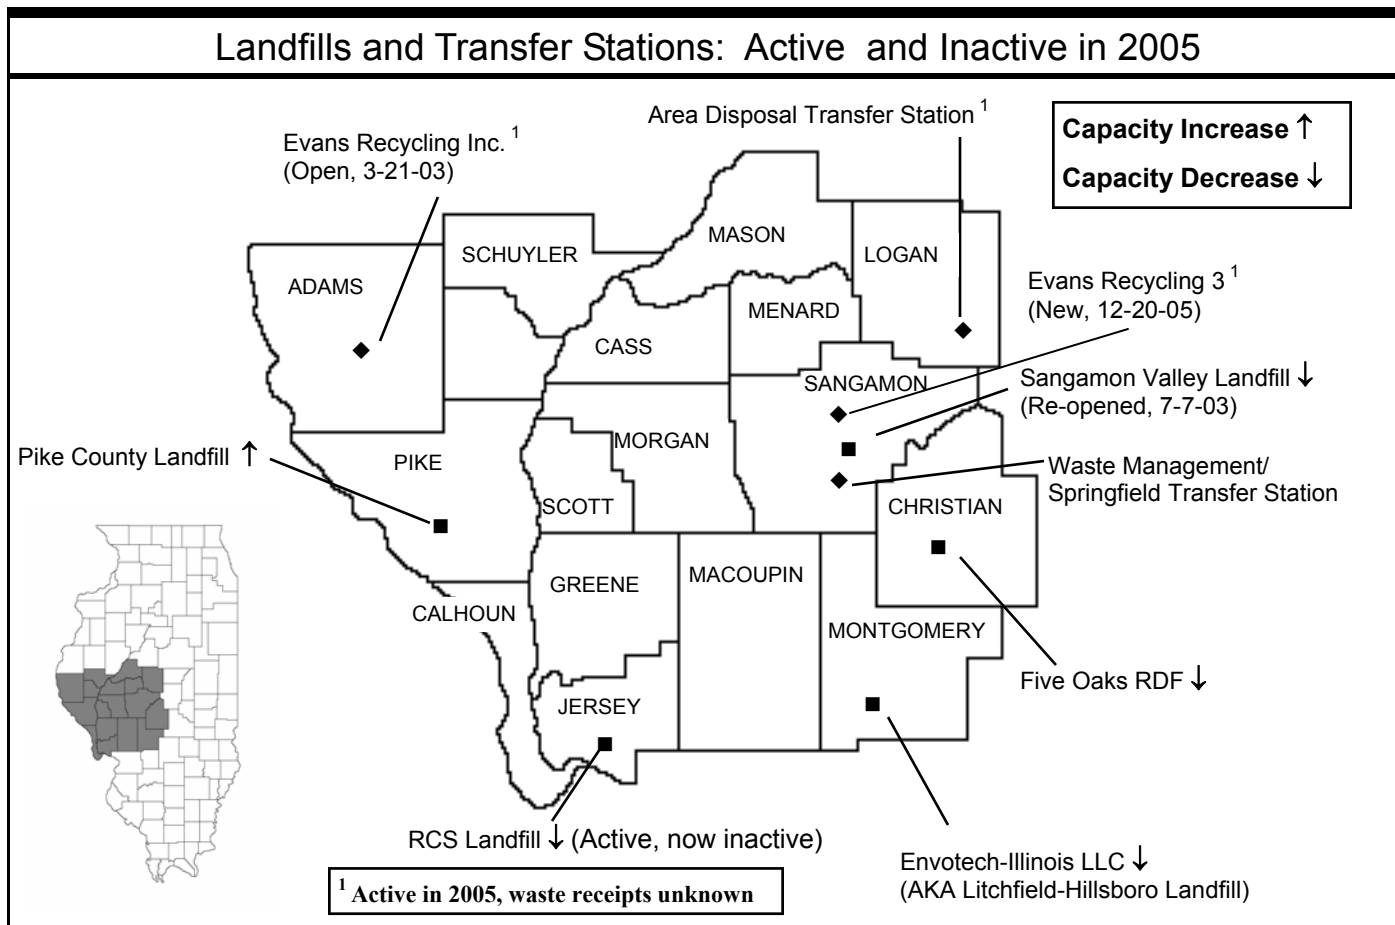

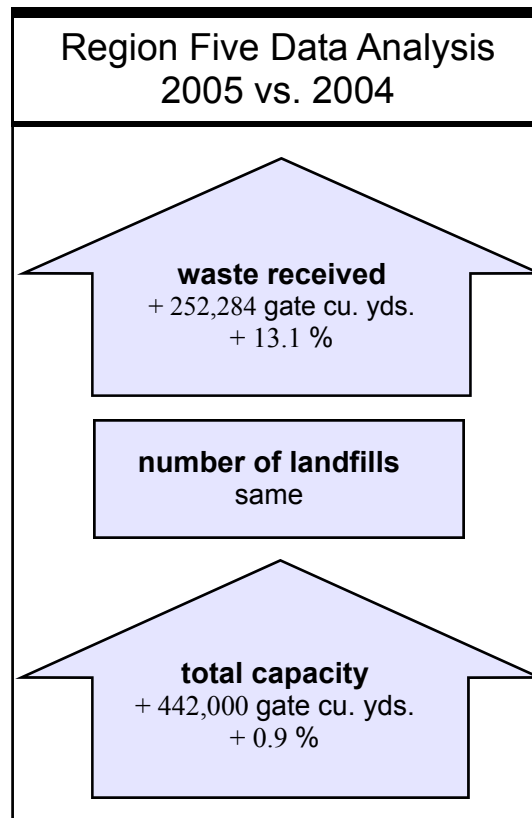

Region Five's five active landfills accepted almost 2.2 million gate cubic yards of waste during 2005. This volume differed slightly from 2004's total waste landfilled by adding 13.1 percent, or an increase of 252,284 gate cubic yards.

