

Curriculum Map Overview
Fall Assessment Conferences
October 28 & 29, 2013

General Format

Rows of Matrix = Student Learning Outcomes
Columns of Matrix = Courses in your program
Cells of Matrix = Level of coverage (K, A, or S)

Potential Issues

- Empty rows (A learning objective is not covered in your curriculum.)
- Empty columns (A course does not cover any learning objectives.)
- Rows in which the level of coverage does not include any Ks (Basic knowledge of concepts is not covered in the curriculum.)
- Rows in which the level of coverage does not include any Ss (Higher level synthesis is not a part of the curriculum.)
- Rows in which the level of coverage jumps from K to S (Students are expected to go from basic knowledge to advanced synthesis with no steps in between.)

Notes

- Gaps are an opportunity for your program to review your curriculum, your students learning outcomes, or both.
- Mapping is flexible.
 - o Can include multiple levels of coverage in one course.
 - o Might skip a K, for example, in a graduate program where basic knowledge is a prerequisite. If there is an intentional gap or irregularity, a narrative is a good way to explain why.
-

MGMT Courses: Student learning outcomes (SLOs) are directly measured at multiple points within each course offering, using multiple criteria including quizzes, tests, examinations, oral and written reports, teacher and peer evaluations, a multi-criteria, multi-method approach. Thus progressively, our students move from the general knowledge base, framework, foundations, and overviews to more comprehensive synthesis and applications in higher level courses.

BLP 3207: In BLP 3207 students are expected to demonstrate the following competences in a “hands-on” course in which students apply their knowledge, skills, and abilities in management directly:

- Plan and implement a complex project within a finite time period.
- Apply management theory to organizational cultural environments.
- Coordinate financial resources, materials, and machines to solve management problems.
- Employ people skills to solve management problems.
- Develop benchmarks to measure progress against project activities.

MGMT 4890: In MGMT 4890 which is the capstone course, students synthesize and apply all the knowledge, skills and abilities they have acquired throughout their college career in business. Learning outcomes are directly assessed through weekly group student presentations (oral and written); perform case analyses of real organizations; and final report of developing a strategic plan for CSU to address recruitment, retention, graduation, graduate school enrollment and job placement.

ETS -MFT Business External Exam: An external direct standardized examination by Educational Testing Service (ETS), MFT Business, is also administered consecutively each semester for the past three years. Developed and provided on-line by ETS, the Major Field Test (MFT) provides yet the most independent and unbiased assessment of what management and business students should know upon graduation. Data from this capstone course assessment is disseminated to the Dean and faculty to inform our curriculum alignment and improvement efforts in the Department and across the College of Business curriculum.

SENIOR EXIT SURVEY: (Copy Attached). The Senior Exit Survey is an indirect assessment method that captures the views and input of graduating students with respect to:

- A. Program offerings of CSU, COB, and Management. The level of student satisfaction is measured on a 5-point rating scale (0=N/A; 1=Poor; 2= Adequate; 3=Good; 4=Excellent).
- B. Overall student satisfaction with their COB experience on a 5-point scale (1= Very Dissatisfied; 2=Dissatisfied; 3=Not Sure; 4=Satisfied; 5= Very Satisfied).
- C. Student’s understanding of the importance and contribution diverse workforce makes in a business organization on a 5-point scale (1= Extremely Important; 2=Very Important; 3=Important; 4=Not Sure; 5= Not Important).
- D. Employment in their major field and Graduate school plans.

FORM 201B: ASSESSMENT PLAN - 2014/2015 Program/Department: MANAGEMENT

Program Mission

The mission of Management Program is to produce successful graduates in the field of management who are well equipped in knowledge and technology to compete in a global marketplace, and/or start their own businesses.

Program Effectiveness Objectives (PEOs)

Program effectiveness objectives include a student's ability to:

1. Demonstrate application of managerial concepts and principles in an organization or industry.
2. Analyze organizational decision making process.
3. Utilize product and service design to manage new products.
4. Start and manage a new business venture.
5. Utilize various entry modes to international or global business environment.
6. Recognize the contribution of diverse workplace to organizational effectiveness.
7. Resolve ethical issue when confronted with one.

