

CHICAGO STATE UNIVERSITY

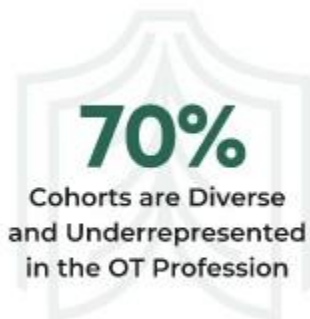

City Colleges of Chicago Transfer Guide

BHS Pre-Occupational Therapy

Chicago State University established The Department of Occupational Therapy (OT) in 1982. It is the second oldest OT program in the State of Illinois. Our mission is to train a diverse student body and produce competent occupational therapists and prepare graduates with the skills to meet client needs within rapidly changing service delivery systems.

Occupational therapists are health professionals that provide service to those with impaired abilities. Occupational therapists work with people impacted by injury, illness, developmental problems or aging. Impairment may be physical, mental or cognitive. Practitioners deliver services in many different settings, ranging from private practice to hospitals. Job opportunities include roles as practitioners, consultants, educators, managers, researchers and advocates.

The Department of Occupational Therapy offers a Bachelor of Health Science (BHS) Pre-Occupational Therapy degree, which is a pre-professional degree designed to prepare students to enter the Masters of Occupational Therapy (MOT) program at Chicago State University. The combined BHS/MOT curriculum allows students advanced placement to begin professional study in occupational therapy as an undergraduate student (in their senior year) and supports the transition to a post baccalaureate degree in occupational therapy. The Occupational Therapy Program at Chicago State University is accredited by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association ACOTE. Graduates of the MOT program will be eligible to sit for the national certification examination for occupational therapists administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR®) and will be eligible to apply for licensure to practice in Illinois and other states that require licensure.