### Landfill life exceeds statewide average

As a region, West Central Illinois has the third most landfill life remaining: 23 years; Southern Illinois (Region 7) at 51 years and Region Three (Peoria/Quad Cities) at 46 years have more years of landfill life remaining. On the low end, Chicago Metropolitan Area (Region 2) has 11 years remaining. The whole state has 19 years of landfill capacity left.

The region's capacity increased by 442,000 gate cubic yards as reported on Jan. 1, 2006, just a 0.9 percent increase from the previous year.

Five Oaks Recycling and Disposal Facility, Taylorville, is ranked ninth in terms of capacity remaining at Illinois landfills as of Jan. 1, 2006, with 29.2 million gate cubic yards of capacity remaining.

## Region Five Solid Waste Statistics

**Counties** 17  
**Area (square miles)** 9,408  
**Population (est.)** 563,134

**Landfill life expectancy**  
**Years remaining** 23 \*

**Landfills**  
**Active in 2005** 5  
**Became inactive in 2006** 1

**Transfer Stations**  
**Active in 2005** 4  
**New in 2005** 1

**Compost facilities**  
**Active in 2005** 1

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Sangamon Valley Landfill re-opened in July 2003

Sangamon Valley Landfill re-opened in the latter part of 2003, under its new operators. Sangamon Valley Landfill's owners re-activated a site that had been inactive since 1995 (with Illinois EPA's approval) on July 7, 2003, when the operators opened Cell 1A, Area II. New areas have been built since then: Cell 1B, on Aug. 9, 2004; Cell 2A on May 26, 2005 and Cell 2B on Aug. 12, 2005.

## New cells open at three other landfills

Cell 7, Phase 2B (4.1 acres) opened at Envotech-Illinois LLC, Litchfield, on Dec. 22, 2003. On Jan. 16, 2004, Pike County Landfill received a permit to operate Phases 10 and 11A, adding 5.2 acres to their permitted disposal area. On Jan. 25, 2005, RCS Inc. Landfill, Jerseyville, opened Cell #2 (side slope) and Cell #3A, adding 3.5 acres to their operating disposal area. A year later though the operators ceased accepting waste at this landfill and moved staff to their landfill in Roxana.

## Three counties have delegation agreements

The Illinois EPA has delegated inspection authority to the Christian County Solid Waste Management Department, Montgomery County Coordinated Services Office and Sangamon County Department of Public Health.

## RCS Inc. Landfill became Inactive in 2006

Date	Action
4-28-06	Ceased accepting waste
6-1-06	Intermediate cover applied

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA's Springfield field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land.

## Landfills: Waste Accepted 2005; Remaining Capacities Jan. 1, 2006

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>		
Envotech-Illinois LLC *	Litchfield	Montgomery	377,953	27	3,847,000	33	62	2015
Five Oaks RDF	Taylorville	Christian	769,435	19	29,245,000	9	175	2044
Pike County Landfill *	Baylis	Pike	364,041	28	6,846,000	28	69	2025
RCS Inc. Landfill <sup>3</sup>	Jerseyville	Jersey	132,436	42	2,749,000	38	23.6	2026
Sangamon Valley Landfill <sup>4</sup>	Springfield	Sangamon	533,741	24	8,400,000	24	74.42	2022
<b>Totals</b>			<b>2,177,606</b>		<b>51,087,000</b>			

\* Two landfills accepted out-of-state waste during 2004 from Iowa and Missouri totaling 115,443 gate cubic yards, or 5.3% of the region's total.

<sup>1</sup> Standing among 51 landfills that accepted waste during 2005.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

<sup>3</sup> Ceased accepting waste temporarily on 4-28-06.

<sup>4</sup> Re-opened, July 7, 2003.

(Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2003; these facilities are not included in this report.)

Christian and Montgomery counties each have one active landfill. Sangamon County's landfill was re-activated in 2003.

Sangamon County has an active transfer station; Montgomery County and Christian County do not. Sangamon County also has an active compost facility.

### Transfer station's activity in 2005 is largely from the capital city of Springfield

Only one of Region Five's four transfer stations voluntarily reported accepting municipal waste during 2005. This means that 153,450 tons of waste reported as being transferred tells only part of the story.

Evans Recycling Inc. operates landscape waste transfer operations in Quincy and Springfield. Quincy's site has been opened since Mar. 21, 2003 and Springfield's site, since Dec. 20, 2005.

Transfer Stations: Waste Handled 2005			
	Municipality	County	Tons
Waste Mgt./Springfield	Springfield	Sangamon	153,450
Area Disposal TS <sup>1</sup>	Lincoln	Logan	0
Evans Recycling Inc. <sup>1</sup>	Quincy	Adams	0
Evans Recycling <sup>3</sup> <sup>1</sup> & <sup>2</sup>	Springfield	Sangamon	0
<b>Total</b>			<b>153,450</b>

<sup>1</sup> Active in 2005, waste receipts unknown.  
<sup>2</sup> Permitted to develop and operate, 12-20-05.

### One compost site in the region receives landscape waste

Sixty gate tons of landscape wastes (an amount less than one percent of regional wastes landfilled) were processed through the region's only compost site active in 2005. Dirksen Parkway Compost Facility manages landscape waste generated from the State Capitol complex in downtown Springfield. Its permit was renewed on Sept. 8, 2005.

Quincy Compost Facility, Quincy, was certified closed on July 30, 2003.