Student Learning Outcomes (SLOs)

A graduate of the Management Program will be able to:

1. Critically evaluate managerial functions of planning, organizing, leading, and controlling in a corporation or nonprofit organization.
2. Organize thoughts/data to effectively communicate in any business environment.
3. Integrate technology to provide solutions to business problems.
4. Evaluate entrepreneurial opportunities.
5. Integrate management concepts in a global business environment.
6. Assess organizational diversity in a business environment.
7. Determine ethical issues and select appropriate actions.

Program Effectiveness Outcomes (PEOs) and Student Learning Outcomes (SLOs)

PEOs	SLOs	Assessment Instruments	Criteria
PO1: Demonstrate application of managerial concepts and principles in industry or nonprofit organization	a. Critically evaluate managerial functions in industry or nonprofit organization	a. Direct Assessment Instrument ETS Capstone Exam (MFT-Business)	Grade C or higher. 50 th percentile of national norms
PO2: Analyze organizational decision making process	b. Organize thoughts/data to communicate effectively in a business environment	b. Direct Assessment Instrument ETS Capstone Exam (MFT-Business)	Grade C or higher 50 th percentile of national norms
PO3: Utilize product and service design to manage new product	c. Integrate technology to provide solutions to business problems	c. Direct Assessment Instrument ETS Capstone Exam (MFT-Business)	Grade C or higher 50 th percentile of national norms
PO4: Start and manage a new business venture	d. Evaluate entrepreneurial opportunities	d. Direct Assessment Instrument ETS Capstone Exam (MFT-Business)	Grade C or higher 50 th percentile of national norms
PO5: Utilize various entry modes to international or global business environment	e. Integrate management and marketing concepts in a global business management	e. Direct Assessment Instrument International Business (MGMT 4850) ETS Capstone Exam (MFT-Business)	Grade C or higher 50 th percentile of national norms
PO6: Recognize contribution of diverse workforce to organizational efficiency	f. Assess organizational diversity in a corporate environment	f. Direct Assessment Instrument ETS Capstone Exam (MFT-Business) Indirect Assessment Instrument	Grade C or higher 50 th percentile of national norms Senior Exit Survey
PO7: Resolve ethical dilemma when confronted	g. Determine ethical issue and select appropriate action.	g. Direct Assessment Instrument ETS Capstone Exam (MFT-Business)	Grade C or higher. 50 th percentile of national norms

Definition of Assessment Criteria

Course Grades

A= Demonstration of excellent ability to address problem fully, integrate and apply concepts and principles taught in the College of Business curriculum.

B= A clear demonstration of some depth and complexity in the analysis and application of concepts and principles taught in the College of Business curriculum.

C= Adequately demonstrating a good understanding and ability to apply in less complex way, the concepts and principles taught in the College of Business curriculum.

D= Showing inadequacy in the grasp and application of concepts and principles taught in the curriculum of College of Business.

F= Unable to understand & apply concepts and principles taught in College of Business curriculum.

MFT Capstone Exam: Is a computerized two-hour external examination administered by Educational Testing Service (ETS) to measure students' mastery of their chosen field of study. We use it in the COB to assess the effectiveness of major programs of study and improve curricula and student learning outcomes. The ETS Major Field Test in Business is a comprehensive undergraduate outcomes assessments designed to measure the critical knowledge and understanding obtained by students in Business. The test goes beyond the measurement of factual knowledge by helping COB evaluate students' ability to analyze and solve problems, understand relationships and interpret material from their major field of study.

ETS offers comprehensive national comparative data for the Major Field Tests, enabling COB to evaluate its students' performance and compare our program's effectiveness to programs at similar institutions locally and nationwide. In the COB, the Major Field Test assists us in pursuing the following goals:

- preparing students to succeed by using test results to improve curricula
- demonstrating the strengths of our program to prospective students and faculty
- helping ensure our students have mastered their field of study
- using our time to focus on other aspects of accreditation

FORM 201 BC: ASSESSMENT REPORT FOR INSTRUCTIONAL PROGRAMS

Program/Department Management in MMIS

Evidence to Support Achievement of Student Learning

Achievement of student learning outcomes observed and recorded through direct assessment instruments used in determining student learning outcomes, and indirect assessment instrument (Senior Exit Survey) as indicated in the Assessment Plan. Exit Survey was used to measure indirect student learning outcomes. Below are actual direct statements from students on the Exit Survey about their Management program experience:

- All the management instructors did a great job at improving my knowledge-base and management skills. I was able to improve my presentation skills and Microsoft Office due to class presentations, essays, and projects.
- I'm grateful for my experience at Chicago State University in the College of Business. I believe that the College of Business experience is way better than just being enrolled at Chicago State University. The College of Business faculty is amazing. All of my professors were always available to meet. My advisor, Ms. Odom, not only helped me with registration, but taught me life skills.
- My experience at Chicago State has been very interesting. There needs to be more of a sense of an emergency from the faculty. It took too long for simple things to get completed, like replies to emails. Many of the instructors were wonderful to be around. They made learning the subject an enjoyment. The college should also continue to focus on group projects in every course.
- My experience at Chicago State University with respect to the College of Business was great. I appreciate how the instructors made themselves available at various times to suit one's personal schedule. I always had a way to communicate with my instructors. I never felt as though I had to learn with the pace of the class. My professors provided on-on-one tutoring. However, Moodle does not always compliment the text books, which posed some challenges.
- My experience at CSU has been great. The instructors overall have used practical real life experiences to help me gain a better understanding of the textbook applications. The upgrade to computers and campus wi-fi has also been helpful in accessing class work information. Academic advertisement could be improved for evening students, working adults specifically. Proactive outreach would be appreciated.

- Attending Chicago State University was extremely advantageous in regards to understanding business. Learning here has enabled me to strengthen my mental discipline, exploit my entrepreneurial and leadership skills, and enhance my communication abilities. Specifically, my instructors, as well as the material they provided, has allowed me to adopt the adequate confidence needed to excel in any business.
- The College of Business at Chicago State University is the best program, I must say. There are many diverse teachers with different backgrounds and experience. The biggest strength is the diverse backgrounds and knowledge of instructors that is brought to the courses. The only weakness is that some of the instructors don't seem to like to teach that much.

Below in tabular form, are summary assessments of various components of the Management education in the COB. Regarding the overall COB experience, one student was dissatisfied with their COB experience while five (5) were indicated they were either satisfied or very satisfied. All seven (7) respondents either were employed in their major academic field or have job offers upon graduation. Four students plan on enrolling in graduate programs after graduation.

COB Experience Satisfaction						
		COB Experience Satisfaction				Total
		Very Dissatisfied	Satisfied	Very Satisfied	Missing	
COB Major	Management	1	3	2	1	7
	Marketing	0	1	1	0	2

Total		4	5	9

SLO1: Critically evaluate managerial functions of planning, organizing, leading, and controlling in a corporation or nonprofit organization.

Summary Senior Exit Survey results are attached in the appendix. All seven (7) Management students indicated that their understanding of managerial skills and leadership styles (MGMT1 & MGMT2) was either “Good” or “Excellent”. All the students rated as excellent or good, their understanding and application of business concepts and principles (SLO1), lending support to their ability to critically evaluate managerial functions of planning, organizing, leading and controlling in an organization or industry.

Understand Managerial Skills

Total		2	5	7

ETS MFT Assessments: Management student performance in the capstone course is captured in the table below. The overall performance of COB students is presented in the second table. Our students can thus be compared to themselves, and further to a national cohort. Whereas our students are higher than normative schools in few areas (items 50 &52), they are comparatively equal in a few other areas (item 31). On majority of items, however, our students performed far below national norms collectively, and severally on most items over the past three years 2012-15.

Analysis and Program Change

Although both student exit reports and COB internal assessment standards point to achievement successes in students outcomes, the independent external ETS-MFT Business assessment suggests differently – our student achievement outcomes are consistently below national comparison norms in the years under consideration, 2012-2015. Both total curriculum changes and specific curricular content and sub-content area emphasis in identified deficient areas in first table will improve performance in the new program year.

Curriculum changes aligning the Management Program with the new entrepreneurship emphasis of the College of Business include the introduction of new courses such as Social Entrepreneurship (MGMT 3755), and Introduction to Quantitative Business Analysis (QBA1500), Business Plan Development (MGMT 4505) and Career Fluency. The Career Fluency Experiential Learning program emphasizing soft-skills cut across various programs and they require active participation of students, faculty and staff. Real world experience is brought into the class room through interaction between corporate executives, business owners, faculty, staff, and students. Over the past two years the COB has engaged in International Internships in Ghana in both local and international organizations, in addition to national internships. Students have performed exceptionally well in these placements with employers clamoring for more interns each year from CSU. This impacts demagoguery and class room delivery of instructional materials as provision is made to enrich student learning and experience.