Compost Facilities: Waste Accepted 2005			
	Municipality	County	Tons
Dirksen Parkway Compost <sup>1</sup>	Springfield	Sangamon	60
<b>Total</b>			<b>60</b>

<sup>1</sup> Permit renewed, 9-8-05.

## Questions and Complaints

Illinois EPA Region Five personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Christian, Montgomery and Sangamon counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

**Illinois EPA, Bureau of Land**  
**4500 South Sixth Street Road**  
**Springfield, IL 62706**  
**Phone: 217-786-6892**  
**Fax: 217-786-6357**

**Christian County Solid Waste Management Department**  
**214 W. Market St.**  
**Taylorville, IL 62568-2233**  
**Phone: 217-287-2334**  
**Fax: 217-287-7755**

**Montgomery County Coordinated Services**  
**P.O. Box 122**  
**Hillsboro, IL 62049-1137**  
**Phone: 217-532-9577**  
**Fax: 217-532-9585**

**Sangamon County Department of Public Health**  
**2501 N. Dirksen Parkway**  
**Springfield, IL 62702-1405**  
**Phone: 217-535-3100**  
**Fax: 217-535-3104**

### On-farm compost site near Springfield

Mr. Carroll Heissinger operates an on-farm land application site at 4140 E. State Route 29, between Springfield and Rochester. For more information, call 217-529-3531.

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by Brown, Calhoun, Cass, Christian, Greene, Logan, Macoupin, Mason, Menard, Montgomery, Morgan, Pike, Sangamon, Schuyler and Scott counties.

Additionally, Christian, Jersey, Logan, Menard, Morgan and Sangamon counties completed their ten year plan updates.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in [Appendix K](#) of this report.

**Details concerning Region Five landfills, transfer stations and compost facilities follow on pages R5.5 through R5.14.**

## Multiple year recycling rates average 22.7 percent

Each year, Illinois EPA attempts to seek recycling and waste generation data from county recycling coordinators.

Four recycling coordinators (of 17 counties) in Region Five provided new data for 2005, a 23.5 percent response rate.

The multi-year average for the entire region, which includes recycling data from 1992 to 2005, is 22.7 percent. ♦

### Municipal Waste Recycled

## Region Six: Metropolitan East St. Louis

# Landfills Transfer Stations Compost Facilities

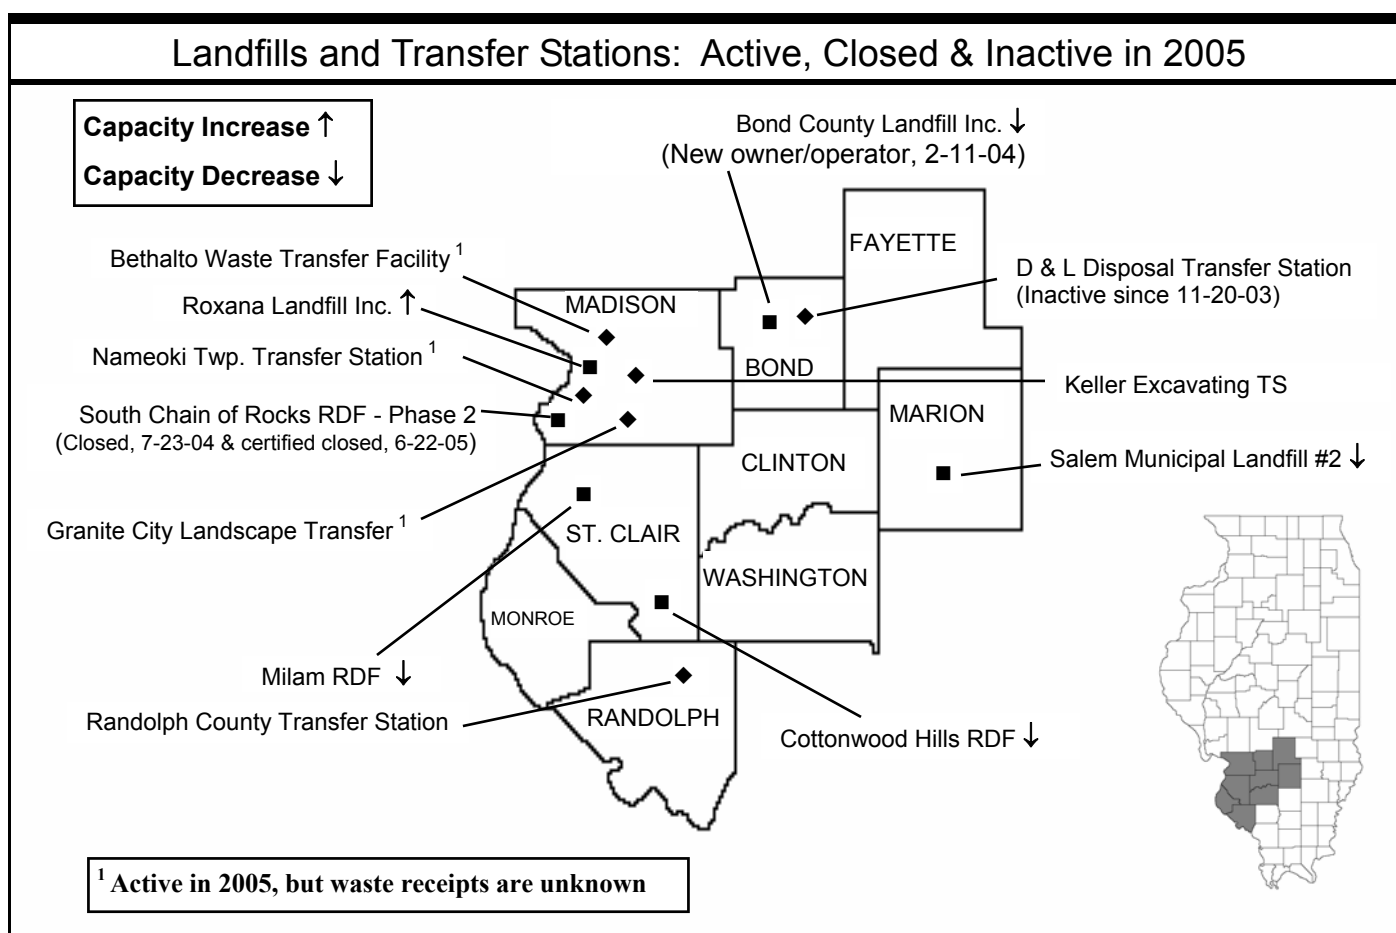

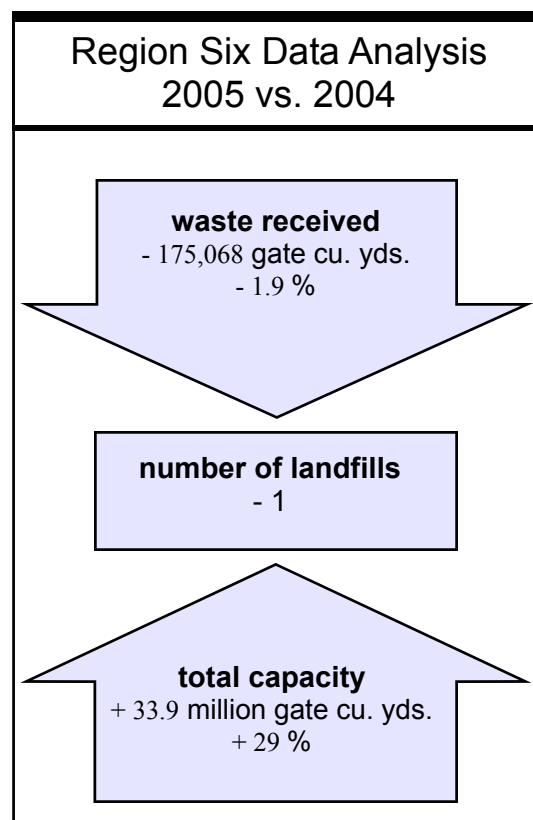

*All landfills are required to have leachate collection tanks, whether they re-circulate it or ship it off-site to a municipal wastewater plant. The entire leachate collection system must have secondary containment to hold any leaks.*

**D**URING 2005, FIVE METROPOLITAN EAST ST. LOUIS FACILITIES received 17.3 percent of solid wastes landfilled statewide. The amount disposed in 2005 declined by 1.9 percent from the previous year. Almost 9.1 million gate cubic yards of wastes were landfilled in the Metropolitan East St. Louis area in 2005. Figures differed by 175,068 gate cubic yards from year to year.

The region had one less landfill accepting waste this year.

On Jan. 1, 2006, Region Six landfill capacity increased by almost 33.9 million gate cubic yards, or up 29 percent from the previous year. Landfill operators in the region reported 17 years of capacity remaining for waste disposal.

The almost 83.9 million gate cubic yards of capacity reported on Jan. 1, 2006 by Cottonwood Hills RDF, Marissa, is 55.5 percent of the landfill capacity available in the region. Roxana Landfill's 42.5 million gate cubic yards of capacity also added 28 percent capacity. Together, they encompass 83.5 percent of the available capacity in the region.

## Region Six Solid Waste Statistics

<b>Open into 2006</b>	<b>6</b>

\*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Construction of new cells permitted at all six landfills

All six landfills applied for and received permits to construct new cells or areas during 2003 to early 2006. More details about these developments are found on the landfill specification pages that follow this regional overview.

## Expansion permits are approved at two landfills

The Illinois EPA approved on Oct. 16, 2003, a 4.75 million cubic yard vertical expansion at Milam RDF, East St. Louis. At the same site, its Phase IV Northeast expansion received approval on Jan. 26, 2004; and Phase V Northwest area changes received approval on Jan. 5, 2005.

On June 6, 2005, at Roxana Landfill Authority, Roxana, a 99.49 acre horizontal and a 20.5 million cubic yards airspace vertical expansion received Illinois EPA approval. Additionally, Cells 2A and 3A (10 ac.) were approved on May 18, 2006.

## Two landfills rank in top 10 in waste receipts

Roxana Landfill Inc. also had the distinction of ranking fourth in the state in quantities of all the municipal waste disposed during 2005, and Milam RDF ranked fifth. These two landfills accepted 79.4 percent of the waste that was landfilled in the region.

## Landfills: Waste Accepted 2005; Remaining Capacities Jan. 1, 2006

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>

<b>Totals</b>			<b>9,026,017</b>		<b>150,965,000</b>			

\* Four landfills accepted waste from four other states during 2005 totaling 4,779,200 gate cubic yards, or 53% of the region's total.

<sup>1</sup> Standing among 51 landfills that accepted waste during 2005.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

<sup>3</sup> Mod. #20 opened Phase IIIB (4.3 ac.) on 1-21-05. Mod. #26 opened a side slope cell (1.2 ac.) on 4-20-06.

<sup>4</sup> Phase 1A North approved on 11-20-03. Phase 3 Northwest (4.32 ac.) and all of Phase I East slope was open by 12-16-04. Phase 3 southwest (4.2 ac.) opened on 9-23-05.

<sup>5</sup> Phase IV NW expansion approved on 2-25-03. Vertical expansion of 4.75 million cu. yds. approved on 10-16-03. Phase IV Northeast expansion approved on 1-26-04. Phase V Northwest approved on 1-5-05. Phase V North approved on 4-19-06.