Assessment as a Departmental Priority

Assessment outcomes are shared information and responsibility of all employees in the department and college. In particular, the ETS-MFT Business and exit survey results are shared in Departmental and College meetings. Faculty discuss and are challenged to form committees to address noted deficiencies in performance. Each semester the results are revisited and compared to previous outcomes. Hence the Management Program takes the assessment process seriously. Faculty and staff members of the college attend university and college wide workshops conducted at the beginning of each semester to address some academic issues that include student learning, study/dress habits and the need for timely registration and graduation processes. At the curricular and advisory committee meetings, both faculty and staff share their views about student advising, student learning including ways to help students improve their learning, providing mentorship and internship programs. Each year faculty and staff members and administrators attend meetings and workshops conducted by experts and consultants on assessment, and student learning outcomes. Specifically, the College of Business Assessment Coordinators Workshop with Chicago State University (2012). As put by the Dean of the College, such workshops can be helpful in understanding our process as well as the construction of syllabi and assessment tools. Moreover, the scheduled workshops also addressed the specific accreditation requirements for specific colleges (for College of Business, Association of Collegiate Business Schools and Programs (ACBSP). In other academic meetings, faculty and staff members share their experience and observations about student learning and study habit and how their skills could improve through team work, timely submission of assignments, and prompt attendance of classes. Staff advisors make sure that course sequence is followed as much as practicable to minimize frustration and lack of attendance that result from not understanding a particular course. When a student misses a class for some time, the academic advisor contacts the student to have a handle on the problem be it personal or academic. Members of the Management Program and the

department of MMIS are actively engaged in the assessment process.

Effectiveness of Program Assessment

Below is a comment made by one student on the Exit Survey illustrating that we use assessment in a feedback loop to improve our outcomes, whether positive or negative:

- I feel that if an instructor has a language that is different than the majority of his students, he should use learning aids. Also, if a student has a problem with a teacher and the teacher has a reputation for having a bad temper, bad/negative attitude, then that teacher should be held with the same consequences as would be the student. Regardless of seniority or tenure status, the teacher should have consequences for his bad actions.
- More social medial management courses
- Operations Management course

Assessment has been also useful in examining our efforts internally and against other local institutions and national standards. It has led to implementation of some of the recommendations/suggestions made by students in the Exit Survey. For example the desire by many respondents to start and run their own businesses prompted some curricular changes. Some of the implementations include introduction of Online and Hybrid courses, intersession classes, focus on entrepreneurship as an area of concentration, as well as making more classes available for evening students. All these initiatives are directed toward enhancing course offerings and improving graduation rate. Other accomplishments of the program include a strong link between the college and some business executives who provide real life experience as guest or motivational speakers to our students. This link also helps to provide internship and job opportunities to those students that seriously require the experience. The assessment process is evaluated every semester with a view to articulating student input when indirect assessment instrument like survey is used or when an important learning outcome is to be introduced. The program is very effective in the sense that it brings to the forefront the need for all constituents to be aware of the importance of achieving high academic learning, as well as high retention and graduation rates.

The majority of the students can identify with the immediate and visible benefits that come with the assessment process such as providing equipment/technology to facilitate their learning process. There is need to continue to educate the students how the assessment process is in their best interest and therefore, should be given the utmost attention that it deserves. This is basically due to the fact that the assessment process tends to foster an environment that presents and promotes learning outcomes, performance between faculty, staff, and students on one hand, and allows students' input on the other hand.

Publicizing Student Learning

Information about student learning and achievement is made public through various media that include the CSU Website, college electronic board mounted on the ground floor as well as the fourth and fifth floors, website and bill boards. Other avenues used include during college meetings, town hall meetings, COB advisory board meetings, and alumni meetings. In those occasions, the dean of the college would take some time to gladly talk

about student achievements and accomplishments including performance of college based student organizations in out of state and national competitions. The college also utilizes the university wide electronic medium "Up to the Minute" and the radio network to highlight, showcase, and disseminate information not only about student learning but also about performance of student organizations such as ENACTUS, National Association of Black Accountants (NABA), Investment Club, 3Cs, all based in the college of business. The performance of students in these organizations is a direct reflection or result of what they have learned in the classroom.