<sup>6</sup> New modules 8A (4.8 ac.), 9A (5 ac.), 10A North & South (1.8 ac.), 11A (5.1 ac.) approved in 2003 and 2004. Vertical expansion (20.5 million air-space cu. yds.) and 99.49 ac. horizontal expansion approved on 6-6-05. Cells 2A & 3A (10 ac.) approved on 5-18-06.

<sup>7</sup> Phase II East half approved on 9-24-03. Phase II West half (1.3 ac.) approved on 10-4-04. Phase 3 Southern part (1.3 ac.) approved on 12-29-05.

**More than half of wastes disposed came from four other states**

Salem Municipal Landfill #2 was the only active facility in the region that did not accept out-of-state waste. Of the total waste accepted by four landfills, almost 4.8 million cubic yards originated elsewhere.

Region 6 sites received 53 percent of its waste from these four states: Arkansas, Kansas, Kentucky and Missouri.

Which landfills accepted from other states and its percentage include: Cottonwood Hills (76 percent); Milam RDF (56 percent), Roxana Landfill Inc. (46 percent), and Bond County Landfill (one percent).

**Madison and St. Clair counties also conduct inspections**

The Illinois EPA has delegated inspection authority to the Madison County Planning and Development Department and the St. Clair County Health Department.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise be performed by the Illinois EPA’s Collinsville field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency’s Bureau of Land.

(Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2003; these facilities are not included in this report.)

Both Madison and St. Clair Counties have two active landfills each. Both counties also have compost facilities, but only Madison County has transfer stations (four).

**Five transfer stations were open, and two voluntarily reported**

Two of the five transfer stations in Region Six voluntarily reported that 28,596 tons were transferred during 2005. The amount of waste transferred by these facilities is underrepresented, because three others did not report.

**Questions and Complaints**

Illinois EPA Region Six field office personnel investigate reports of suspected illegal waste disposal, and inspect the region’s landfills, transfer stations and compost facilities, except in **Madison and St. Clair counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all the Region Six counties: Bond, Madison, Monroe, St. Clair and Washington counties have also completed ten year plan updates. Monroe County also has completed its 15 year plan update.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in [Appendix K](#) of this report.

**Details concerning Region Six landfills, transfer stations and compost facilities follow on pages R6.5 through R6.23.**

## BFI Modern Landfill Compost Facility Site #2 is State's second largest

St. Louis Composting, Belleville's only compost facility, accepted 57,074 tons of landscape waste in 2005. It accepted 2,748 less tons than first-ranked Thelen Sand and Gravel Site #1, Antioch. The two sites together handled 29.7 percent of the amount that was composted in Illinois during 2005.

Six compost facilities in the region processed 104,468 gate tons of landscape waste in 2005. The region's sites handled 26.5 percent of the total landscape waste received for composting in Illinois.

Centralia Landscape and Waste Recycling, Centralia, closed on Nov. 5, 2004, and was certified closed on Jan. 11, 2005. A new compost site opened at the landfill in Marissa in 2005.

### Compost Facilities: Waste Accepted 2005

	Municipality	County	Tons
BFI Modern Landfill	Belleville	St. Clair	57,074
Milam RDF	East St. Louis	St. Clair	37,956
Roxana Landfill Compost <sup>2</sup>	Roxana	Madison	8,712
Salem Municipal Landfill #2	Salem	Marion	449
Nashville Municipal	Nashville	Washington	264
Cottonwood Hills Compost <sup>1</sup>	Marissa	St. Clair	13
<b>Total</b>			<b>104,468</b>

<sup>1</sup> Opened 4-05, closed during May and June, re-opened in July.

<sup>2</sup> Compost site expansion approved, 3-8-04.

## Multiple year recycling rates average 29.1 percent

Each year, the Illinois EPA seeks recycling and waste generation data from county recycling coordinators. Four of the nine counties in the region voluntarily responded to the recycling survey in 2005, a 44 percent response rate.

Recycling rates in Region Six ranged from 2.1 percent to 35.2 percent. The regional average recycling rate was 29.1 percent. ◆

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled

## Region Seven: Southern Illinois

# Landfills Transfer Stations Compost Facilities

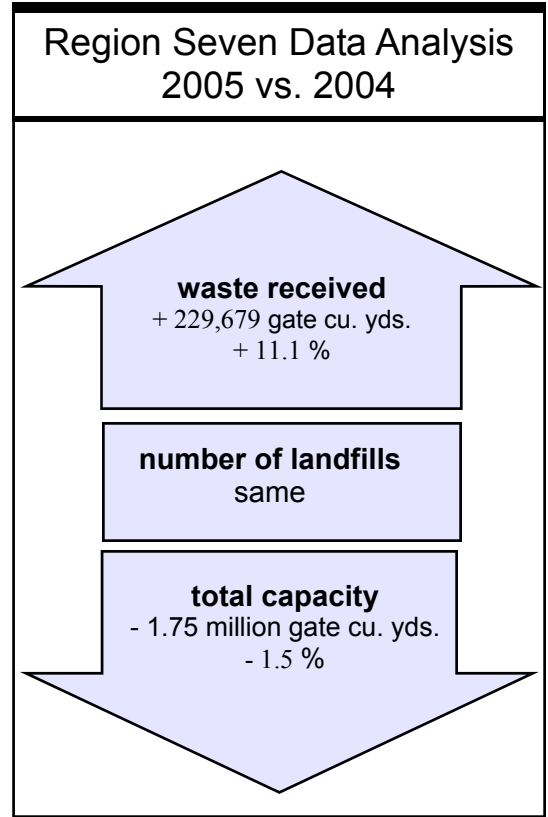

*DuQuoin Mayor John Rednour accepted a "Green Communities" award from Illinois EPA recognizing the city's leadership on environmental issues.*

**R**EGION SEVEN'S FIVE ACTIVE LANDFILLS ACCEPTED almost 2.3 million gate cubic yards of waste during 2005. This volume was up 11.1 percent, or almost 230,000 gate cubic yards more than 2004's total.

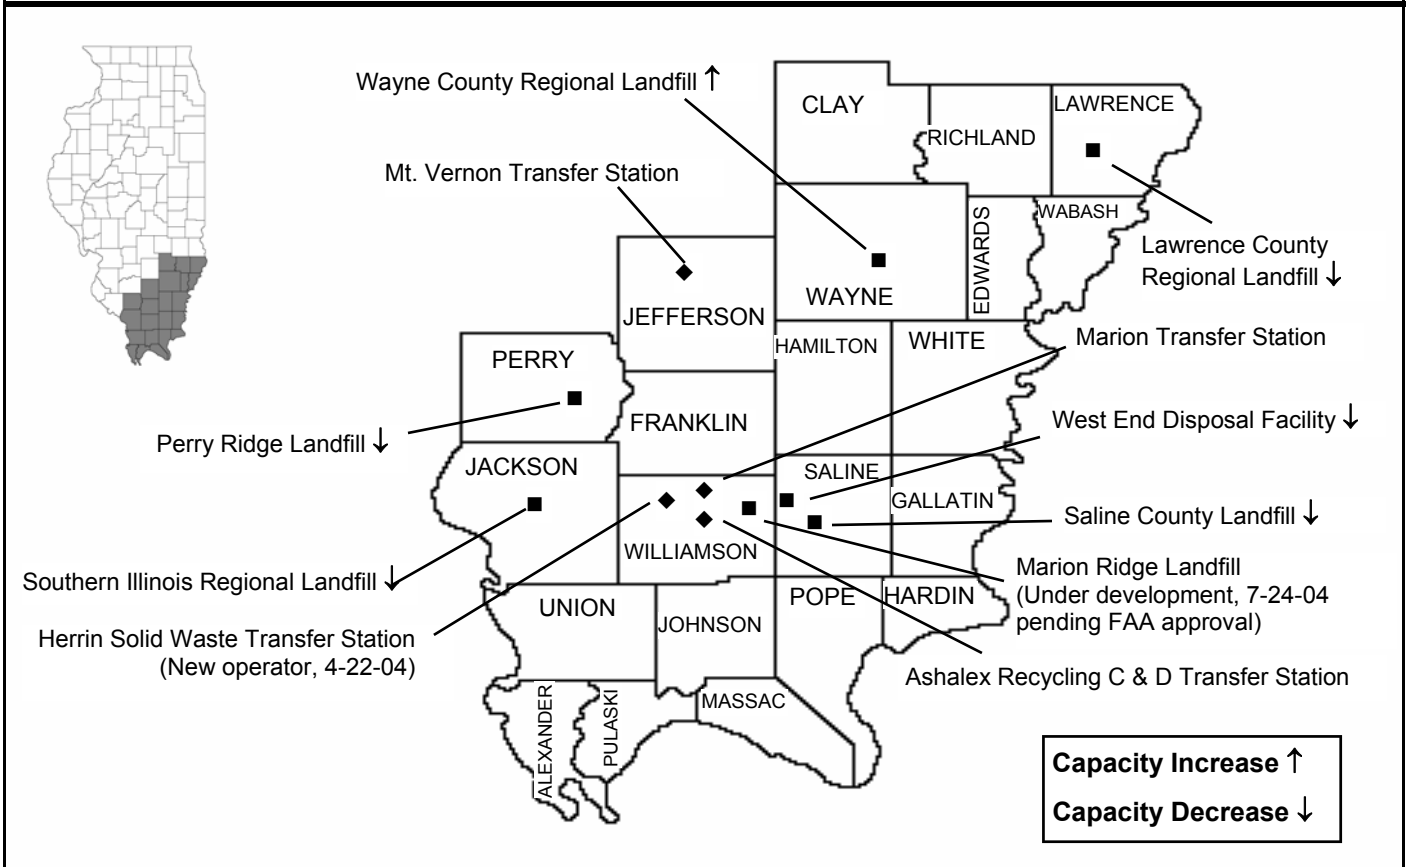

Southern Illinois Regional Landfill, near DeSoto, moved to 10th place in waste disposal ranking of all state landfills in 2005, and accounted for nearly 67 percent of the waste landfilled in the region during the year.

Lawrence County Regional Landfill, Sumner, accepted 66,924 gate cubic yards or 29 percent of its waste in 2005 from Indiana. Of the 1.5 million gate cubic yards of waste received by Southern Illinois Regional Landfill in 2005, 357,815 gate cubic yards, or 23 percent, came from Arkansas, Indiana, Kentucky and Missouri. Tons totaling 24,276 (19 percent of its waste stream) came to Perry Ridge Landfill from Missouri. West End Disposal Facility, Thompsonville, accepted 10,669 gate cubic yards or nine percent of its waste from Kentucky.

The regional percentage of imported waste is 20 percent, considerably less than Region Six (Metropolitan East St. Louis), where out-of-state waste comprised 55.5 percent of total waste landfilled. The state-wide average of imported waste is 13 percent.

## Landfills and Transfer Stations: Active, Inactive & Under Development in 2005

## Region Seven Solid Waste Statistics

<b>Counties</b>	<b>22</b>

**Active in 2005**      **2**

\* Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

## Fifty-one (51) years of capacity life remains

As of Jan. 1, 2006, the region's landfills reported a total capacity of more than 117.8 million gate cubic yards, allowing 51 years of landfill life for the region. Three of the region's landfills: Southern Illinois Regional Landfill, Perry Ridge Landfill and West End Disposal Facility contain 81.1 percent of the capacity available in the region for waste disposal. They rank sixth, tenth, and 11th of all the State's 51 landfills reporting remaining capacity.