FORM 201C: SUMMARY OF TREND [Instructional Programs]

Program & Department: **Management**

Directions: Assessment trend data is recorded in 3-year cycles. Provide the information requested in each column along with a summary of action. Attach the assessment plan.

Instruments	2012/2013	Actions Taken	2013/2014	Actions Taken	2014/2015	Actions Taken	Summary of Actions Taken
Graduation Rates (undergrad programs only)	21%	More courses scheduled to increase graduation rate. Expansion of Summer & Intersession classes		Minor in Entrepreneurship introduced. Two new courses introduced. Addition of more electives to improve course availability.	Not Available	Dress code introduced. Attendance at college workshops required.	Introduction of more electives. Online classes introduced. More summer and Intersession classes.
1 st Year Retention Rates (undergrads programs only)	63%	A new course available to freshmen and transfer students.		Increased contact with the corporate world. Leadership forum introduced	Not Available	Attendance of college workshops and events required.	Separate Intro. Course. Constant contact with advisors.
Indirect or Reflective Assessment Instrument		Annual survey to continue		Formation of student leaders group. Students involved in linkage with business/company executives.	Program learning rated Good or Excellent by students. 100% rated excellent/good instruction by faculty. 93% rated excellent/good, preparation for employment	Exit Survey revised to include alumni data collection	Revision of Exit Surveys.
(Direct Assessment Instrument 1)	85% of students improved learning	Study groups formed and tutorial classes	About 88% indicated improvement in learning	Maintaining tutorial classes. Corporate guest speakers introduced. Web-based classes introduced.	100% could evaluate business opportunities. 100% could operate in international environment	Assessment Format changed. Expanded to incorporate Program Mapping	Assessment of student learning outcomes revised and standardized.
(Direct Assessment Instrument 2)	90% showed improvement in learning	Study groups and tutorial classes formed	Steady improvement. (93%).	Increased number of tutorial sessions. More evening and Intersession classes provided.	94% overall in student learning outcome	Equal number of Program and Learning Objectives. Seven each	Inclusion of two new SLOs, entrepreneurial opportunity and workplace diversity.

Summary Comments about Management and COB

- All the management instructors did a great job at improving my knowledge-base and management skills. I was able to improve my presentation skills and Microsoft Office due to class presentations, essays, and projects.
- I'm grateful for my experience at Chicago State University in the College of Business. I believe that the College of Business experience is way better than just being enrolled at Chicago State University. The College of Business faculty is amazing. All of my professors were always available to meet. My advisor, Ms. Odom, not only helped me with registration, but taught me life skills.
- My experience at Chicago State has been very interesting. There needs to be more of a sense of an emergency from the faculty. It took too long for simple things to get completed, like replies to emails. Many of the instructors were wonderful to be around. They made learning the subject an enjoyment. The college should also continue to focus on group projects in every course.

- My experience at Chicago State University with respect to the College of Business was great. I appreciate how the instructors made themselves available at various times to suit one's personal schedule. I always had a way to communicate with my instructors. I never felt as though I had to learn with the pace of the class. My professors provided on-on-one tutoring. However, Moodle does not always compliment the text books, which posed some challenges.
- My experience at CSU has been great. The instructors overall have used practical real life experiences to help me gain a better understanding of the textbook applications. The upgrade to computers and campus wi-fi has also been helpful in accessing class work information. Academic advertisement could be improved for evening students, working adults specifically. Proactive outreach would be appreciated.
- The College of Business at Chicago State University is the best program, I must say. There are many diverse teachers with different backgrounds and experience. The biggest strength is the diverse backgrounds and knowledge of instructors that is brought to the courses. The only weakness is that some of the instructors don't seem to like to teach that much.