The largest of these landfills, Southern Illinois Regional Landfill, has almost 49.9 million cubic yards of capacity available. On July 2, 2004, this landfill's South Unit lateral expansion was approved. The landfill contains 143.3 acres and brought 20.6 million more in-place cubic yards of landfill capacity.

## Perry Ridge Landfill opened in DuQuoin on Mar. 8, 2004

Landfill capacity needs in Region Seven are appeased for the time being by the opening of Perry Ridge Landfill, DuQuoin, on March 8, 2004. Perry Ridge Landfill expects to operate for 23 years. This landfill has an initial design capacity of 14.9 million airspace cubic yards. The site consists of Phase 1A (2.9 ac.) and Phase 1A-Southwest (3.2 ac.).

At Saline County Landfill, on Aug. 19, 2004, a 28.9 acre lateral expansion was approved for development, increasing future disposal capacity by 3.1 million cubic yards. The site accepted waste during January 2005 through Feb. 18, 2005, when it ceased accepting waste temporarily. On May 19, 2006, the landfill became active again and continued to be active through June 2006.

New cells opened in 2005 and early 2006 at Southern Illinois Regional Landfill, Wayne County Regional Landfill and West End Disposal Facility.

## Landfills: Waste Accepted 2005; Remaining Capacities Jan. 1, 2006

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank <sup>1</sup>	Cu. Yds.	Rank <sup>2</sup>		
Lawrence County Regional LF *	Sumner	Lawrence	229,724	37	8,811,000	23	42	2044
Perry Ridge Landfill * <sup>3</sup>	DuQuoin	Perry	126,620	43	23,040,000	10	141	2029

West End Disposal Facility *	Thompsonville	Saline	118,965	45	22,699,000	11	125	2042
<b>Totals</b>			<b>2,290,601</b>		<b>117,847,000</b>			

\* Four landfills accepted out-of-state waste from Arkansas, Indiana, Kentucky and Missouri during 2005, totaling 459,684 gate cubic yards, or 20% of the region's total.

<sup>1</sup> Standing among 51 landfills that accepted waste during 2005.

<sup>2</sup> Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

<sup>3</sup> Permitted to open 12-12-03, began accepting waste on 3-8-04.

<sup>4</sup> Unit 2's lateral expansion (28.9 acres) adding 3.1 million in-place cu. yds. was approved on 8-19-04.

<sup>5</sup> South unit lateral expansion (143.3 ac.) approved on 7-2-04 adding 20.6 million in-place cu. yds. capacity.

## County agencies inspect facilities; investigate dumping

The Illinois EPA has delegated inspection authority to local governments in Jackson, Perry and Wayne counties. A multiple county delegated partner is Ambraw Valley Solid Waste Agency that inspects Lawrence County Regional Landfill and several closed sites in Crawford, Lawrence and Richland counties.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA's Marion field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. (Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2003; none of which are included in this report.)

## Transfer station activity is underrepresented

In 2005, four active transfer stations played an important role in an area encompassing 8,421 square miles. All four facilities voluntarily reported to the Agency that they handled 126,222 tons of municipal waste during 2005.

Transfer Stations: Waste Handled 2005			
	Municipality	County	Tons
Herrin Solid Waste	Herrin	Williamson	64,000
Marion Transfer Station	Marion	Williamson	35,754
Mt. Vernon Transfer Station	Mt. Vernon	Jefferson	26,243
Ashalex Recycling C & D TS	Marion	Williamson	225
<b>Total</b>			<b>126,222</b>

## Almost 2,000 tons of landscape waste accepted

The region's two compost facilities reported handling 1,999 tons of landscape waste, 45 percent more than the amount accepted in the previous year. An additional 623 tons were accepted in 2005.

Ashalex Recycling Compost Site, Marion, opened on Sept. 1, 2004.

Compost Facility: Waste Accepted 2005			
	Municipality	County	Tons
New Earth	Carterville	Williamson	1,089
Ashalex Recycling Compost <sup>1</sup>	Marion	Williamson	910
<b>Total</b>			<b>1,999</b>

<sup>1</sup> Open, 9-1-04

## Questions and Complaints

Illinois EPA Region Seven field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Crawford, Jackson, Perry, Lawrence, Richland and Wayne counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

**Illinois EPA, Bureau of Land**  
**2309 W. Main St., Suite 116**  
**Marion, IL 62959**  
**Phone: 618-993-7200**  
**Fax: 618-997-1281**

**Ambraw Valley Solid Waste Agency**  
**(Crawford, Lawrence & Richland Counties)**  
**777th and State St., P.O. Box 62**  
**Bridgeport, IL 62417**  
**Phone: 618-945-7707**  
**Fax: 618-945-7118**

**Jackson County Health Department**  
**415 Health Dept. Road**  
**Box 307**  
**Murphysboro, IL 62966-0307**  
**Phone: 618-684-3143, Ext. 136**

**Fairfield, IL 62837-0645**  
**Phone: 618-842-5166**  
**Fax: 618-842-3305**

## Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation data. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by Edwards, Franklin, Gallatin, Hardin, Jackson, Jefferson, Lawrence, Massac, Perry, Pope, Richland, Saline, Union, Wabash, Wayne, and White counties.

Ten year plan updates have been completed by Clay, Edwards, Gallatin, Lawrence, Richland, Saline, Wabash, Wayne and White counties.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in [Appendix K](#) of this report.

**Details concerning Region Seven landfills, transfer stations and compost facilities follow on pages R7.5 through R7.17.**

## Multiple year recycling rate average is 15.1 percent

Each year, the Agency seeks information regarding recycling and waste generation rates.

Southern Illinois is closer to Indiana and Kentucky recyclable material markets, than to Illinois markets. Rates ranged from 3.4 to a high of 35.0 percent, yielding a multi-year average of 15.1 percent.

Six of 22 counties in the region offered current data, yielding a survey response rate of 27 percent. The rest of the counties had data from 1994-2004, and one had no data at all. ♦

### Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled	
		Tons	PCD	Tons	Percent

<b>Methane collection system</b>	Gas-to-Energy (planned)
<b>Years remaining, estimated by landfill</b>	33
<b>Date/year to open -- Date/year to close</b>	1975 - 2039

\*Permit Mod. #30 approved on 7-2-04, a lateral expansion of the South Unit that expanded the landfill footprint by 143.3 acres and added about 20.6 million in-place cubic yards of airspace, and 29 more years of landfill life. The local siting approval for this expansion has been upheld, after being appealed. Mod. #32 approved on 1-10-05 that Cell A (8.5 ac.) may operate and waste disposal in that area began in March 2005. Cell B (7.7 acres) opened on 9-8-05. Mod. #36 on 3-6-06 approved re-circulation of leachate in the South Unit.

# Solid Waste Landfills

## Appendices A, B, C & D

*The footprint of Southern Illinois Regional Landfill, DeSoto, expanded horizontally by 143.5 acres in 2004. Landfill inspectors monitor the process of cell construction, such as the installation of the leachate collection system. After construction quality testing, the landfill operator will ask Illinois EPA for permission to begin accepting waste in the cell.*

**Owner/Operator Footnotes:**

- <sup>1</sup> A subsidiary of Allied Waste Industries Inc.  
<sup>2</sup> A subsidiary of Waste Management Inc. Midwest  
<sup>3</sup> A separately incorporated affiliate of Peoria Disposal Co.  
<sup>4</sup> An affiliate of Onyx North America and a subsidiary of Veolia Environnement, France  
<sup>5</sup> A subsidiary of Republic Services Inc.

**Site Information Footnotes:**

- <sup>a</sup> Ceased accepting waste, 4-5-03; not yet certified closed as of 4-3-06.  
<sup>b</sup> Site re-opened, 6-30-04 and continued activity.  
<sup>c</sup> Ceased accepting waste, 11-18-05. Closure activities began in April 2006 and will be complete by 12-1-06.  
<sup>d</sup> Permit to operate, 12-12-03, began accepting waste, 3-8-04 and continued activity.  
<sup>e</sup> New, 1-19-04 and continued activity.  
<sup>f</sup> Ceased accepting waste temporarily on 4-28-06.  
<sup>g</sup> Temporarily closed on 2-11-04, sporadically open during 2005.  
<sup>h</sup> Site re-opened, July 7, 2003.  
<sup>i</sup> Ceased accepting waste, 7-23-04; certified closed, 6-22-05.  
<sup>j</sup> Active during 2004, Inactive, 4-05 and continuing inactivity.  
<sup>k</sup> Phase 2 open, 2-18-04 and continued activity.

\* Expansion permitted some time during the years of 2003 to 2005

\*\* Expansion approved recently between Jan. 1 – June 30, 2006

\*\*\* Nearing closure

Status:            A = Active                      C = Closed                      N = New                      UD = Under Development

# Solid Waste Transfer Stations

## Appendices E, F & G

*With all the technological advances in waste handling equipment, sometimes it still gets down to a worker with a shovel. Here two employees at the Groot Transfer Station in Chicago prepare to police the yard.*

**Solid Waste  
Transfer Station  
Owners and Operators**

**Alphabetic by Facility**

Transfer Station Name	Municipality	Owner	Operator	Status	Page
34th Street Mat'l. Recov. & Recyc.	Chicago	Chicago Department of Sts. & San.	Allied Waste Transportation Inc. <sup>1</sup>	A	R2.19

# Landscape Waste Compost Facilities

## Appendices H, I & J

*Mother nature gets a helping hand reducing landscape waste to usable compost at Illinois permitted composting sites. These windrows at Thelen's Sand & Gravel Compost Facility in McHenry County are just part of the 59,822 tons of landscape waste turned into a product in 2005.*

15. Supplementary Notes			
16. Abstract (Limit 200 words)  This 19th annual report on municipal solid waste disposal and remaining landfill capacity is arranged by Illinois EPA administrative regions. Featured are specification pages describing the chief characteristics of 55 municipal solid waste landfills; their status (active, inactive, closed, under development); locations and hours of operation; tipping fees; quantities of wastes received in 2003, 2004 and 2005; remaining capacities on Jan. 1, 2005, and Jan. 1, 2006; solid waste management fees paid in 2005; names, addresses and phone numbers of landfill owners and operators. Quantities reported by landfills are given in gate cubic yards; as a convenience to the reader, those volumes are divided by 3.3 to provide rough equivalents in tons. The report also includes scaled-down specifications for 104 municipal solid waste transfer stations and 44 compost facilities.  During 2005, 51 landfills reported receiving 52.3 million gate cubic yards (more than 15.8 million gate tons) of waste. This volume was almost 1.5 million gate cubic yards less than the total received during 2004, a 2.7 percent decline. As of Jan. 1, 2006, 51 landfills reported remaining capacities totaling 980.4 million gate cubic yards (almost 297.1 million gate tons), or 6.1 million gate cubic yards less than on Jan. 1, 2005, a decline of less than one (0.6) percent. Dividing wastes disposed during 2005 by capacity remaining on Jan. 1, 2006, suggests a landfill life expectancy in Illinois of 19 years, at current (2005) disposal rates, barring capacity adjustments, until capacity is depleted.