	MGMTBRIEFSTATEMENT
--	--------------------

						My experience at Chicago State University with respect to the College of Business was great. I appreciate how the instructors made themselves available at various times to suit one's personal schedule. I always had a way to communicate with my instructors. I never felt as though I had to learn with the pace of the class. My professors provided on-one tutoring. However, Moodle does not always compliment the text books, which posed some challenges.
			All the management instructors did a great job at improving my knowledge-base and management skills. I was able to improve my presentation skills and Microsoft Office due to class presentations, essays, and projects.	I'm grateful for my experience at Chicgao State University in the College of Business. I believe that the College of Business experience is way better than just being enrolled at Chicago State University. The College of Business faculty is amazing. All of my professors were always available to meet. My advisor, Ms. Odom, not only helped me with registration, but taught me life skills.	My experience at Chicago State has been very interesting. There needs to be more of a sense of an emergency from the faculty. It took too long for simple things to get completedm, like replies to emails. Many of the instructors were wonderful to be around. They made learning the subject an enjoyment. The college shold also continue to focus on group projects in every course.

FORM 201BC: ASSESSMENT REPORT FOR INSTRUCTIONAL PROGRAMS 2013

Program/Department: Marketing in MMIS

Evidence to Support Achievement of Student Learning

Achievement of student learning outcomes were observed and recorded in direct assessment instruments used in determining student learning outcomes (SLO, 2, 4, 6, & 7), and indirect assessment instrument (SLO6) and Exit Survey. Advanced Marketing Management (MKTG 4880) was used to assess SLO2. Evidence shows that all the students performed well by scoring C and above. SLO3 assessed students' ability to provide solutions to marketing problems using Marketing Research (MKTG 4830). Student learning was achieved as seven out of eight students (88%) scored C and above. Evaluation of entrepreneurial opportunities (SLO4) showed that all the students utilized both quantitative and qualitative approach in presenting their marketing plans. Business Strategy and Policy (MGMT 4890) provided SLO7 in which performance was 100% and in which diversity was rated as very important.

The indirect assessment instrument used in SLO6 indicates that all the students (100%) rated diversity in the workplace as extremely important or very important. In the Exit Survey, all the students (100%) rated their General Education Skills at Chicago State as very effective or effective. In their program area, all the students (100%) rated as excellent or good, their understanding and application of marketing concepts (SLO1), channel of distribution and numerical analysis (SLO2), and resolve ethical issues (SLO7).

Analysis and Program Change

The data in this year's assessment show some consistency in terms of high performance and consequently evidence of achievement in student learning. The students did well in all the areas covered in the learning outcomes including analysis, evaluation and presentation aspects of the learning outcome which could be seen as part of their strengths. Other areas of strength include improved team work and verbal communication skills. Without any shadow of doubt, the assessment instruments chosen provided meaningful data to address student learning outcomes.

Curricular changes envisioned aim at aligning the program with the new entrepreneurship and diversity emphases of the University and the College of Business. Other curricular changes include the introduction of new courses such as Social Entrepreneur, and Introduction to Quantitative Business Analysis (QBA 2500). Some soft-skill initiatives/changes cut across various programs as they require active participation of students, faculty and staff when an outside corporate guest presenter or speaker is involved. Real world experience is brought into the class room through interaction between business owners/executives, facilitators, and students. This approach impacts demagoguery and class room delivery of instructional materials as provision is made to enrich student learning and experience through such means as attendance of presentations, seminars, workshops and community service. Smart blackboards have been in existence in most of the classrooms for use by both instructors and students. To facilitate student use of technology, the College of Business is fully wired. These and other positive changes were factored into the college budget at the beginning of the Fall Semester and therefore, do not have serious budget constraint on the program.

Assessment as a Departmental Priority

The department of Management, Marketing & Information Systems (MMIS) in which Marketing is a program, takes the assessment process seriously. Every faculty and staff of the college attend university and college wide seminar at the beginning of each semester to address many academic issues including student learning, study habits and graduation rates. At the curricular committee meetings, faculty members share their views about student learning, ways to help students improve their learning, providing mentorship and internship programs. Since 2011, many faculty members and administrators have attended numerous meetings and workshops conducted by experts and consultants on assessment and student learning outcomes. In other academic meetings, faculty and staff members share their experience and observations about student learning and study habit and how their skills could improve through team work, timely submission of assignments, and class attendance. Staff advisors make sure that course sequence is followed as much as practicable to minimize frustration and lack of attendance that result from not understanding a particular course. Members of the department and program contribute in a number of ways to the assessment process through participation in the design and conduct of tests, as well as preparing result of the tests. Faculty participation is clearly displayed in the revised Exit Survey in which the draft was first circulated to members for their input before it was administered to the graduating students. The faculty and staff members are not only actively engaged in the assessment process, they are totally engaged in students' academic performance and real life success. Students' demographic data are collected for future college use.

Effectiveness of Program Assessment

The effectiveness of program assessment has never been in doubt as noticeable changes occur due to implementation of some of the recommendations such as introduction of Online and Hybrid courses, intersession classes, focus on entrepreneurship as an area of concentration, as well as making more classes

available for evening students. All these initiatives are directed toward enhancing course offerings and improving graduation rate. Other accomplishments of the program include a strong link between the college and some business executives who provide real life experience as guest or motivational speakers to our students. This link also helps to provide internship and job opportunities to those students that require them. The assessment process is evaluated every semester with a view to articulating student input when indirect assessment instrument like survey is used or when an important learning outcome is to be introduced. The program is very effective in the sense that it brings to the forefront the need for everyone to be aware of the importance of achieving high retention and graduation rates.

While the majority of the students can identify with the immediate and visible benefits that come with the assessment process, it may become difficult to maintain the momentum in the long run. In other words, how to convince every student that the assessment process is in their best interest should not be overlooked, rather should be taken as a challenge that fosters competitive learning and performance between faculty, staff, and students. Different options to motivate continued participation are under consideration.

Publicizing Student Learning

Information about student learning and achievement is made public through various media that include college electronic board mounted on the fourth and fifth floors, website and bill boards. Other avenues include during college meetings, town hall meetings, and business advisory board (BAB) meetings when the dean of the college would talk about student achievements and accomplishments including performance in out of state competitions. The university Home page also displays stellar performance of students either in sports or competitive academic events.

FORM 201B: ASSESSMENT PLAN 2012/2013

Program/Department: Marketing Program in MMIS

Program Mission:

The mission of Marketing Program is to produce successful graduates in the field of marketing who are well equipped in knowledge, communication skills, and technology to compete in a global marketplace and /or start their own business.

Program Effectiveness Objectives (PEOs)

Program effectiveness objectives include a student’s ability to:

1. Demonstrate application of marketing concepts in any business environment.
2. Analyze marketing functions in the flow of goods and services in the marketplace.
3. Prepare, and present cases and recommend solutions based on identified problems.
4. Evaluate and choose business opportunities based on sound business or marketing plan.
5. Prepare coherent steps required in conducting global business.
6. Recognize the importance of diverse workplace and its contribution to organizational performance.
7. Resolve ethical issue when confronted with a dilemma.

Student Learning Outcomes (SLOs)

A graduate of the Marketing Program will be able to:

1. Critically evaluate marketing functions performed by channel members in the industry.
2. Organize thoughts to effectively communicate in any business environment.
3. Integrate technology to provide solutions to marketing problems.
4. Evaluate entrepreneurial opportunities.
5. Integrate marketing concepts in a global business environment.
6. Recognize the importance and contribution of organizational diversity in a business environment.
7. Determine ethical issues and select appropriate actions.

Program Effectiveness Outcomes (PEOs) and Student Learning Outcomes (SLOs)

7. Resolve ethical issue when confronted with a dilemma.	g. Determine ethical issue and select appropriate action.	g. Direct Assessment Instrument 7. Business Strategy and Policy. (MGMT 4890).	C and above

Definition of Criteria for Assessments

Grade Level :

- A : Demonstration of excellent ability to address problem fully, integrate and apply concepts and principles taught in the College of Business curriculum.
- B : A clear demonstration of some depth and complexity in the analysis and application of concepts and principles taught in the College of Business curriculum.
- C : Adequately demonstrating a good understanding and ability to apply in less complex way, the concepts and principles taught in the College of Business curriculum.
- D : Showing inadequacy in the grasp and application of concepts and principles taught in the curriculum of College of Business.
- F : Inability to understand and apply concepts and principles taught in the curriculum of College of Business.

Senior Exit Survey:

This survey is an indirect assessment approach that captures the views and input of graduating students with respect to Marketing Program offerings and core courses of the College of Business. The awareness and importance of workplace diversity, level of satisfaction at college and University levels are also determined using percentage as a measure.
